Monopoly Mail:

Saving the Mail R. Richard Geddes, Rick Geddes, 2003 A comprehensive overview of the U S Postal Service its organization and its performance since its creation by the 1970 Postal Reorganization Act *Multi-Modal Competition and the Future of Mail* Michael A. Crew, Paul R. Kleindorfer, 2012 This compilation of original papers selected from the 19th Conference on Postal and Delivery Economics and authored by an international cast of economists lawyers regulators and industry practitioners addresses perhaps the major problem that has ever faced the postal sector electronic competition from information and communication technologies ICT This has increased significantly over the last few years with a consequent serious drop in mail volume All postal services have been hard hit by ICT but probably the hardest hit is the United States Postal Service which has lost almost a quarter of its mail volume since 2007 The loss of mail volume has a devastating effect on scale economies which now work against post offices forcing up their unit costs Strategies to stem the loss in volume include non linear pricing or volume discounts increased efficiency and the development of new products This loss of mail volume from ICT is one of a number of current problems addressed in this volume The Universal Service Obligation USO continues to be a leading issue and concern that ICT undermines postal services ability to finance the USO is discussed The importance of measuring and forecasting demand and costs take on even greater importance as ICT undermines the foundations of the postal business This thought provoking book brings to bear new analyses of the most serious threat post offices have ever faced and raises fundamental questions as to the future of mail *Multi Modal Competition and the Future of Mail* is an ideal resource for students researchers in regulation and competition law postal administrations policy makers consulting firms and regulatory bodies *Postal and Delivery Services* Michael A. Crew, Paul R. Kleindorfer, 2013-12-01 When Postmaster General Creswell penned his concern about the impact of electronic diversion on his postal organization the year was 1872 General Creswell it turned out fretted unnecessarily Facsimile did not achieve commercial viability until roughly a century after his tenure as Postmaster General and today that technology is fading rapidly from the communication scene Moreover it never appears to have significantly affected physical letter volumes However if General Creswell were leading a major postal organization today he likely would feel threatened by the potential of Internet communication to cause electronic diversion of physical mail Should recent technology developments cause the oft predicted but so far incorrect inflection point that would mark the beginning of declining mail volumes the implications from a management standpoint will be profound The relatively fixed nature of postal costs suggest that volume declines must be offset though improved productivity reduced cost of inputs revenue from new products that share common costs or reduced level of universal service

Saving the Royal Mail's universal postal service in the digital age Richard Hooper, Great Britain Department for Business, Innovation and Skills, 2010-09-10 The Coalition Government asked Richard Hooper to update the 2008 report *Modernise or decline* policies to maintain the universal postal service in the United Kingdom Cm 7529 2008 ISBN

9780101752923 He finds the universal postal service still under serious threat with most of the original causes for concern having got worse the market and Royal Mail's market share continue to decline the company has still not modernised sufficiently the accounting pension deficit has grown from 2.9bn to 8.0bn the current regulatory regime is not fit for purpose The 2008 recommendation that private sector capital is required by Royal Mail is reiterated for several reasons The company is unlikely to generate sufficient cash to finance the modernisation required Private sector capital will inject private sector disciplines and reduce the risk of political intervention in commercial decisions And the state of the public finances means that Royal Mail will find it harder to compete for Government capital against other public spending priorities But private capital will not be attracted without action on the pension deficit and the regulatory regime The historic pension deficit should be taken over by the public purse A new regulatory framework must be created that increases certainty for investors in the postal services sector in general and in Royal Mail in particular Postcomm has recently consulted on a new framework and this should be built upon This update sets out the high level principles that should guide regulation ensuring the overall burden is reduced

The Postal and Delivery Contribution in Hard Times Pier Luigi Parcu, Timothy J. Brennan, Victor Glass, 2023-03-10 This book includes original essays by prominent researchers and practitioners in the field of postal and delivery economics originally presented at the 29th Conference on Postal and Delivery Economics held online September 1-3 2021 The central focus of the book is the short and long term impact of covid 19 pandemic on the sectors both from the economic and regulatory perspectives Other important topics include the unstoppable growth of e commerce and the implications for delivery market solutions for the last mile and the associated challenges in terms of sustainability Chapters also discuss traditional topics for postal and delivery sectors such as the competitive dynamics in the sector the business strategies of postal operators as well as the definition and funding of the Universal Service Obligation This book will be a

useful tool not only for graduate students and professors interested in postal and regulatory economics but also for postal administrations consulting firms and federal government departments *Federal Register*, 1976-08 *The Official History of Privatisation, Vol. II* David Parker, 2013-06-19 This is Volume II of Professor Parker's authoritative Official History of Privatisation covering the period from the re-election of Margaret Thatcher in 1987 to the election of Tony Blair in 1997. Volume II considers in detail several of the major privatisations including those of airports steel water electricity coal and the railways as well as a number of smaller ones. Each privatisation involved major challenges in terms of industrial restructuring organising successful sales and in a number of cases establishing effective regulatory regimes. The policy evolved and new methods of selling and regulating were put in place that enabled further disposals to occur. Monolithic nationalised industries with their emphasis on the benefits of economies of scale vertical integration and rationalisation were replaced by industrial structures rooted in the importance of commercial management risk taking and competition. In government departments and parts of the National Health Service direct employees were replaced by private contractors and private investment became a characteristic of public infrastructure in the form of PFI PPP schemes. This study draws heavily on the official records of the British government to which the author was given full access and on interviews with the leading figures involved in each of the privatisations including ex ministers civil servants business and City figures as well as academics that have studied the subject. This book will be of great interest to students of privatisation British political history and of business and economics in general.

The Politics of Plunder Doug Bandow, 1990-01-01 This slashing critique charges that the federal government and interest groups have badly mismanaged the political process for private ends. Transcending conventional ideologies Bandow sees the root of the problem as our failure to honor the Founding Fathers' intention to establish a limited government with severely circumscribed powers in all areas. People abuse power it is human nature. Only limited state authority will keep the political process from disintegrating into petty fighting among factions each competing for its own limited self interest. The demise of the original restraints has created an overgrown federal government that is ever more wasteful inefficient and unjust. Doug Bandow spares no sacred cows. He considers state interference in the free market responsible for an ethic of legalized theft which allows interest groups to use the state to enrich themselves through subsidies competitive restrictions and other protectionist measures. He sees a judiciary that has aided the other branches of government in manipulating human conduct and restricting personal freedom for both liberal and conservative reasons. And in foreign policy he sees the development of an interventionist consensus whereby Washington attempts to remake foreign nations in its image through military intervention and foreign aid with disastrous results. *The Politics of Plunder* is written by an insider who combines theoretical and analytical skill with practical political experience. Bandow served in the most conservative administration of recent years yet freely criticizes the nostrums of the Right. He is an evangelical Christian yet dislikes the tactics of the Religious Right. His unique background campaign worker lawyer presidential aide magazine editor policy analyst and

journalist enables him to go far beyond the usual Washington commentary Bandow's objective is to develop a new political perspective that transcends both conservative and liberal boundaries and emphasizes individual liberty skepticism of state power and tolerance of others Those interested in the world of ideas will find this an accessible practical guide to libertarian thought Those interested in the world of public policy will find here a detailed discussion of scores of recent controversies
