Psychotherapy And The Religiously Committed Patient:

Psychotherapy Relationships that Work : Therapist Contributions and Responsiveness to Patients John C. Norcross
University of Scranton, 2002-08-22 This book is the result of the American Psychological Association's Division of
Psychotherapy Div 29 Task Force aimed at applying psychological science to the identification and promulgation of effective
psychotherapy Many efforts to improve therapy have focused on codifying evidence based treatments but in doing so have
left the psychotherapeutic relationship behind Clinical experience and research findings underscore that the therapeutic
relationship accounts for as much of the outcome as particular treatments This volume's 25 chapters identify the elements of
effective therapy relationships and methods of customizing psychotherapy to each patient *Religious Objects as
Psychological Structures* Moshe Halevi Spero, 1992-06-15 The second aspect of his argument is that these two distinct but
parallel lines allow one to conceptualize the revolutionary possibility of transference displacements the shift of religious
symbolism not only from interpersonal relationships onto the God concept Freud's model but also from an objective human
God relationship onto interpersonal relationships Counseling and Psychotherapy With Religious Persons Stevan L.
Nielsen, W. Brad Johnson, Albert Ellis, 2001-05-01 Practitioners are increasingly aware that religious persons present unique

treatment outcome studies A uniquely belief focused therapy REBT is usually quite appealing to clients from Christian Jewish
Muslim Hindu and other religious traditions who respond favorably to REBT's focus on right belief active engagement in the
work of therapy and reading practice focused homework In this practical and user friendly guide the authors outline the
congruence between the therapeutic approach of REBT and the presenting problems and concerns of religious persons They
describe an approach to reconciling the sacred traditions and beliefs of religious clients with the no nonsense techniques of
REBT They review the essential components of practice with religious clients including assessment diagnosis and problem
formulation disputation of irrational beliefs and other REBT techniques highlight the primary obstacles facing the therapist
when treating religious clients and offer many case examples from work with this important client population Mental health
professionals from all backgrounds will benefit from the detailed yet manual focused approach to helping religious clients
