Reconstructing Babylon Women And Technology:

The Self Wired Lisa Yaszek, 2013-12-16 First Published in 2002 Advanced technologies challenge conventional understandings of the human subject by transforming the body into a conduit between external forces and the internal psyche This title discusses the intense controversy about how to best understand and represent human subjectivity in a technology intensive era Yaszek provides an overview by linking specific modes of identity and agency to engagement with specific manifestations of technology itself

Bodies of Technology Ann Rudinow Saetnan, Nelly Oudshoorn, Marta Stefania Maria Kirejczyk, 2000 This work is based on a concern for women's health and autonomy and on the premise that technology and society mutually shape one another A basic question is one of cultural appropriation Do technologies take on different shapes different practices and have different impacts as they spread from one place to another By juxtaposing a number of culturally and historically contextualized studies of similar technologies the editors demonstrate that although technologies globalize by spreading among cultures they are also localized by the cultures they encounter

Current Catalog National Library of Medicine (U.S.), 1992 First multi year cumulation covers six years 1965-70

The Practice of Technology Alan Drengson, 1995-10-12 The Practice of Technology explores the narrative themes of modern industrial technology that reveal the underlying agenda of modern culture which is to redesign the human and natural worlds to conform to the monoculture models of Western society that are embedded in industrial paradigms and practices The author argues that ecological and social responsibility should be built into the design of new technology practices based on ecosophy ecological wisdom that enable us to harmonize with our specific place and ecological context Root metaphors and mythologies of the West are examined so as to transcend the modern postmodernist debate that devalues human life and the natural world Drengson explains how our current problems such as the environmental crisis violence social injustice dehumanization and alienation cannot be diagnosed let alone cured without understanding the role of technological forces and activities in modern civilization

Hermaphrodites and the Medical Invention of Sex Alice Domurat Dreger, 2009-07-01 Punctuated with remarkable case studies this book explores extraordinary encounters between hermaphrodites people born with ambiguous sexual anatomy and the medical and scientific professionals who grappled with them Alice Dreger focuses on events in France and Britain in the late nineteenth century a moment of great tension for questions of sex roles While feminists homosexuals and anthropological explorers openly questioned the natures and purposes of the two sexes anatomical hermaphrodites suggested a deeper question just how many human sexes are there Ultimately hermaphrodites led doctors and scientists to another surprisingly difficult question what is sex really Hermaphrodites and the Medical Invention of Sex takes us inside the doctors chambers to see how and why medical and scientific men constructed sex gender and sexuality as they did and especially how the material conformation of hermaphroditic bodies when combined with social exigencies forced peculiar constructions Throughout the book Dreger indicates how this history can help us to understand

present day conceptualizations of sex gender and sexuality This leads to an epilogue where the author discusses and questions the protocols employed today in the treatment of intersexuals people born hermaphroditic Given the history she has recounted should these protocols be reconsidered and revised A meticulously researched account of a fascinating problem in the history of medicine this book will compel the attention of historians physicians medical ethicists intersexuals themselves and anyone interested in the meanings and foundations of sexual identity *Angels of Power* Susan

Hawthorne, Renate Klein, 1991 The first collection of drama short fiction and poetry on reproductive technology IVF genetic engineering and surrogate motherhood *Feminist Political Ecology* Dianne Rocheleau, Barbara Thomas-Slayter, Esther Wangari, 2013-04-15 Feminist Political Ecology explores the gendered relations of ecologies economies and politics in communities as diverse as the rubber tappers in the rainforests of Brazil to activist groups fighting racism in New York City Women are often at the centre of these struggles struggles which concern local knowledge everyday practice rights to resources sustainable development environmental quality and social justice The book bridges the gap between the academic and rural orientation of political ecology and the largely activist and urban focus of environmental justice movements

The Gender and Science Reader Muriel Lederman, Ingrid Bartsch, 2001 The Gender and Science Reader brings together key articles in a comprehensive investigation of the nature and practice of science [The Earthscan Action Handbook for People and Planet](#) Miles Litvinoff, 2013-11-05 We have poisoned the air and water on which our lives depend Poor countries exhaust their land in the struggle to survive while rich countries demand more and more The Earthscan Action Handbook spells out why things have gone so terribly wrong and what each of us can do to clean up the mess Each chapter deals with one of the major problems people and the planet now face meeting the human needs of health education and social justice as well as the environmental needs of our dying lakes and forests polluted seas threatened habitats and endangered species Packed with suggestions for positive action this book also gives details of who to contact what to read and where to go if you want to do more Whether you care about buying safe food or feeding the world The Earthscan Action Handbook is indispensable Originally published in 1990 *Disciplining Reproduction* Adele E. Clarke, 2024-03-29

Reproductive issues from sex and contraception to abortion and cloning have been controversial for centuries and scientists who attempted to turn the study of reproduction into a discipline faced an uphill struggle Adele Clarke's engrossing story of the search for reproductive knowledge across the twentieth century is colorful and fraught with conflict Modern scientific study of reproduction human and animal began in the United States in an overlapping triad of fields biology medicine and agriculture Clarke traces the complicated paths through which physiological approaches to reproduction led to endocrinological approaches creating along the way new technoscientific products from contraceptives to hormone therapies to new modes of assisted conception for both humans and animals She focuses on the changing relations and often uneasy collaborations among scientists and the key social worlds most interested in their work major philanthropists and a wide

array of feminist and medical birth control and eugenics advocates and recounts vividly how the reproductive sciences slowly acquired standing By the 1960s reproduction was disciplined and the young and contested scientific enterprise proved remarkably successful at attracting private funding and support But the controversies continue as women the targeted consumers create their own reproductive agendas around the world Elucidating the deep cultural tensions that have permeated reproductive topics historically and in the present *Disciplining Reproduction* gets to the heart of the twentieth century's drive to rationalize reproduction human and nonhuman in order to control life itself This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1998

The Rites of Men Varda Burstyn, 1999-01-01 It gathers more spectators on a global basis than any other activity today More than just a game sport has profound political and social consequences promoting a super aggressive ideal of manhood and political culture Privilege and Prejudice Karen Weekes, 2020-10-27 *Privilege and Prejudice* Twenty Years with the Invisible Knapsack explores various areas of contemporary American culture where sexism and racism still leave an indelible print In 1988 Peggy McIntosh published her groundbreaking essay *White Privilege and Male Privilege* an examination of white privilege and its role in perpetuating racism Twenty years later these seven essays reveal problems that persist even in systems that are ostensibly trying to address problems of inequality Beginning with a foreword by McIntosh on our society's resistance to confronting privilege this text then delves into a variety of fields In the first section on higher education Simona Hill Lucien Winegar Juanita Johnson Bailey and Ronald Cervero contribute two essays examining racism in the academy while Donna Axel explores the stigma in law school alternative application processes The next section interrogates privilege and its effects on females' choices with Kyla Bender Baird questioning global contraception policies and Mary Carney giving a historical overview to contextualize persistent gender inequities in computer technology Media studies and stereotypes are considered in the final section in which Janice Stapley analyzes children's birthday cards for gender bias and Ellen Miller critiques male dance films This text would be useful for social science and humanities scholars of all types with its explorations of the continuing ramifications of race gender class and their intersections **Conceiving the Embryo** Donald Evans, Neil Pickering, 2023-08-28 This volume of essays together with its companion *Creating the Child* The Ethics Law and Practice of Assisted Procreation Martinus Nijhoff The Hague 1996 ISBN 90 411 0207 8 is the result of a concerted action in the BIOMED programme of the European Commission which was coordinated by the Editor Clinicians lawyers and philosophers explore the theoretical and practical problems presented by the new technologies in assisted human reproduction in Eastern Central and Western Europe The central question of the status of the human embryo is examined in the light of recent biological discoveries and cultural and legal dissonance within and between the various countries in

Europe **Feminist Visions of Development** Cecile Jackson, Ruth Pearson, 2005-07-27 Key issues in gender studies and development today are explored in detail from rural and urban poverty to population and family planning resulting from the 1995 UN Conference on Women

Full Surrogacy Now Sophie Lewis, 2019-05-07 Where pregnancy is concerned let every pregnancy be for everyone Let us overthrow in short the family The surrogacy industry is estimated to be worth over 1 billion a year and many of its surrogates around the world work in terrible conditions deception wage stealing and money skimming are rife adequate medical care is horrifyingly absent and informed consent is depressingly rare In *Full Surrogacy Now* Sophie Lewis brings a fresh and unique perspective to the topic Often we think of surrogacy as the problem but *Full Surrogacy Now* argues we need more surrogacy not less Rather than looking at surrogacy through a legal lens Lewis argues that the needs and protection of surrogates should be put front and center Their relationship to the babies they gestate must be rethought as part of a move to recognize that reproduction is productive work Only then can we begin to break down our assumptions that children belong to those whose genetics they share Taking collective responsibility for children would radically transform our notions of kinship helping us to see that it always takes a village to make a baby

Women as Wombs Janice G. Raymond, 1995 Annotation Renowned scholar and feminist activist Janice Raymond delivers a passionate expose and uncovers the alarming ethical legal and political implications of high tech biomedical reproductive technologies She argues that these technologies are neither liberatory nor an issue of reproductive choice Rather they violate the integrity of women's bodies perpetuate prostitution and an international trafficking in women and children and are a threat to women's basic human rights *Women As Wombs* is a scathing feminist analysis which contributes groundbreaking insights to the raging debate over reproductive technology

Hazards Vulnerability and Environmental Justice Susan L. Cutter, 2012-05-04 From Hurricane Katrina and the south Asian tsunami to human induced atrocities terrorist attacks and the looming effects of climate change the world is assailed by both natural and unnatural hazards and disasters These expose not only human vulnerability particularly that of the poorest who are least able to respond and adapt but also the profound worldwide environmental injustices that result from the geographical distribution of risks hazards and disasters This collection of essays from one of the most renowned and experienced experts provides a timely assessment of these critical themes Presenting the top selections from Susan L Cutter's thirty years of scholarship on hazards vulnerability and environmental justice the volume tackles issues such as nuclear and toxic hazards risk assessment communication and planning and societal responses Cutter maps out the terrain and draws out the salient themes with a fresh powerful introduction written in the wake of her work in the aftermath of Katrina This essential collection is ideal for professionals researchers academics and students working on hazards risk disasters and environmental justice across a range of disciplines

Technology Assessment Janine Morgall, 2010-05-05 How gender analysis should inform technology assessment

Feminist Debates Valerie Bryson, 1999-05-21 Are women still oppressed Is paid employment the key to liberation Should pornography be banned Do

women have an absolute right to abortion Can women in government really make a difference This book draws on a wide range of theoretical empirical and comparative material to provide a lucid account of feminist debates and the ways in which political disagreements stem from underlying theoretical assumptions Clear and balanced in its assessment of different problems and perspectives it offers an essential guide to contemporary feminist thinking and practice **Knowledge as Resistance** Stevienna de Saille, 2017-11-27 This book presents a historicised account of the Feminist International Network of Resistance to Reproductive and Genetic Engineering FINRRAGE a coordinated effort during the 1980s and 1990s by an international group of women to create and disseminate feminist knowledge about the then new field of reproductive technologies Bringing insights from science and technology studies together with social movements and feminist theory it seeks to examine larger questions about knowledge and expertise in activist engagements with rapidly developing technologies as well as explore an important and neglected episode of feminist history Its findings will be relevant to scholars in science studies gender and women s studies and social movements as well as to anyone with an interest in reproductive technologies and the history of feminist activism
