Red Canary The Story Of The First Genetically Engineered Animal:

The Red Canary Tim Birkhead, 2014-05-06 First published in Great Britain by Weidenfeld Nicholson in 2003 T p verso

The Red Canary Tim Birkhead, 2014-01-30 The creation of Dolly the sheep in the 1990s was for many people the start of a new era the age of genetically modified animals However the idea was not new for in the 1920s an amateur scientist Hans Duncker decided to genetically engineer a red canary Though his experiments failed they paved the way for others to succeed when it was recognised that the canary needed to be both a product of nature and nurture This highly original narrative of huge contemporary relevance reveals how the obsession with turning the wild canary from green to red heralded the exciting but controversial developments in genetic manipulation

The Canary Goncalo C. Cardoso, Ricardo Jorge Lopes, Paulo Gama Mota, 2023-11-26 The Canary Natural History Science and Cultural Significance covers the ecology evolution and conservation of the canary and related species along with the history and cultural significance of the domestic canary worldwide and various scientific disciplines in which canaries have played a key role as a model species The book synthesizes the multiple ways in which the canary and its relatives have been and continue to be an important scientific model in diverse areas and have influenced human culture Each chapter is written by international experts in areas such as biogeography animal behavior evolutionary ecology conservation neurobiology genetics or ethnology In covering this eclectic array of topics while always focusing on the canary and its close relatives this book uses the immense appeal of the canary as a vehicle to present notions of ecology evolution biodiversity conservation and so on to a wide audience Details all aspects of Crithagra and Serinus canaries as well as relatives like crossbills Structured to begin with more accessible topics like natural history domestication and conservation Closes with discussions of more specialized topics like evolution neurobiology behavior and genomics

Bird Sense Tim Birkhead, 2012-04-24 What is it like to be a swift flying at over one hundred kilometres an hour Or a kiwi plodding flightlessly among the humid undergrowth in the pitch dark of a New Zealand night And what is going on inside the head of a nightingale as it sings and how does its brain improvise Bird Sense addresses questions like these and many more by describing the senses of birds that enable them to interpret their environment and to interact with each other Our affinity for birds is often said to be the result of shared senses vision and hearing but how exactly do their senses compare with our own And what about a bird's sense of taste or smell or touch or the ability to detect the earth's magnetic field Or the extraordinary ability of desert birds to detect rain hundreds of kilometres away how do they do it Bird Sense is based on a conviction that we have consistently underestimated what goes on in a bird's head Our understanding of bird behaviour is simultaneously informed and constrained by the way we watch and study them By drawing attention to the way these frameworks both facilitate and inhibit discovery Birkhead identifies ways we can escape from them to explore new horizons in bird behaviour There has never been a popular book about the senses of birds No one has previously looked at how birds interpret the world or the way the behaviour of birds is shaped by all their senses A

lifetime spent studying birds has provided Tim Birkhead with a wealth of observation and a unique understanding of birds and their behaviour that is firmly grounded in science

The Process of Animal Domestication Marcelo

Sánchez-Villagra,2022-01-18 The first modern scholarly synthesis of animal domestication Across the globe and at different times in the past millennia the evolutionary history of domesticated animals has been greatly affected by the myriad complex and diverse interactions humans have had with the animals closest to them The Process of Animal Domestication presents a broad synthesis of this subject from the rich biology behind the initial stages of domestication to how the creation of breeds reflects cultural and societal transformations that have impacted the biosphere Marcelo S nchez Villagra draws from a wide range of fields including evolutionary biology zooarchaeology ethnology genetics developmental biology and evolutionary morphology to provide a fresh perspective to this classic topic Relying on various conceptual and technical tools he examines the natural history of phenotypes and their developmental origins He presents case studies involving mammals birds fish and insect species and he highlights the importance of domestication for the comprehension of evolution anatomy ontogeny and dozens of fundamental biological processes Bringing together the most current developments The Process of Animal Domestication will interest a wide range of readers from evolutionary biologists developmental biologists and geneticists to anthropologists and archaeologists

Unnatural Selection Katrina van Grouw,2018-07-31

A lavishly illustrated look at how evolution plays out in selective breeding Unnatural Selection is a stunningly illustrated book about selective breeding the ongoing transformation of animals at the hand of man More important it s a book about selective breeding on a far far grander scale a scale that encompasses all life on Earth We d call it evolution A unique fusion of art science and history this book celebrates the 150th anniversary of Charles Darwin s monumental work The Variation of Animals and Plants under Domestication and is intended as a tribute to what Darwin might have achieved had he possessed that elusive missing piece to the evolutionary puzzle the knowledge of how individual traits are passed from one generation to the next With the benefit of a century and a half of hindsight Katrina van Grouw explains evolution by building on the analogy that Darwin himself used comparing the selective breeding process with natural selection in the wild and like Darwin featuring a multitude of fascinating examples This is more than just a book about pets and livestock however The revelation of Unnatural Selection is that identical traits can occur in all animals wild and domesticated and both are governed by the same evolutionary principles As van Grouw shows animals are plastic things constantly changing In wild animals the changes are usually too slow to see species appear to stay the same When it comes to domesticated animals however change happens fast making them the perfect model of evolution in action Suitable for the lay reader and student as well as the more seasoned biologist and featuring more than four hundred breathtaking illustrations of living animals skeletons and historical specimens Unnatural Selection will be enjoyed by anyone with an interest in natural history and the history of evolutionary thinking

Birds in Roman Life and Myth Ashleigh Green,2023-03-03 This book explores the place of birds in Roman myth and

everyday life focusing primarily on the transitional period of 100 BCE to 100 CE within the Italian peninsula A diverse range of topics is considered in order to build a broad overview of the subject Beginning with an appraisal of omens augury and auspices including the sacred chickens consulted by generals before battle it goes on to examine how Romans farmed birds hunted them and kept them as pets It demonstrates how the ownership and consumption of birds were used to communicate status and prestige and how bird consumption mirrored wider economic and social trends Each topic adopts an interdisciplinary approach considering literary evidence alongside art material culture zooarchaeology and modern ornithological knowledge The inclusion of zooarchaeology adds another dimension to the work and highlights the value of using animals and faunal remains to interpret the past Studying the Roman view of birds offers great insight into how they conceived of their relationship with the gods and how they stratified and organised their society This book is a valuable resource for bird lovers and researchers alike particularly those studying animals in the ancient world **Passions for**

Birds Sean Nixon, 2022-05-15 Whether as sources of joy and pleasure to be fed counted and watched as objects of sport to be hunted and killed or as food to be harvested wild birds evoke strong feelings Sean Nixon traces the transformation of these human passions for wild birds from the early twentieth century through the 1970s detailing humans close encounters with wild birds in Britain and the wider North Atlantic world Drawing on a rich range of written sources *Passions for Birds* reveals how emotional subjective and material attachments to wild birds were forged through a period of pronounced social and cultural change Nixon demonstrates how for all their differences new traditions in birdwatching and conservation field sports and bird harvesting mobilized remarkably similar feelings towards birds Striking similarities also emerged in the material forms that each of these practices used to bring birds closer to people hides and traps nets and ropes and binoculars Wide ranging in scope *Passions for Birds* sheds new light on the ways in which wild birds helped shape humans throughout the twentieth century as well as how birds themselves became burdened with multiple cultural meanings and social anxieties over time **Birdsong, Speech and Poetry** Francesca Mackenney, 2022-09-22 Illuminating the poetry of birdsong in the Romantic and Victorian periods this timely study dissects historical attitudes to nonhuman life **Bird Coloration** Geoffrey E. Hill, Kevin J. McGraw, 2006-02-28 How birds produce the brilliant and striking coloration of their feathers and other body parts is the focus of this volume Hill and McGraw have assembled the world's leading experts in perception measurement and control of bird coloration to contribute to this book which synthesizes more than 1 500 technical papers in this field

Ten Thousand Birds Tim Birkhead, Jo Wimpenny, Bob Montgomerie, 2014-02-16 A beautifully illustrated history of modern ornithology *Ten Thousand Birds* provides a thoroughly engaging and authoritative history of modern ornithology tracing how the study of birds has been shaped by a succession of visionary and often controversial personalities and by the unique social and scientific contexts in which these extraordinary individuals worked This beautifully illustrated book opens in the middle of the nineteenth century when ornithology was a museum based discipline focused almost exclusively on the anatomy

taxonomy and classification of dead birds It describes how in the early 1900s pioneering individuals such as Erwin Stresemann Ernst Mayr and Julian Huxley recognized the importance of studying live birds in the field and how this shift thrust ornithology into the mainstream of the biological sciences The book tells the stories of eccentrics like Colonel Richard Meinertzhagen a pathological liar who stole specimens from museums and quite likely murdered his wife and describes the breathtaking insights and discoveries of ambitious and influential figures such as David Lack Niko Tinbergen Robert MacArthur and others who through their studies of birds transformed entire fields of biology Ten Thousand Birds brings this history vividly to life through the work and achievements of those who advanced the field Drawing on a wealth of archival material and in depth interviews this fascinating book reveals how research on birds has contributed more to our understanding of animal biology than the study of just about any other group of organisms

Goldfish Anna Marie Roos, 2019-09-15 Living work of art consumer commodity scientific hero and environmental menace the humble goldfish is the ultimate human cultural artifact A creature of supposedly little memory and a short lifespan it has held universal appeal as a reservoir for human ideas and ideals In ancient China goldfish were saved from predators in acts of religious reverence and selectively bred for their glittering grace In the East they became the subject of exquisite art regarded as living flowers that moved while in the West they became ubiquitous residents of the Victorian parlor Cheap and eminently available today they are bred by the millions for the growing domestic pet market while also proving to be important to laboratory studies of perception vision and intelligence In this illuminating homage to the goldfish Anna Marie Roos blends art and science to trace the surprising and intriguing history of this much loved animal challenging our cultural preconceptions of a creature often thought to be common and disposable

Winged Worlds Olga Petri, Michael Guida, 2023-06-26 This edited collection explores our often surprising modes of co inhabiting the cultural and aerial worlds of birds It focuses on our encounters with non captive birds and the cultural geographies of feathered flight This book offers a timely contribution to the more than human geographies of flight space and territory The chapters support an ethics of attention as a new basis for the conservation and cultivation of aerial habitats Contributions adopt an interdisciplinary approach to the patterns of intrusion and escape that shape our encounters with birds and unsettle our traditionally terrestrial concepts of space Each chapter focuses on a different aspect of our shared lives with birds ranging from scientific observation to the social media enabled spectacle of co habitation and spatial competition Written in a thought provoking style this book seeks to address a dearth of critical perspectives on the cultural geographies of flight and its implications for the ways in which we understand common spaces around and above us in the context of any effort at conservation

Charles Darwin's Life with Birds Clifford B. Frith, 2016 Focuses exclusively on Darwin the ornithologist not on biographical aspects of Darwin's life

Behind More Binoculars Keith Betton, Dr. Mark Avery, 2017-11-06 How and why did our most acclaimed birdwatchers take up birding What were their early experiences of nature How have their professional birding careers developed What motivates them and

drives their passion for wildlife How many birds have they seen Keith Betton and Mark Avery passionate birdwatchers and conservationists interview members of the birdwatching community to answer these and many other questions about the lives of famous birdwatchers Following on from the success of their 2015 book *Behind the Binoculars* Keith and Mark are back again taking you behind the scenes and behind the binoculars of a diverse range of birding and wildlife personalities *Behind More Binoculars* includes interviews with Frank Gardner Ann and Tim Cleeves Roy Dennis Kevin Parr Tony Marr Tim Appleton Tim Birkhead Dawn Balmer Jon Hornbuckle Tony Juniper Richard Porter Bryan Bland Carol and Tim Inskipp Barbara Young Bill Oddie

Cayley & Son Penny Olsen, 2013 The classic field guide *What Bird Is That* has been known to bird enthusiasts throughout Australia for decades ever since it was first published in 1931 It was written and illustrated by Neville William Cayley 1886 1950 son of artist Neville Henry Cayley 1854 1903 who before him had also had dreams of publishing a big bird book a comprehensive publication on Australian birds but it never came to fruition Cayley and Son charts the lives and works of this Australian father and son pair of bird artists *New Statesman*, 2003

The Development of Evolutionary Genetics Prakash Gorroochurn, 2024-12-28 The book describes the historical development of evolutionary genetics starting from early ideas on evolution and ending with the modern synthesis It provides an extensive coverage of the history of both evolution and heredity and gives detailed descriptions of the works of Lamarck Darwin Mendel Nageli Weismann de Vries Galton Pearson Bateson Johannsen Morgan Fisher Wright and Haldane amongst many others The book does not deal only with a description of historical work it also analyses and critiques existing theories and evolutionary beliefs throughout history and discusses several controversies between biologists *New Scientist and Science Journal*, 2004 *New Scientist*, 2004
