main controversial practices regarding principles In addition a section is devoted to an analysis of the particular relationship between the European Union and these principles given the EU s unique role as an important evolution in international law as both a subject and treaty maker Further the EU provides an example of the institutionalisation of the international community and helps to solidify the concept The book is chiefly intended for experts on International Law Its purpose is to offer an updated vision of the international community through analysis of the core principles of international law highlighting contradictions and problems regarding its application and interpretation The book should also be of great interest and value to those starting careers in international law offering them key insights into the international community and the roots of the international system European Union Maritime Safety Policy and International Law Henrik Ringbom, 2008 This book offers a comprehensive international law analysis of the European Uniona TM's maritime safety legislation This is a relatively novel field of activity of the EU but its development has been very rapid Since 1993 over 40 acts of EU law have been adopted dealing with a variety of subjects such as port State control classification societies vessel traffic management ship construction environmental protection and pollution sanctions This legislation is analysed from the point of international law notably the law of the sea and the international maritime conventions Regional legislation in a field that is traditionally regulated primarily by means of international conventions is bound to create tensions with the related international conventions and with well established principles of international law This study assesses how the EU has acted as a flag State port State and coastal State and measures the trends in this development against the international legal framework More detailed legal analyses are offered for specific aspects of EU legislation that are considered to be particularly interesting from an international law point of view The relationship between EU law and international law within the internal EU legal system is also analysed from the specific perspective of maritime safety law **Private International** Law Franco Ferrari, Diego P. Fernández Arroyo, 2019-12-27 Is Private International Law PIL still fit to serve its function in today's global environment In light of some calls for radical changes to its very foundations this timely book investigates the ability of PIL to handle contemporary and international problems and inspires genuine debate on the future of the field

Self-Determination and Secession in International Law Christian Walter, Antje von Ungern-Sternberg, Kavus Abushov, 2014-06-05 Peoples and minorities in many parts of the world assert a right to self determination autonomy and even secession from a state which naturally conflicts with that state s sovereignty and territorial integrity. The right of a people to self determination and secession has existed as a concept within international law since the American Declaration of Independence in 1776 but the exact definition of these concepts and the conditions required for their application remain unclear. The Advisory Opinion of the International Court of Justice concerning the Declaration of Independency of Kosovo 2010 which held that the Kosovo declaration of independence was not in violation of international law has only led to further questions. This book takes four conflicts in the post Soviet Commonwealth of Independent States CIS as a starting point for

examining the current state of the law of self determination and secession Four entities Transnistria Moldova South Ossetia Abkhazia both Georgia and Nagorno Karabakh Azerbaijan claim to be entitled not only to self determination but also to secession from their mother state For this entitlement they rely on historic affiliations and on charges of discrimination and massive human rights violations committed by their mother state This book sets out its analysis of these critical issue in three parts providing a detailed understanding of the principles of international law on which they rely The first part sets out the contours and meaning of self determination and secession including an overall assessment of secession within the Commonwealth of Independent States The second section provides case studies investigating the events in Transnistria South Ossetia Abkhazia and Nagorno Karabach in greater detail The third and final section extends the scope of the examination providing a comparative analysis of similar conflicts involving questions of self determination and secession in Kosovo Western Sahara and Eritrea Recueil Des Cours/Collected Courses, Volume 285 (2000) Academie de Droit International de la Haye, 2001-08-01 The Academy is an institution for the study and teaching of public and private international law and related subjects Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law The courses deal with the theoretical and practical aspects of the subject including legislation and case law All courses at the Academy are in principle published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law This volume contains International Law and International Relations by A M SLAUGHTER Director Graduate and International Legal Studies Harvard Law School L Etat insulaire by L LUCCHINI Professeur a l Institut oceanographique de Paris To access the abstract texts for this volume please click here Integrating Human Rights into Development Cooperation: The Case of the Lomé Convention Karin Arts, 2021-08-04 Human rights democracy and governance concerns are prominent elements in the development cooperation policy of the European Community The relations between the European Community EC and 71 developing countries in Africa the Caribbean and Pacific ACP have proved to be a laboratory for developing ideas on these matters for translating them into binding treaty norms and for applying them in practice The experiences gained in the ACP EC relationship carry special value because they are the product of dialogue and joint decision making between groups of developed and developing states Therefore 25 years of ACP EC cooperation under the Lom Convention provide a rich learning ground for anybody involved or interested in the debate on linking development cooperation to human rights and to human rights related concerns This book explores the international law aspects of the subject It first investigates the general international legal basis for linking development cooperation to human rights democracy and good governance Both the negative and positive ways of making such a linking by punitive and supportive measures are addressed The book then delves into the evolution of Lom treaty norms on the subject and into the concrete human rights practices that took shape under them It explores the contributions to and influence of both the EC and ACP states on those treaty provisions and practices A

comprehensive overview is provided of the support measures and sanctions resorted to in response to the human rights situation in ACP countries The book assesses the overall experiences gained and presents a synthesis of factors that proved to be constraints or conducive to the efforts to integrate human rights fully into ACP EC development cooperation The insights gained could well inform similar efforts undertaken by others European Legal Book Index ,2001 Climate Agreement: A Deal for Better Compliance?
