Watson, Susan M Watson, Calland Carnes, Brian Larson, 2020-01-09 Since Admiral Sergei G Gorshkov was appointed to the office of commander in chief of the Soviet Navy in 1956 the Soviet Union has made a massive investment in naval construction training and operations As a result the Soviet Navy has grown from a coastal defense force to one of the world's two strongest navies This book offers a detailed assessment of every major aspect of the Soviet Navy from fleet structure and training facilities to command and control procedures and warfare and intelligence collection capabilities *Tomcats and Eagles* Tal Tovy, 2022-11-15 During the first half of the 1970s two new fighter aircraft entered operational service in the United States The Navy's Grumman F 14 Tomcat and the Air Force's McDonnell Douglas F 15 Eagle These two aircraft were part of the backbone of the tactical air power of the United States their introduction was accompanied by comprehensive reforms in pilot training as well as new technologies and weapon systems In addition to the tactical significance of the two aircraft as innovative fighting platforms however their development and deployment should be viewed within a broad geopolitical and geostrategic context Tovy explains how the F 14 Tomcat and the F 15 Eagle were an integral part of the aerial component of the conventional arms race within the Cold War He argues that the trend of Soviet advanced weapon systems development created a perception of threat to the United States challenging its conventional military power Tomcats and Eagles explores how the Vietnam War accelerated the need for advanced fighter interceptors and that the lessons learned from aerial combat in Vietnam had a significant impact on the design and operational characteristics of the F 15 The author reveals that after F 14s were sold to Iran and F 15s to Israel in the second half of the

1970s these jets were integrated into their armed forces leading to Israel's use of the F 15 during the First Lebanese War Finally the author provides an in depth look at the operation of the F 14 and F 15 in U S actions in Southeast Asia beginning with the Tanker Wars in the mid 1980s through Operation Desert Storm and Operation Enduring Freedom and ending with Operation Iraqi Freedom Gorbachev's Glasnost Oliver Trager,1989 A collection of newspaper editorials and cartoons on the subject of the Gorbachev government and the General Secretary's style of leadership known as glasnost *Air University Review* ,1982-07 **Aces at Kursk** Christopher A Lawrence,2024-07-25 The Battle of Kursk in July 1943 is known for being the largest tank battle in history A Russian victory it marked the decisive end of the German offensive capability on the Eastern Front and set the scene for the Soviet successes that followed While many have focused on the tank engagements especially the Battle of Prokhorovka there was an intense air battle going on overhead that was bigger than the Battle of Britain As part of the German offensive the Luftwaffe's VIII Air Corps deployed around 1 100 aircraft in the south alone while the opposing Soviet Second and Seventeenth air armies initially deployed over 1 600 aircraft There was a similar effort surrounding the German attack in the north The battle in the south began with a Soviet air strike on German airfields and a fight for control of the air that continued throughout the day across the front On the first day of the battle 5 July 1943 the Germans flew at least 2 387 sorties in the south while the two Soviet air armies flew 1 688 sorties That first day of battle resulted in 19 to 27 German planes and 189 Soviet aircraft shot down This was an aerial engagement like no other ever seen before Involved on the German side were the 52nd and 3rd Fighter Wings The 52nd Fighter Wing was the most accomplished fighter wing in history and many of its top aces were involved in the combats over the Kursk battlefield These included Walter Krupinski 197 claimed kills in the war G nther Rall the third highest scoring ace in history 275 claimed kills and the highest scoring ace in history Erich Hartmann 352 claimed kills Opposing them were what were to become three of the top five Soviet aces Kirill Yevstigneyev 53 claimed kills Nikolai Gulayev 55 claimed kills and the top scoring Allied ace of the war Ivan Kozhedub 62 claimed kills This was indeed the battle of the aces But there was also the massive ground attack effort by both sides including the Junkers Ju 87 Stuka fitted with 37mm anti tank guns flown by the man who would become most decorated soldier of the Third Reich Hans Ulrich Rudel The aerial battle involved hundreds of Soviet Sturmoviks or IL 2s Stalin's armored ground attack plane The battle featured the famous attack by Luftwaffe Hs 129s and Fw 190s on Soviet armor on 8 July 1943 Aces at Kursk is not just a war story but a revealing investigation that analyses the entire air battle that turned the tide of the war on the Eastern Front *Special Bibliographic Series* US Army Military History Research Collection,1978 *Admiral Gorshkov* Norman C Polmar,Thomas A Brooks,2019-03-15 Admiral of the Fleet of the Soviet Union Sergei G Gorshkov was the product of a tradition unlike those of his Western contemporaries He had a unique background of revolution civil war world wars and the forceful implementation of an all controlling communist dictatorship Out of this background of violence and overwhelming transformation came a man with a vivid appreciation of the role and

value of navies but with his own unique ideas about the kind of navy that the Soviet Union required and the role that navy should play in Soviet military and national strategy Western naval observers have persisted in attempting to define Admiral Gorshkov in Western naval terms Many of these observers have been baffled when they found that the man and his actions simply did not fit conventional narratives This book lays out the tradition background experiences and thinking of the man as they relate to the development of the Soviet Navy that Gorshkov commanded for almost three decades and that was able to directly challenge the maritime dominance of the United States a traditional sea power His influence persists to this day as the Russian Navy that is at sea in the twenty first century is to a significant degree based on the fleet that Admiral Gorshkov built

Continental Powers and Naval Development Brian C. Chao, 2025-10-16 This book examines how continental great powers have attempted to develop and wield strong navies since 1801 Continental Powers and Naval Development argues that a continental great power's ability to build and effectively use a strong navy is greatly affected by two factors a naval force design capable of executing national strategy strategy coherence and the deployment of that navy to places or for purposes that minimize the dominant naval power's threat perception threat diffusion Each factor is deceptively difficult for a continental great power to achieve but through an analysis of four historical case studies this book shows how both factors are vital not just for successful naval development but for keeping the peace among great powers Finally it highlights how states commonly thought of as unnatural naval powers can nonetheless achieve their political objectives at sea This book will be of much interest to students of naval history maritime strategy and International Relations

Fall of the Red Baron Leon Bennett,2012-02-19

Fighter pilot Manfred von Richthofen the Red Baron lacked innate aerobatic ability As a tyro he attempted to solve this problem through denial going so far as to sneer at stunting as pointless Great War air combat experience proved quite the reverse and so we would anticipate a short and sad fighting life for the fellow Yet the Red Baron became the Great War s single greatest scorer as measured by total victories How did he do it This book is concerned with tactics especially those tactics used by the Red Baron and his opponents It offers the how and why of Great War aerial combat The author leans heavily on his expertise in engineering and aerodynamic techniques to explain this with his reasoning presented in a readable non mathematical style Absent are both the usual propaganda laced Air Service reports and psychobabble Offered instead is the logic behind Great War aerial combat i e those elements determining success or failure in the Red Baron s air war Gunnery experience led to the machine gun as the weapon best suited for aerial combat Joined with a suitable aircraft the extremely successful Fokker diving attack resulted In reaction effective defensive techniques arose using forms of shrewd tactical cooperation by two seater crews pilot and gunner These are detailed Numbers mattered establishing the level of assault firepower Tactics of machines flying together in formation are given as well as those of formation busters intent upon reversing the odds and turning large numbers into a disadvantage A pilot s nature and emotions had much to do with choosing between the options defining tactics What were the aces like How were tactics tailored to suit personality What traits made for the ability to grapple with a jammed machine gun A dozen high achievers are examined in terms of tactics and background In a fascinating study Leon Bennett covers all of these aspects of WWI aerial combat and more Similarly the author turns his attention to examining the cause of von Richthofen s death employing the tools of logic rather than merely accepting one of the many conflicting eyewitness reports as truth In doing so much testimony is exposed as unlikely The bullet scatter to be expected from ground anti aircraft fire matters greatly and is developed along with the odds against lone riflemen hoping to hit a fast moving low altitude target The most dangerous altitude for front line crossing is established The author concludes by rating the possibility of a rifleman downing the Red Baron as quite realistic certainly as likely as any of the more celebrated possibilities This is an important book offering a groundbreaking account of WWI aerial tactics and a thorough examination of the final combat and death of

the Red Baron **Engaging the Evil Empire** Simon Miles, 2020-10-15 In a narrative redefining approach Engaging the Evil Empire dramatically alters how we look at the beginning of the end of the Cold War Tracking key events in US Soviet relations across the years between 1980 and 1985 Simon Miles shows that covert engagement gave way to overt conversation as both superpowers determined that open diplomacy was the best means of furthering their own primarily competitive goals Miles narrates the history of these dramatic years as President Ronald Reagan consistently applied a disciplined carrot and stick approach reaching out to Moscow while at the same time excoriating the Soviet system and building up US military capabilities The received wisdom in diplomatic circles is that the beginning of the end of the Cold War came from changing policy preferences and that President Reagan in particular opted for a more conciliatory and less bellicose diplomatic approach In reality Miles clearly demonstrates Reagan and ranking officials in the National Security Council had determined that the United States enjoyed a strategic margin of error that permitted it to engage Moscow overtly As US grand strategy developed so did that of the Soviet Union Engaging the Evil Empire covers five critical years of Cold War history when Soviet leaders tried to reduce tensions between the two nations in order to gain economic breathing room and to ensure domestic political stability prioritize expenditures on butter over those on guns Miles's bold narrative shifts the focus of Cold War historians away from exclusive attention on Washington by focusing on the years of back channel communications and internal strategy debates in Moscow as well as Prague and East Berlin [Air War on the Eastern Front](#) Mike Guardia, 2020-10-28 A pictorial history of Nazi Germany's entire air campaign against the Soviet Union on the Eastern Front in World War II The Red Air Force versus the Luftwaffe in the skies over Eastern Europe June 1941 Having conquered most of Western Europe Adolf Hitler turned his attention to the vast Soviet Union Disregarding his Non Aggression Pact with Joseph Stalin Hitler launched Operation Barbarossa a full scale invasion of the Soviet homeland aimed squarely at Moscow In the skies over Russia the battle hardened airmen of the Luftwaffe made short work of the Red Air Force during opening days of Barbarossa To make matters worse Stalin had executed many of his best pilots during the perennial purges of the 1930s Thus much of the Red Air Force was destroyed on the ground before meeting the Luftwaffe in the skies By 1944 however the Soviet airmen had regained the initiative and fervently wrested air superiority from the now ailing Axis Powers Will be of great interest to both modelers and aircraft historians alike AMPS Indianapolis This slim survey provides a quick convenient intro to the deadly totalitarian duel Make it a launchpad to further study of Eastern Front air combat in WWII Cybermodeler The prose is smooth and provides a top level look at WWII German and Soviet air warfare Historical Miniatures Gaming Society [Emergent Regional Powers and International Relations in the Gulf, 1988-1991](#) Simon Murden, 1995 A chronological account of Anglo Egyptian political relations from 1947 to 1956 a crucial point in more than 70 years of British involvement in Egypt for they marked a turning point in political relations
