## **Recovery And Management Of Neuropsychological Impairments:**

**Recovery and Management of Neuropsychological Impairments** Edgar Miller,1995      *Recovery and Management of Neuropsychological Impairments* Edgar Miller,1984      *Neurobehavioral Recovery from Head Injury* Harvey S. Levin,1987

This volume will repay the reader with a greatly enhanced understanding of the challenge facing head injured patients when they try to return to society **The Lancet**      **Brain Injury and Recovery** C. Robert Almli, Stanley Finger, T.E. LeVere, Donald G. Stein, 2012-12-06 The idea for the present volume grew from discussions that the four of us had among ourselves and with our colleagues at recent scientific meetings All of us were impressed by the wealth of empirical data that was being generated by investigators interested in brain damage and recovery from both behavioral and biological orientations Nevertheless we were concerned about the relative paucity of attempts to evaluate the data provided by new technologies in more than a narrow context or to present new theories or reexamine time honored ideas in the light of new findings We recognized that science is guided by new technologies by hard data and by theories and ideas Yet we were forced to conclude that although investigators were often anxious to publicize new methods and empirical findings the same could not be said about broad hypotheses underlying concepts or inferences and speculations that extended beyond the empirical data Not only were many scientists not formally discussing the broad implications of their data but when stimulating ideas were presented they were more likely to be heard in the halls or over a meal than in organized sessions at scientific meetings

*Handbook of Head Trauma* Charles J. Long, Leslie K. Ross, 2013-06-29 Providing a thorough collection of information regarding clinical aspects of head injury from acute care to recovery this treatise interrelates a variety of neural specialties and broadens the rehabilitation process to include the family      **Communication Disorders Following Traumatic Brain Injury** Skye McDonald, Chris Code, Leanne Togher, 2016-05-06 There are very few books available which are concerned with the unique communication problems that can come with traumatic brain injury TBI In recent years there has emerged a realisation that these difficulties in communication are closely tied to the cognitive behavioural and social problems observed following traumatic brain injury This is changing the way people with TBI are assessed and is generating new approaches to rehabilitation This volume will be of interest to psychologists speech pathologists and therapists and linguists Clinicians and researchers working with people with traumatic brain injury and their students will find it a comprehensive source of contemporary approaches to characterising the communication problems of people with TBI and for planning rehabilitation

Developmental-Behavioral Disorders Marvin I. Gottlieb, John E. Williams, 2013-11-11 We are most pleased to present Volume 3 of *Developmental Behavioral Disorders Selected Topics* designed to serve as a companion for standard reference textbooks that address cogent issues in developmental pediatrics Periodic publications such as *Selected Topics* and theme related articles as well as continuing education programs attempt to supplement in a timely fashion the rapidly changing knowledge base in developmental behavioral pediatrics These media are important as forums for enhancing the quality of

clinical practice teaching skills and research activities The need is critical for periodically disseminating and updating information about issues in developmental medicine in as much as this field of study continues to expand at a meteoric pace During the past several decades developmental medicine has been recognized as a defined subspecialty in pediatrics The spectrum of problems encompassed by this discipline is relatively broad and at times clinically overwhelming The ultimate goal of preventing delays disorders and or dysfunctions from becoming chronic handicapping conditions has by volume per se created clinical dilemmas for pediatric health care providers There are numerous facets of providing efficient and effective care which in the field of developmental behavioral pediatrics are often exaggerated impediments to the delivery of services by primary health care specialists e g time clinical skills need for interdisciplinary management medical legal responsibilities financial reimbursements These issues as well as clinical problems are still very much part of the information base to be disseminated to concerned professionals

#### **Cognitive Retraining Using Microcomputers**

Veronica A. Bradley, John L. Welch, Clive E. Skilbeck, 1993 The last decade has seen considerable development in the field of neuropsychological rehabilitation following brain damage and the use of computerized methods has attracted attention and stimulated controversy This practically oriented text reviews representative examples from the literature relating to the training of cognitive systems with the emphasis on studies describing the use of computerized methods The topic is discussed in context and the contents include sections on cognitive change in neurological disorders assessment techniques the interaction between cognition and behaviour and the advantages and disadvantages of the use of microcomputers The authors describe the evaluation of a computerized cognitive retraining programme run at the Regional Neurological Centre in Newcastle upon Tyne and draw on their experience of running such programmes to give practical guidance to those wishing to set up cognitive retraining programmes
