Psychoanalytische Schriften Zur Psychoso:

Psychosomatic Disorders in General Practice Boris Luban-Plozza, Walter Pöldinger, Friedebert Kröger, 2012-12-06 Closely geared to general practice yet without neglecting basic theory this book has retained so much appeal among readers as to warrant a third edition We assume that the work has retained its place among the leading publications on psychosomatics because it embodies our strong interest in the here and now of medical practice The timing of this thoroughly revised and enlarged edition appears opportune as psychosomatic basic care and the medicine of dialogue acquire more meaning in daily routine practice and as the need for basic information increases We conceive psychosomatics to be an integral part of medicine When we speak of psychosomatic disorders in this book our premise is that somatic and psychosocial aspects play an important role in their pathogenesis and course This notion constitutes the very basis of what is understood as psychosomatic medical treatment Such a point of departure calls for a consistent spirit of cooperation with regard to the problems involved This alone satisfies the initial requirement of simultaneously considering both the somatic and psychosocial aspects of health and illness Chicago Psychoanalytic Literature Index, 1920-1970 Institute for Psychoanalysis, 1971 **Chicago Psychoanalytic Literature Index**, 1981 Index of NLM Serial Titles National Library of Medicine (U.S.), 1981 A keyword listing of serial titles currently received by the National Library of Medicine

The History of Cancer and Emotions in Twentieth-Century Germany Bettina Hitzer, 2022-06-02 Different people feel different emotions when they are diagnosed with cancer Both today and a century ago fear and hope shame and disgust sadness and joy are and were the emotions experienced by many cancer patients and their loved ones But these emotions do not just have significance for the people who feel them They have also exerted a surprisingly profound influence on how hospitals and laboratories dealt with cancer how early detection campaigns portrayed it and how doctors talked about it with their patients Bettina Hitzer details the history of cancer and emotions in twentieth century Germany and thus follows the cancer associated transformations of emotional regimes emotional politics and emotional experiences through five different political systems In doing so the study underscores that political caesuras resonate in the immediate corporeality of the history of emotions

The Evolution of Psychoanalytic Technique Martin S. Bergmann, Frank R. Hartman, 1990 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Toyko District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen

To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

Laocoon's Body and the Aesthetics of Pain Simon Richter, 1992 Before the sixteenth century no one had seen the Greek statue the Laocoon since antiquity but popular aesthetic judgment insisted that it was an ideal work of art the unapproachable model for imitation and aspiration When in 1506 a vintner found the statue just outside Rome the contradiction between the ideal and the reality was readily apparent the statue depicted not a vision of beauty but the representation of a body in pain Since the eighteenth century the Laocoon has been at the crux of German aesthetics *Laocoon's Body and the Aesthetics of Pain* examines the writings of Winckelmann Lessing Herder Moritz and Goethe and seeks to discover what drew these theorists of classical beauty to the statue's representation of pain The book examines the contradictions in and between their respective understandings of the Laocoon Taking his cue from the original texts Richter sets the primary aesthetic discourse against the foil of the unexpected discourse networks His reading of Winckelmann unfolds against the eighteenth century culture of castrati He shows Herder and Goethe winning important insights from the physiological experiments of Albrecht von Haller In every case the fundamental dichotomy of pain and beauty is shown to lie at the heart of both the statue and the discourse that concerns it Richter argues that the relation of pain and beauty is crucial to the various versions of classical aesthetics that were developed in the last half of the eighteenth century According to the author there is no question that the Laocoon statue represents a body in pain Nor is there any reason to decide if the Laocoon is a beautiful work of art The single important fact is that eighteenth century Germans since Winckelmann theorized the statue as beautiful and in the course of their thinking were obliged to deal with the question of pain in one way or another even if by some strategy of avoidance Richter's thesis is that the classical aesthetics of beauty is at the same time and even more an aesthetics of pain Simon Richter is an assistant professor of German at the University of Maryland at College Park A Ph D from the John Hopkins University his articles reviews and translations have appeared in such journals as *The Lessing Yearbook* *South Atlantic Review* *Germanic Review* and *SubStance* [The Psychological Register](#) Carl Allanmore Murchison, 1932
