Rothenbacher,2016-04-30 This is the third volume of three on demographics All major fields of demographic change are covered Population figures are given for each population census by sex civil status and age Major demographic developments within the family are described providing a commentary on the main population structures and trends **Statistical**

Sources for Social Research on Western Europe 1945-1995 Franz Rothenbacher,2013-11-11 The intention of this book is to give a picture of the complex material that has been published in the field of social and econornic statistics in Western Europe Although there are many guides bibliographies and reference books on special topics of this broad theme a general overview has been missing With this book I hope to fill this gap The frame of reference is a scientific one enabling and facilitating comparative social research on Western Europe In some respect this book enlarges and updates the bibliography written by Peter Flora Quantitative Historical Sociology pub lished in Current Sociology in 1975 In principle this guide is an annotated bibli ography of the most important printed material in the field of official statistics The legitimacy of such an approach lies in the fact that even today printed statistics are the most important form of dissemination of statistical results although microcom puters CD ROMs and the Internet have changed this situation In any case a spe cial section on statistical databases is included for every country describing the main databases of the statistical offices Furthermore the Internet address of each international or national statistical institute is provided in the introductory para graph This enables the reader to get fast access to online databases and supple mentary online information on statistics via the Internet

Population Ageing and Its Challenges to Social Policy R. Schoenmaeckers,Irena Kotowska,Council of Europe. Directorate General III--Social Cohesion,2005-01-01 This publication examines the demographic challenges posed by population ageing trends and the policy implications in relation to health employment public expenditure and social relationships It contains two reports prepared for the European Population Conference held in Strasbourg in April 2005 *Community-based Entrepreneurship and Rural Development* Matthias Fink,Stephan Loidl,Richard Lang,2012 How can municipalities in Central Europe create favourable conditions for local business What and how can municipalities learn from each other How can each individuals in the local area contribute And what requirements have to be met before know how can successfully be transferred on a communal level To answer all these questions the authors of this book comprehensively discuss the manifold opportunities restrictions and prerequisites of establishing favourable conditions for small and medium enterprises in rural

Once, Only Once, and in the Right Place National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on Residence Rules in the Decennial Census,2006-11-16 The usefulness of the U S decennial census depends critically on the accuracy with which individual people are counted in specific housing

units at precise geographic locations The 2000 and other recent censuses have relied on a set of residence rules to craft instructions on the census questionnaire in order to guide respondents to identify their correct usual residence Determining the proper place to count such groups as college students prisoners and military personnel has always been complicated and controversial major societal trends such as placement of children in shared custody arrangements and the prevalence of snowbird and sunbird populations who regularly move to favorable climates further make it difficult to specify ties to one household and one place Once Only Once and in the Right Place reviews the evolution of current residence rules and the way residence concepts are presented to respondents It proposes major changes to the basic approach of collecting residence information and suggests a program of research to improve the 2010 and future censuses *Advances in Cross-National Comparison* Jürgen H.P. Hoffmeyer-Zlotnik, Christof Wolf, 2011-06-28 The book consists of five parts and a concluding chapter Part 1 covers general problems and presents solutions for the harmonisation of data from different national and or cultural contexts In the second part EUROSTAT and ESOMAR present their established standard instruments Tested instruments each covering one variable i e occupation education are presented in the third part The fourth part again includes suggested tools for the harmonisation of single variables for which standardised instruments are not yet available i e age religion ethnicity household family income The last part presents selected empirical analyses demonstrating the use and fruitfulness of instruments presented before This book is mainly written for two groups First researchers and practitioners involved in comparative research in Europe Second researchers working with data of the statistical offices of European countries and data from institutions of the European Union *Statistical Journal of the United Nations Economic Commission for Europe*, 2005 *Policy Implications of Changing Family Formation* Linda Hantrais, Dimităr Filipov, Francesco C. Billari, 2006-01-01 Modern European societies are witnessing a number of key changes in family structures such as postponed parenthood low fertility single parenting and increased divorce rates As a consequence of the radical changes taking place in our societies family policies often result in a complex set of targeted and sometimes contradictory measures and forms of public intervention The three authors of this volume review the major demographic challenges posed by changing patterns in family and family formation and strive to identify possible policy responses by governments They stress the need for all levels of government and the private sector to adopt an integrated and balanced approach to policy in order to create cohesive and family friendly societies This volume is a thematic compilation of the background papers on the policy implications of changing family formations prepared for the European Population Conference Strasbourg 7 8 April 2005 *Family Policy Matters* Linda Hantrais, 2004-04-21 This book explores the complex relationship between family change and public policy responses in EU member states and candidate countries It combines broad brush scrutiny of demographic trends policy contexts and debates in contemporary European societies with a fine grain analysis of the attitudes perceptions and experiences of families THESIM Michel Poulain, Nicolas Perrin, Ann Singleton, 2006 Gives the background of the THESIM

International Encyclopedia of Housing and Home ,2012-10-09 Available online via SciVerse ScienceDirect or in print for a limited time only The International Encyclopedia of Housing and Home Seven Volume Set is the first international reference work for housing scholars and professionals that uses studies in economics and finance psychology social policy sociology anthropology geography architecture law and other disciplines to create an international portrait of housing in all its facets from meanings of home at the microscale to impacts on macro economy This comprehensive work is edited by distinguished housing expert Susan J Smith together with Marja Elsinga Ong

Seow Eng Lorna Fox O Mahony and Susan Wachter and a multi disciplinary editorial team of 20 world class scholars in all Working at the cutting edge of their subject liaising with an expert editorial advisory board and engaging with policy makers and professionals the editors have worked for almost five years to secure the quality reach relevance and coherence of this work A broad and inclusive table of contents signals or testifies to detailed investigation of historical and theoretical material as well as in depth analysis of current issues This seven volume set contains over 500 entries listed alphabetically but grouped into seven thematic sections including methods and approaches economics and finance environments home and homelessness institutions policy and welfare and well being Housing professionals both academics and practitioners will find The International Encyclopedia of Housing and Home useful for teaching discovery and research needs International in scope engaging with trends in every world region The editorial board and contributors are drawn from a wide constituency collating expertise from academics policy makers professionals and practitioners and from every key center for housing research Every entry stands alone on its merits and is accessed alphabetically yet each is fully cross referenced and attached to one of seven thematic categories whose wholes far exceed the sum of their parts *Civic Resources and the Future of the European Union* Ireneusz Paweł Karolewski, Victoria Kaina, 2012 This book shines new light on the political system of the European Union EU by focusing on civic resources as a keystone of the EU's ability to sustain Less tangible resources such as trust solidarity mutual recognition and citizens social and political participation have been until now largely ignored in the research on European integration Due to the fundamental changes to the EU in recent years and the challenges ahead European citizens have become increasingly critical of a long lasting unification process in Europe This volume theoretically and empirically examines how the European citizens themselves may contribute to the long term effectiveness legitimacy and endurance of the EU This book aims to examine the issues associated with the utilization of civic resources by the EU and the ability of European citizens to develop transnational civic resources Expert contributors in the field develop a framework to understand and explore the potential of citizens in the uncertain future of the EU *Civic Resources and the Future of the European Union* will be of interest to students and scholars of European Politics and European Union Studies *Social Policy in the European Union, Third Edition* Linda Hantrais, 2017-09-16 Taking account of the debates about adapting the Union's institutional structures to accommodate different welfare arrangements and the need for more open forms of European governance the third edition of this well received book offers a compact clear and authoritative account of 50 years of social policy formation and implementation across the EU *Statistical Demography and Forecasting* Juha Alho, Bruce Spencer, 2006-05-27 Sustainability of pension systems intergeneration fiscal equity under population aging and accounting for health care benefits for future retirees are examples of problems that cannot be solved without understanding the nature of population forecasts and their uncertainty Similarly the accuracy of population estimates directly affects both the distributions of formula based government allocations to sub national units and the apportionment of political representation

The book develops the statistical foundation for addressing such issues. Areas covered include classical mathematical demography, event history methods, multi-state methods, stochastic population forecasting, sampling and census coverage, and decision theory. The methods are illustrated with empirical applications from Europe and the U.S. For statisticians, the book provides a unique introduction to demographic problems in a familiar language. For demographers, actuaries, epidemiologists, and professionals in related fields, the book presents a unified statistical outlook on both classical methods of demography and recent developments. To facilitate its classroom use, exercises are included. Over half of the book is readily accessible to undergraduates, but more maturity may be required to benefit fully from the complete text. Knowledge of differential and integral calculus, matrix algebra, basic probability theory, and regression analysis is assumed. Juha M. Alho is Professor of Statistics, University of Joensuu, Finland, and Bruce D. Spencer is Professor of Statistics and Faculty Fellow at the Institute for Policy Research, Northwestern University. Both have contributed extensively to statistical demography and served in advisory roles and as statistical consultants in the field.

Health Promotion Jackie Green, Keith Tones, 2010-02-15 Beginning with a critical appraisal of the concept itself, the second edition of *Health Promotion: Planning and Strategies* outlines models for defining health promotion and sets out the factors involved in planning health promotion programmes that work. Locating the principles and strategies of health promotion within an emerging sphere of multidisciplinary health, the authors show how these can be applied within a range of contexts and settings. In an attempt to bridge the gap that persists between ideological perspectives and practical implementations, they delve beyond the rhetoric of empowerment and show how it can be incorporated into practice. Focusing particularly on the synergistic relationship between policy and education, the book reappraises the notion of health education, an idea which has become marginalised in recent years, and shows the fundamental importance of education in creating individual choice and generating effective advocacy for social change. The question of evidence is central to the text, and the book examines methods of evaluation and the role it plays in creating more effective health promotion programmes. The new edition offers coverage of values and ethics, working with communities, the settings approach, and social marketing. It also provides students with a glossary of key terms. Internationally relevant and multidisciplinary, this is an essential text for students of health studies, health promotion, public health, interprofessional social care courses, and all healthcare professionals.

Register-based Statistics Anders Wallgren, Britt Wallgren, 2007-05-21 There is a growing interest in developing register-based surveys that use surveys based upon already available administrative data. Since huge amounts of such data are generated within various administrative systems, the opportunity exists to use the data for statistical analysis without any of the costs involved in data collection. Register-based surveys require their own methodology, and the development of these methods is an important challenge to statistical science. Instead of methods on how to collect data, methods for integrating data from different sources are necessary. How should administrative data be transformed to meet the statistical needs? *Register-based Statistics* offers readers a detailed account of the principles and

practices of this increasingly popular area of statistics Provides a comprehensive overview of register based statistics both in terms of theory and advanced application Uses real life examples taken from Statistics Sweden to illustrate fundamental global principles Proposes a much needed systematic terminology for the field Describes how to create statistical registers and a methodology for integration of data from many sources as a key tool for the future Develops estimation methods and quality concepts for register based surveys Discusses statistical systems consisting of many statistical registers and surveys highlighting the importance of consistency and coherence Register based Statistics provides a unique guide for all those working in statistical agencies It will also prove invaluable for academic researchers and teachers in statistics and statisticians working with administrative systems in government institutions and enterprises International Mobility of the Highly Skilled OECD,2001-12-11 These conference proceedings provide data on the scale and characteristics of flows and stocks of skilled and highly skilled foreign workers assess the quality of the data available and the concepts used and discuss how to improve their comparability
