A User's Guide—The Sequel Herb Gruning,2022-08-30 There is science and there is religion and never the twain shall meet Is that to be the fate of these two disciplines Having one foot in the religious world and the other in the scientific can be as precarious as attempting to remain astride two logs in a river In this sequel to A User s Guide to Our Present World What Everyone Should Know about Religion and Science complexions of what religion and science look like today are investigated It discusses topics from Jesus and family values evangelists who arrive at your door discrimination and racism and the dark side for religion to delicate balances impacting us and the world climate change the pandemic and how ancient structures like Stonehenge and the pyramids could have been built for science The study then turns to theological implications of scientific theories including relativity and quantum Sure to ruffle the feathers of some from both sides the examination focuses on how scientific paradigms fail to cohere with traditional theological doctrines and presents the potentially uncomfortable view that scientific revolutions might warrant a corresponding revolution for theology itself

The Science of Oneness Malcolm Hollick,2011-03-16 The Science of Oneness weaves modern science together with experiential spiritual and cultural knowledge It presents a scientifically valid vision of reality that is conscious creative loving and purposeful It balances openness to all sources of knowledge with critical evaluation of their reliability Each chapter offers experiential activities thought provoking questions and guided meditations to stimulate intuitive understanding It provides a coherent world view for cultural creatives and the holism movement

Creativity and the Poetic Mind Jean Tobin,2004 Creativity and the Poetic Mind mingles the voices of well known writers such as Nikki Giovanni Donald Hall John Koethe Marge Piercy and Robert Pinsky with newer voices and includes engaging excerpts from interviews with thirty eight American poets Within a sustained argument about creative states of mind this book innovatively presents and explores the technique of going to the place as more reliable in writing poetry than waiting for inspiration It explains why poets frequently believe that talking about their own poetry may damage their creativity and why for centuries inspiration has seemed to come from somewhere beyond the poet In addition it discusses the practicality of poets thinking that being creative and writing poetry are two separate skills inspiration is unreliable but experienced poets create daily

The Stigma of Genius Joe L. Kincheloe, Shirley R. Steinberg, Deborah J. Tippins, 1992 The Stigma of Genius speaks to all of us teachers students parents citizens In 1938 Einstein wrote knowledge exists in two forms lifeless stored in books and alive in the consciousness of men This is a manifesto for an end to deadening convention corporate bureaucracy and standardized students in our public schools and for a restoration of the flame of curiosity diversity and value systems based not on a pre ordained order but in the heart and mind of students with the freedom to think and question for themselves

The Practice of Constructivism in Science Education Kenneth G. Tobin, 2012-11-12 This volume provides a needed elaboration of theories and potential applications of constructivism in science education Although the term constructivism is used widely there has been a dearth of materials to guide science educators concerning the potential of constructivism to influence what is done in the field In fact there has been a tendency for constructivism to be viewed as a method that can be used in a classroom This view tends to diminish the power of constructivism as a way of thinking about education and in particular about science education The chapters in this book address the need to document the theoretical roots of constructivism and to describe how practitioners have applied constructivist oriented beliefs in the practice of K 12 teaching of science and mathematics as well as teacher education Not only does this book contain different theoretical perspectives on constructivism but it also features a chapter that critiques constructivism as an epistemology Specific topics covered include cooperative learning the negotiation of meaning problem centered learning social construction of knowledge science in culturally diverse settings curriculum planning and implementation and instructional technology Issues associated with the preparation and enhancement of science teachers and the reform of science education are also explored

Parapsychology Review , 1986 **Cooperation in Value-Creating Networks** Josef Wieland, Stefan Linder, Jessica Geraldo Schwengber, Adrian Zicari, 2024-02-28 This volume embarks on a research journey that focuses on the processes of economic and social value creation in the 21st century Given that value creation is increasingly organized in networks consisting of businesses governments academia civil society and other societal stakeholders the contributions address various aspects of and challenges in governing cooperation in value creating networks Exploring topics such as relational rationality cultural complexity shared value creation and relational contracts this book reveals the mechanisms and processes involved in governing the complexities of inter sectoral relationships in a networked society Given its scope and focus this book will appeal to scholars of economics economic sociology organizational studies and related fields *Une révolution intérieure : Renforcer l'estime de soi* Gloria Steinem, 2023-01-11 L'estime de soi selon le féminisme Gloria Steinem

Gloria Steinem a lutté toute sa vie contre les injustices sociales. Dans *Une révolution intérieure*, elle s'emploie à montrer comment ces injustices viennent saper l'estime de soi chez les femmes mais aussi chez les hommes, peu importe l'appartenance ethnique, la classe sociale, l'âge ou l'orientation sexuelle. Convaincue que le personnel est politique et que l'estime de soi détermine notre capacité d'exister dans l'espace public, elle nous livre des clés essentielles pour la restauration, l'acquisition de connaissances et de techniques, le partage d'expériences ou encore des méditations guidées. Un ouvrage qui mêle anecdotes personnelles, témoignages et analyses et qui invite à s'emparer de sa propre vie. Publié dans une nouvelle traduction avec une préface inédite de Mona Chollet, proposé de l'autrice Gloria Steinem, une activiste féministe américaine née en 1934. Journaliste, autrice, elle a fondé le magazine *Ms.* et avec Jane Fonda et Robin Morgan le *Women's Media Center*, une organisation qui se bat pour rendre les femmes plus visibles dans les médias. **Quantum Politics** William R. Bryant, 1993

Toward a Critical Politics of Teacher Thinking Joe L. Kincheloe, 1993-03-30. This book calls for a new type of teacher education that empowers teachers to be self-directed professionals. Joe Kincheloe believes that the current trend of teaching teachers to learn an empirical knowledge base which they then implement in their classrooms is demeaning to teachers and teaches them not to think. He cites for example the emphasis on lesson plan format, the writing of behavioral objectives and pre-packaged activities. One way to achieve thoughtful empowerment is through critical action research or teaching/practitioner thinking. The author illustrates the roots of his theory in Deweyan learning through action and in the more modern active learning approach. He then applies Piagetian constructivism and critical hermeneutics to develop a post-formal model of practitioner thought which he labels critical constructivism. Kincheloe theorizes on the ways such a model would impact teaching and learning in a college of education. Autonomous, self-reflective, critical thinking teachers who take their profession seriously must understand the political consequences of this approach, states the author, as it will change the face of the school and elicit a backlash of opposition. While the book develops a unique vision of practitioner thinking, it is also firmly grounded in the realities of school life and is written in an accessible style that is not geared to one specific group.
