

The Learner-Centered Psychological Principles

COGNITIVE AND METACOGNITIVE FACTORS

Principle 1: Nature of the learning process

The learning of complex subject matter is most effective when it is an intentional process of constructing meaning from information and experience.

Principle 2: Goals of the learning process

The successful learner, over time and with support and instructional guidance, can create meaningful, coherent representations of knowledge.

Principle 3: Construction of knowledge

The successful learner can link new information with existing knowledge in meaningful ways.

Principle 4: Strategic thinking

The successful learner can create and use a repertoire of thinking and reasoning strategies to achieve complex learning goals.

Principle 5: Thinking about thinking

Higher-order strategies for selecting and monitoring mental operations facilitate creative and critical thinking.

Principle 6: Context of learning

Learning is influenced by environmental factors, including culture, technology, and instructional practices.

MOTIVATIONAL AND AFFECTIVE FACTORS

Principle 7: Motivational and emotional influences on learning

What and how much is learned is influenced by the learner's motivation. Motivation to learn, in turn, is influenced by the individual's emotional states, beliefs, interests and goals, and habits of thinking.

Principle 8: Intrinsic motivation to learn

The learner's creativity, higher-order thinking, and natural curiosity all contribute to motivation to learn.

Intrinsic motivation is stimulated by tasks of optimal novelty and difficulty, relevant to personal interests, and providing for personal choice and control.

Principle 9: Effects of motivation on effort

Acquisition of complex knowledge and skills requires extended learner effort and guided practice. Without learners' motivation to learn, the willingness to exert this effort is unlikely without coercion.

DEVELOPMENTAL AND SOCIAL FACTORS

Principle 10: Developmental influence on learning

As individuals develop, they encounter different opportunities and experience different constraints for learning. Learning is most effective when differential development within and across physical, intellectual, emotional, and social domains is taken into account.

Principle 11: Social influences on learning

Learning is influenced by social interactions, interpersonal relations, and communication with others.

INDIVIDUAL DIFFERENCES FACTORS

Principle 12: Individual differences in learning

Learners' different strategies, approaches, and capabilities for learning are a function of prior experience and heredity.

Principle 13: Learning and diversity

Learning is most effective when differences in learners' linguistic, cultural, and social backgrounds are taken into account.

Principle 14: Standards and assessment

Setting appropriately high and challenging standards and assessing the learner and learning progress—including diagnostic, process, and outcome assessment—are integral parts of the learning process.

Psychology Psychological Principles

James Ward

Psychology Psychological Principles:

Psychological Principles James Ward, 1918 Just forty years ago that is in 1878 when I began lecturing on Psychology the plan of this book was laid down As the lectures proceeded abstracts of some of them were privately printed for discussion at a Moral Sciences Club in which some other Cambridge books also took their rise The first two of these abstracts written in 1880 were afterwards reproduced without revision in the American Journal of Speculative Philosophy for 1882 1883 one corresponding to the present chapter II and the other entitled Objects and their Interaction to parts of the present chapters IV VII A third on Space and Time written in 1881 was rejected by the late G Croom Robertson the editor of Mind as too difficult and revolutionary for publication as it stood But afterwards he accepted and published what were to have been the two opening chapters of a book bearing the same title as this Other chapters were to follow but circumstances diverted them elsewhere I have done my best in the text and still more in notes to place a studious reader au courant with the psychological literature of the present day But there is a psychology which arrogates to itself the title of new New it undoubtedly is and there are signs that in its present form it will not long survive In any case it is not psychology save in so far as it occasionally furnishes the psychologist with material of some value As a method in the hands of psychologists it has done some good as a pretended science in the hands of tyros whose psychological training has not even begun it has done infinite harm This book however is not so antiquated as to ignore altogether the character and claims of this modern psychology as the reader may see Preface PsycINFO Database Record c 2010 APA all rights reserved

Psychology James Ward, 1977 Psychological Principles James Ward, 1920 *The Principles of Psychology* William James, 1890 *The Psychological Principles of Education* Herman Harrell Horne, 1906 Psychological Principles James Ward, 1919 Psychological Principles. I. The Standpoint of Psychology James Ward, University of St. Andrews. Library. Von Hügel Collection, 1902 Psychological Principles James Ward, 2015-06-25 Excerpt from Psychological Principles There are certain obvious defects in this book due to the circumstances of its composition The author trusts that a brief account of those circumstances may therefore be at least condoned Just forty years ago that is in 1878 when I began lecturing on Psychology the plan of the book was laid down As the lectures proceeded abstracts of some of them were privately printed for discussion at a Moral Sciences Club in which some other Cambridge books also took their rise The first two of these abstracts written in 1880 were afterwards reproduced without revision in the American Journal of Speculative Philosophy for 1882 3 one corresponding to the present chapter ii and the other entitled Objects and their Interaction to parts of the present chapters iv vii A third on Space and Time written in 1881 was rejected by the late G Croom Robertson the editor of Mind as too difficult and revolutionary for publication as it stood But afterwards he accepted and published what were to have been the two opening chapters of a book bearing the same title as this Other chapters were to follow but circumstances diverted them elsewhere In 1884 Croom Robertson who had engaged some years previously to write the article Psychology for the ninth edition of the Encyclopaedia Britannica was

prevented by failing health from proceeding further with it Professor Sully who was next appealed to having declined the task the editor of the Encyclopaedia at that time T Spencer Baynes chancing to have made my acquaintance offered it to me I rashly sacrificed my book to the offer and so as it has turned out destroyed one of the dreams of my life About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Psychological Principles of Education Herman Harrell Horne, 2015-07-03 Excerpt from The Psychological Principles of Education A Study in the Science of Education Progress in every art dates from the application of science Chemistry widens industry physics perfects means of communication bacteriology advances medicine sociology humanizes jurisprudence economics elevates business scholarship revivifies Biblical truth The old professions of law theology and medicine grounded themselves in science during the mediaeval period Business and teaching though arts as old as man have not yet struck into the sure path of science There are many indications however that these arts also are now in the act of transition from the empirical to the scientific The period of transition has already lasted a generation it is likely to last several more This volume attempts to lay scientific foundations for the art of teaching so far as those foundations are concerned with psychology Though the art of education is founded in all the sciences of man probably no science has quite so much to contribute as psychology The wonderful progress in all departments of psychology during recent years makes an outline map of consciousness now possible About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Principles Of Psychology (Volume I) William James, 2023-04 William James's book The Principles of Psychology is one of the most important works in the field of psychology The book is split into two parts the first part is about the study of the human mind and the second part is about how psychological principles can be used to solve real world problems In this volume James uses both scientific research and philosophical inquiry to give a full analysis of human consciousness perception memory emotion and will He says that the mind is a dynamic system that is always changing and is shaped by both inside and outside factors The book's groundbreaking ideas and ways of looking at the mind had a huge impact on the way psychology is studied today James is often

credited with starting the field of psychology in the United States and his work still has an impact on how psychology is studied and used today Overall The Principles of Psychology is one of the most important books in the history of psychology It is a fascinating and insightful look at the complicated human mind **Psychological Principles and the Black**

Experience Lawrence N. Houston,1990 This book demonstrates how the basic body of knowledge in psychology can be applied to the experiences and behavior of blacks as differentiated from those of whites The author begins with a brief description of African culture discusses the slave trade and presents a sketch of the initial experiences of other ethnic groups in the United States Following a discussion of black psychology and black psychologists the author analyzes and relates specifically to the black experience such precepts as learning theories perception intelligence frustration adjustment and personality Includes discussion on criminal behavior substance abuse suicide and mental illness from a black perspective The author concludes with an exploration of the factors that must be considered if psychological intervention with black patients and clients is to be effective Contents A Brief Look at the Past Black Psychology and Black Psychologists Learning and Conditioning Perception and Consciousness Black Intellectual Ability Frustration and Adjustment Personality Socially Deviant and Socially Destructive Behavior Mental Disorders and Helping Troubled Blacks ty Frustration and Adjustment Personality Socially Deviant and Socially Destructive Behavior Mental Disorders and Helping Troubled Blacks ty Frustration and Adjustment Personality Socially Deviant and Socially Destructive Behavior Mental Disorders and Helping Troubled Blacks ty Frustration and Adjustment Personality Socially Deviant and Socially Destructive Behavior Mental Disorders and Helping Troubled Blacks ty Frustration and Adjustment Personality Socially Deviant and Socially Destructive Behavior Mental Disorders and Helping Troubled Blacks *The Psychological Principles of Education* Herman Harrell Horne,1920 *Psychological Principles*

Appropriate to Social and Clinical Problems John C.
