Producción de cine digital

Arnau Quiles, Isidre Monreal, 2017-12-09

El cine digital supone una experiencia visual totalmente distinta a la que estamos habituados. Aunque los elementos propios del género la construcción visual de los cuadros, la secuenciación de la narrativa, el montaje, la interpretación, la escritura del guion, el estilo de realización no hayan variado mucho desde sus inicios, la evolución técnica ha supuesto una nueva manera de crear y disfrutar del cine. La posibilidad de filmar, grabar, procesar, transformar, almacenar, distribuir, presentar y compartir la información mediante medios y a través de redes digitales de forma efectiva con una calidad incomparable y unas limitaciones cada vez menores se ha convertido en el argumento definitivo para la adopción del medio al entorno cinematográfico.
