Lianeri,2016-03-07 From the early modern period Greek historiography has been studied in the context of Cicero s notion *historia magistra vitae* and considered to exclude conceptions of the future as different from the present and past Comparisons with the Roman Judeo Christian and modern historiography have sought to justify this perspective by drawing on a category of the future as a temporal mode that breaks with the present In this volume distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in Greek historiography from Herodotus to Appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity They look both at contemporary scholarly argument and the writings of Greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion By reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time **Good Practice Guide** Mark Kemp,2022-10-01 Architecture can be a high risk and low income

The Emergence of Cinematic Time Mary Ann Doane,2002-12-27 Hailed as the permanent record of fleeting moments the cinema emerged at the turn of the nineteenth century as an unprecedented means of capturing time and this at a moment when disciplines from physics to philosophy and historical trends from industrialization to the expansion of capitalism were transforming the very idea of time In a work that itself captures and reconfigures the passing moments of art history and philosophy Mary Ann Doane shows how the cinema representing the singular instant of chance and ephemerality in the face of the increasing rationalization and standardization of the day participated in the structuring of time and contingency in capitalist modernity At this book s heart is the cinema s essential paradox temporal continuity conveyed through stopped time the rapid succession of still frames or frozen images Doane explores the role of this paradox and of notions of the temporal indeterminacy and instability of an image in shaping not just cinematic time but also modern ideas about continuity and discontinuity archivability contingency and determinism and temporal irreversibility A compelling meditation on the status of cinematic knowledge her book is also an inquiry into the very heart and soul of modernity
