MY CONVERSATIONS
WITH CHIMPANZEES

*"Engrossing...alternately
hilarious and heartbreaking."*

—San Francisco Chronicle

*"Language did not descend from the
gods. It emerged from our animal
ancestors. We can talk with the animals—
or at least with our ape siblings. I was
sure of that. I was talking with Nimbo."*

The Quest for Symbolic Communication in Non-Human Animals Ulrike Griebel,D. Kimbrough Oller ,Irene M. Pepperberg,2024-06-13 Human language is unique among animals We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and or degrees in other animals demonstrating social communication This assumption is supported by the fact that we can train social species from very different groups of animals e g great apes dolphins dogs parrots to understand and in several cases even use abstract symbols for communication with humans and conspecifics Even simple grammatical rules for sequences of 2 3 symbols can be trained to be understood by several species e g great apes dogs dolphins Even though human language training in these species takes considerable time and effort it convinces us that cognitive foundations for language are present in other species and given the relevant selection pressures symbolic communication could evolve in other species

Children, Deafness, and Deaf Cultures in Popular Media John Stephens,Vivian Yenika-Agbaw,2022-12-28 Contributions by Cynthia Neese Bailes Nina Batt Lijun Bi H l ne Charderon Stuart Ching Helene Ehriander Xiangshu Fang Sara Kersten Parish Helen Kilpatrick Jessica Kirkness Sung Ae Lee Jann Pataray Ching Angela Schill Josh Simpson John Stephens Corinne Walsh Nerida Wayland and Vivian Yenika Agbaw Children Deafness and Deaf Cultures in Popular Media examines how creative works have depicted what it means to be a deaf or hard of hearing child in the modern world In this collection of critical essays scholars discuss works that cover wide ranging subjects and themes growing up deaf in a hearing world stigmas associated with deafness rival modes of communication friendship and discrimination intergenerational tensions between hearing and nonhearing family members and the complications of establishing self identity in increasingly complex societies Contributors explore most of the major genres of children s literature and film including realistic fiction particularly young adult novels as well as works that make deft use of humor and parody Further scholars consider the expressive power of multimodal forms such as graphic novel and film to depict experience from the perspective of children Representation of the point of view of child characters is central to this body of work and to the intersections of deafness with discourses of diversity and social justice The child point of view supports a subtle advocacy of a wider understanding of the multiple ways of being D deaf and the capacity of D deaf children to give meaning to their unique experiences especially as they find themselves moving between hearing and Deaf communities These essays will alert scholars of children s literature as well as the reading public to the many representations of deafness that like deafness itself pervade all cultures and are not limited to specific racial or sociocultural groups

The Origins of Self Martin P. J. Edwardes,2019-07-22 The Origins of Self explores the role that selfhood plays in defining human society and each human individual in that society It considers the genetic and cultural origins of self the role that self plays in socialisation and language and the types of self we generate in our individual

journeys to and through adulthood Edwardes argues that other awareness is a relatively early evolutionary development present throughout the primate clade and perhaps beyond but self awareness is a product of the sharing of social models something only humans appear to do The self of which we are aware is not something innate within us it is a model of our self produced as a response to the models of us offered to us by other people Edwardes proposes that human construction of selfhood involves seven different types of self All but one of them are internally generated models and the only non model the actual self is completely hidden from conscious awareness We rely on others to tell us about our self and even to let us know we are a self

Animal Friendships Anne Innis Dagg,2011-09-01 Research into social behaviour in animals has often focused on aggression yet members of social species are far more likely to interact with each other in a positive way Animal Friendships explores non sexual bonding behaviours in a range of mammalian and avian species Through analysis of factors which trigger and deepen friendships Dagg uncovers a world of intricate and complex social interactions These factors include sources of food formation of coalitions playdates for infants mutual grooming and the apparent pleasure of simple companionship Chapters cover different types of friendship from those between two individuals such as male female or parent offspring friendships to those within family groups and even inter species friendships Not only does the book explore how and why friendships form it also showcases the ingenious field techniques used by researchers enabling the reader to understand the scientific methodology An invaluable read for both researchers and students studying animal social bonding

How To Speak Dog Stanley Coren,2012-12-11 Communication is crucial in any relationship especially when one of you happens to be a dog Drawing on substantial research in animal behaviour Stanley Coren demonstrates that the average house dog can distinguish at least 140 words and can interact at a level approaching that of a human two year old While actual conversation of the sort Lassie seemed capable of in Hollywood myth making remains in the realm of fantasy this book shows us that a great deal of real communication is possible between humans and dogs beyond the simple giving and obeying of commands How to Speak Dog not only explains the sounds words actions and movements which will help owners to communicate most effectively with their dogs it also deciphers the signs and signals our dogs are giving to us With easy to follow tips on how humans can mimic the language dogs use to talk to one another original drawings illustrating the subtleties of canine body language and a handy visual glossary How to Speak Dog gives dog lovers a whole new range of essential skills with which to improve their relationship with their dogs

Primateology, Ethics and Trauma Robert Ingersoll,Antonina Anna Scarnà,2023-02-23 Primateology Ethics and Trauma offers an analytical re examination of the research conducted into the linguistic abilities of the Oklahoma chimpanzees uncovering the historical reality of the research It has been 50 years since the first language experiments on chimpanzees Robert Ingersoll was one of the researchers from 1975 to 1983 He is well known for being one of the main carers and best friend of the chimpanzee Nim Chimpsky but there were other chimpanzees in the University of Oklahoma s Institute for Primate Studies including Washoe Moja Kelly Booe and Onan who were taught

sign language in the quest to discover whether language is learned or innate in humans Antonina Anna Scarn's expertise in language acquisition and neuroscience offers a vehicle for critical evaluation of those studies Ingersoll and Scarn investigate how this research failed to address the emotional needs of the animals Research into trauma has made scientific advances since those studies It is time to consider the research from a different perspective examining the neglect and cruelty that was inflicted on those animals in the name of psychological science This book re-examines those cases addressing directly the suffering and traumatic experiences endured by the captive chimpanzees in particular the female chimpanzee Washoe and her resultant inability to be a competent mother This book discusses the unethical nature of the studies in the context of recent research on trauma and offers a specific and direct psychological message proposing to finally close the door on the language side of these chimpanzee studies This book is a novel and groundbreaking account It will be of interest to lay readers and academics alike Those working as research experimental and clinical psychologists will find this book of interest as will psychotherapists linguists anthropologists historians of science and primatologists as well as those involved in primate sanctuary and conservation

Other Animals in Twenty-First Century Fiction Catherine Parry, 2017-07-19 This book is about ordinary animals and how they are imagined in twenty-first century fiction Examining contemporary animal representations and the fraught and potent distinctions humans fashion between themselves and all other animals it asks how a range of novels make re-make or un-make traditional conceptions of the creatures we love admire eat vilify and abuse Other Animals detailed readings of horses an animalised human a donkey ants chickens and chimpanzees develop new critical practices in Literary Animal Studies They explore the connections between fictional animal representation narrative form ethics and the lives and warm bodies of the real world creatures that precede and exceed our imagination Human animal relationships are conditioned by our imaginative shapings of other animals and by our sense of distinction from them and Other Animals opens out how fictional animal forms and tropes respond to participate in or challenge the ways animals lives are lived out in consequence of human imaginings of them

New Frontiers in Social Neuroscience Jean Decety, Yves Christen, 2013-12-11 Traditionally neuroscience has considered the nervous system as an isolated entity and largely ignored influences of the social environments in which humans and many animal species live However there is mounting evidence that the social environment affects behavior across species from microbes to humans This volume brings together scholars who work with animal and human models of social behavior to discuss the challenges and opportunities in this interdisciplinary academic field

The Origins of Grammar Martin Edwards, 2010-07-22 Quintessential work on the nature and origins of language grammar and its role in language and our own evolution as humans

The Routledge International Handbook of Early Childhood Play Tina Bruce, Pentti Hakkarainen, Milda Bredikyte, 2017-06-14 Historical changes in play are taking place in childhood all over the world with the digitalisation of children's lives Researchers are worried about the disappearance of advanced forms of play and the prioritization of time spent with loving adults supporting

play with babies and toddlers At the same time our understanding about the crucial importance of individual development is becoming clearer The Routledge International Handbook of Early Childhood Play explores these issues and more It proposes the importance of adult participation in play as adult guidance brings the possibility of moral cultural and symbolic elements to children s play and enhances the educational opportunities in adult child joint play The book also examines the aesthetic dimension of play and its role in the development of imagination and creativity With contributors from many parts of the world this unique handbook brings together the latest research and highlights practice which focuses on play This is an essential and engaging read for all students academics teachers and practitioners with an interest in play
