Guy Suits, 2013-10-22 The Collected Works of Irving Langmuir Volume 11 Cloud Nucleation presents the papers written by Dr Irving Langmuir on the study of artificial nucleation of clouds to produce precipitation The compilation provides the study of every possible aspect of cloud and weather modification This volume contains chapters that are devoted to the discussion of such subjects as the nucleation of clouds with dry ice the analysis of photographic data showing the effects produced by supercooled clouds with ice nuclei the production of rain by a chain reaction in cumulus clouds at temperatures above freezing nucleation of clouds with silver iodide and basic discoveries underlying weather modification Meteorologists will find the book interesting and invaluable **The Calamity Form** Anahid Nersessian, 2020-08-12 Romanticism coincided with two major historical developments the Industrial Revolution and with it a turning point in our relationship to the earth its inhabitants and its climate Drawing on Marxism and philosophy of science The Calamity Form shines new light on Romantic poetry identifying a number of rhetorical tropes used by writers to underscore their very failure to make sense of our move to industrialization Anahid Nersessian explores works by Friedrich Hlderlin William Wordsworth John Keats and others to argue that as the human and ecological costs of industry became clear Romantic poetry adopted formal strategies among them parataxis the setting of elements side by side in a manner suggestive of postindustrial dissonance and apostrophe here an address to an absent or vanishing natural environment as it tried and failed to narrate the calamities of capitalism These tropes reflect how Romantic authors took their bewilderment and turned it into a poetics a theory of writing reading and understanding poetry as an eminently critical act Throughout Nersessian pushes back against recent attempts to see literature as a source of information on par with historical or scientific data arguing instead for an irreducibility of poetic knowledge Revealing the ways in which these Romantic works are of their time but not about it The Calamity Form ultimately exposes the nature of poetry s relationship to capital and capital s ability to hide how it works

Antarctica and the Southern Ocean Nicholas Golledge, Eileen Hofmann, Marilyn Raphael, Letizia Tedesco, 2024-06-26 Antarctica is our southernmost continent It is nearly double the size of Australia Antarctica is covered almost entirely by land ice called the Antarctic Ice Sheet and is surrounded by the Southern Ocean The Southern Ocean influences climate by taking up heat and carbon dioxide from the atmosphere and storing it in deep waters The cloud processes and aerosols over the Southern Ocean are complex and are important challenges for climate models To understand the climate of the past polar scientists drill ice cores through the Antarctic Ice Sheet The ice core is a powerful tool that we can use to determine how the Earth's climate has changed and the information provided by historical ice cores has become extremely valuable for predicting the future scenarios of our planet This ice is the largest reservoir of fresh water on Earth The Antarctic Ice Sheet flows down into the Southern Ocean where parts of it start to float These large floating platforms of ice are called ice shelves

Knowledge of the sensitivity and interaction of ice shelves to changes in atmosphere and ocean is important to understand the contribution of Antarctica to global sea level rise and the Southern Ocean and global marine ecosystems. If melted, the Antarctic Ice Sheet would be a major contributor to global sea level rise. In winter, the surface of the ocean around Antarctica freezes and sea ice forms. At the height of winter, the area of sea ice that forms is as large as Antarctica itself, but it melts back to the continent every summer. The amount of sea ice that forms in winter and melts back each summer is different. We examine this annual fluctuation of sea ice area around Antarctica for indications of climate change. Sea ice provides important habitats for primary producers such as sea ice algae and Antarctic krill, a keystone species of the Southern Ocean ecosystem. Sea ice is also an important habitat for penguins and seals. This collection aims to inform young readers about fundamental knowledge and digested cutting edge science that will help increase their understanding of Antarctica and its central role as a global climate driver. In addition to the Editors hosting, we would acknowledge the coordination and organization efforts of Pat Wongpan. **The Earth and Its People ...** Wallace Walter Atwood, Helen Goss Thomas, 1928

Endless Andness Mieke Bal, 2013-11-01. In *Endless Andness*, Mieke Bal pioneers a new understanding of the political potential of abstract art which does not passively yield its meaning to the viewer but creates it anew, an art perceived not only through the retina but experienced viscerally. In this book, the third of her companion volumes on art's political agency, Bal explores perception through an intense engagement with the work of Belgian sculptor Ann Veronica Janssens. In a series of vividly recalled encounters with Janssens's practice over a number of years, Bal presents a new conception of embodied perception: art experienced in a body, conjured into participation and transformed by the experience. From Janssens's mist room works and the *CorpsNoir* sculptures through to the fugitive porous Aerogel, Bal traces an art which eludes the subject/object distinction to alter our ideas about the potential of political art in abstract and figurative forms. Enticing us simultaneously to lose ourselves and to come home, the tenuous materiality of installation art empowers those who live in the permanently lost and migratory condition that characterizes contemporary experience. In celebrating and interrogating the work of this prolific and innovative artist, Mieke Bal transforms our understanding of non-representational art to create a new awareness of perception and performance in the shared spaces of our world. *pt.
