Steffen, 2011-11-30 QUANTUM RELIGION Enlarging from the Inside Out

These times are scary but also hope filled scary because of degraded nature but hope filled because global religion is coming to new self understanding In a word religion means relationship good news is experienced in relationships Life itself is good news because it has built in intelligence that can avoid hurtful relationships and can choose sustainable relationships instead Global relationship religion is waking up to the tragic misdirection of imperial top down control in contrast to the ordered direction of organic life growing and enlarging from within Growing from the inside out happens incrementally with experience a little bit at a time But the good news is that consciousness of experience the ground of faith is cumulative by trial and error and reveals what is sustainable and what is not Organic relationships originated minutely but have grown to the point of being self reflective in the human person Essential to growth is change as experience has shown But political forces of self interest compete to create self serving webs of relationships that intend to dominate and control The monopoly control of Christian churches has been centered in Rome under pope kings The violence of imperial overreach came to a head in medieval times and the weight of oppression so heavy at that time drove people to rebel and demand change Denominational Christianity today is made up of reform factions of original Roman Catholicism In the present time the coming apart of imperial Roman Catholicism is happening with the resignation of Emeritus Pope Benedict XVI and with the election of Pope Francis I For the first time in the history of the Roman Catholic Church it is opening up to the organic nature of life including humankind and the incremental nature of relationships growing bit by bit from within not from the top down Cosmic nature informs all relationships with the possibility and necessity of continuity and holding together from within The mentality of dominion culture underlies the waste of nature by colonial overreach and corporate capitalism The consciousness of love grounds in the universal understandings of common wellbeing and expands in the incremental growth of complexity consciousness The affirming harmony of intentional relationships is the good news of personal social wellbeing and the condition of an uplifting and sustainable future The personal search for self identity takes on new meaning in light of understanding religion as common organic relatedness in Cosmic Earth evolution The possibility of religions coming together on grounds of universal understandings is real given the wide open potentials of communication and the continuity of diverse life inside the webs of organic evolution Beyond the benefits of the personal uplift of consciousness QUANTUM RELIGION provides cohesive insights for bringing communities to a higher sense of religion and civility and the necessary sensitivity that secures natural ecologies for future wellbeing QUANTUM RELIGION is the good news of rising consciousness

Routledge Handbook for Creative Futures Gabrielle Donnelly, Alfonso Montuori, 2022-12-30 As the uncertainty of global and local contexts continues to amplify the Routledge Handbook for Creative Futures responds to the increasing urgency for reimagining futures beyond dystopias and utopias It features essays that explore the challenges of how to think about compelling futures what these better futures might be like and what personal and collective practices are emerging that support the creation of more desirable futures The handbook aims to find a sweet spot somewhere between despair and na ve

optimism neither shying away from the massive socio environmental planetary challenges currently facing humanity nor offering simplistic feel good solutions Instead it offers ways forward whether entirely new perspectives or Indigenous and Traditional Knowledge perspectives that have been marginalized within modernity and shares potential transformative practices The volume contains contributions from established and emerging scholars practitioners and scholar practitioners with diverse backgrounds and experiences a mix of Indigenous Black Asian and White Caucasian contributors including women men and trans people from around the world in places such as Kenya India US Canada and Switzerland among many others Chapters explore critical concepts alongside personal and collective practices for creating desirable futures at the individual community organizational and societal levels This scholarly and accessible book will be a valuable resource for researchers and students of leadership studies social innovation community and organizational development policy studies futures studies cultural studies sociology and management studies It will also appeal to educators practitioners professionals and policymakers oriented toward activating creative potential for life affirming futures for all The Absence of Myth Sophia Heller, 2012-02-01 In this provocative work Sophia Heller challenges the assumption that we cannot be without myth that myth is necessary to vital soulful living Indeed Heller argues we have been living in a world without myth for a long time The Absence of Myth examines the loss of a religious mode of being in the world and demonstrates how theorists who insist on the presence of myth deny its historical end Absence of myth may seem obvious evidenced by our lack of cult and ritual and by our de animated natural world as well as in the emergence of conceptual thought and psychological awareness which could only arise with the dissolution of a prereflective mythic mode of being in the world But what appears to be straightforward becomes complicated when myth is intentionally conflated with thought and reflection usually in the attempt to cultivate a mythic consciousness that aims to restore meaning to life and assuage the spiritual malaise of contemporary culture Myth cannot rest in peace It must be continually unearthed redefined and recontextualized such that modern and postmodern notions of myth are made to substitute for something that has never been experienced only imagined
