Looking Ahead Human Factors Challenges In A Changing World:

Looking Ahead Raymond S. Nickerson,2021-12-16 This volume aims to review some of the recent developments and trends that seem especially relevant to any attempt to understand near term future possibilities to consider what a variety of knowledgeable people are saying about changes and developments that could occur and to relate the possibilities to needs and opportunities for human factors research Human factors in this case includes not only the implications of human capabilities and limitations for the design of equipment and machines intended for human use but also applied psychology in a more general sense In particular it is taken to involve social systems as well as physical ones the interaction of people with the environment as well as with machines the facilitation of communication between people as well as between people and computers and the design of policies and procedures as well as the design of equipment The author s intention is to focus on anticipated problems including opportunities as well as difficulties and ask how human factors research might contribute to solutions It is assumed that there are ways in which such research could be useful in addressing societal problems that the profession has not yet realized and that these are more likely to be recognized in the future if the community is actively seeking to identify them   *Looking Ahead* Raymond S. including cognitive performance under stress and aiding intellectual work   The History of Human Factors and Ergonomics David Meister,2018-12-14 Human factors ergonomics HFE as a discipline has grown by accretions rather than having been developed systematically and deliberately Therefore this book s goal creates a formal conceptual structure for HFE It is intended as a contribution to cultural history because a ours is a technological civilization and b one cannot understand technology outside of the various disciplines that make up that technology A disciplinary history is highly specialized but the author maintains that HFE is distinctive in being the only discipline that relates humans to technology Other behavioral disciplines like anthropology have little connection with technology and this is what makes HFE important in the present historical era   *Handbook of Aviation Human Factors* John A. Wise,V. David Hopkin,Daniel J. Garland,2016-04-19 A complete examination of issues and concepts relating to human factors in simulation this book covers theory and application in space ships submarines naval aviation and commercial aviation The authors examine issues of simulation and their effect on the validity and functionality of simulators as a training device The chapters contain in d   *The Human Factor* Kim J. Vicente,2013-03-07 In this incessantly readable groundbreaking work Vincente makes vividly clear how we can bridge the widening gap between people and technology He investigates every level of human activity from simple matters such as our hand eye coordination to complex human systems such as government regulatory agencies and why businesses would benefit from making consumer goods easier to use He shows us why we all have a vital stake in reforming the aviation industry the health industry and the way we live day to day with technology   **Conditional Reasoning** Raymond Nickerson,2015-06-12 This book reviews the work of prominent psychologists and philosophers on conditional reasoning It provides empirical research on how people deal with conditional arguments and examines how conditional statements are used and interpreted in everyday communication It also includes philosophical and theoretical treatments of the mental processes that support conditional reasoning making it an ideal resource for students teachers and researchers with a focus in cognition across disciplines   **Argumentation** Raymond S. Nickerson,2020-12-17 Drawing from the study of human reasoning Argumentation describes different types of arguments and explains how they influence beliefs and behaviour Raymond Nickerson identifies many of the fallacies biases and other flaws often found in arguments as well as stratagems schemes illogical and alogical tactics that people regularly use to persuade others Much attention is given to the evaluation of arguments Readers will learn a new schematic for evaluating arguments based on cognitive science As a source for understanding and evaluating arguments in decision making it is ideal for courses on cognition reasoning and psychology

Human Factors for Sustainability Andrew Thatcher,Klaus J. Zink,Klaus Fischer,2019-06-14 This book deals with the central question of how human factors and ergonomics HFE might contribute to solutions for the more sustainable development of our world The contents of the book are highly compatible with the recent political agenda for sustainable development as well as with sustainability research from other disciplines The book aims to summarize and profile the
