Benjamin, Deleuze and the Baroque Noa Levin, 2025-02-06 For Walter Benjamin and Gilles Deleuze who both authored seminal theoretical works on early cinema and photography the history of modern media begins much earlier in Baroque culture and science Benjamin Deleuze and the Baroque argues that their media theories were informed by their respective readings of the philosophy and mathematics of G W Leibniz and the Baroque can thus be seen as the locus of modern media By critically comparing Benjamin and Deleuze s interpretations of the Baroque Levin demonstrates the extent to which their theories of visual culture are intertwined with critiques of Enlightenment historiography and politics Using a hermeneutic comparative approach this book argues that the juxtaposition of Benjamin s reception of Leibniz with Deleuze s highlights the extent to which both authors theories of image and media were informed by Leibniz s concepts of expression and perspectivism themselves inspired by ground breaking evolutions in optics and perspective Providing close readings of Deleuze s *The Fold* and Benjamin s *Origin of the German Trauerspiel* which remain understudied in the English language it explores how in their dual roles of philosopher and cultural critic the pair may

illuminate our own age of multiple crises through the Baroque

Discourse on Metaphysics and Other Writings Gottfried Wilhelm Leibniz, 2012-08-09 This is an edition of what are arguably Leibniz's three most important presentations of his metaphysical system: the Discourse on Metaphysics from 1686 and The Principles of Nature and of Grace and The Monadology from 1714. Based on the Latta and Montgomery translations and revised by the editor, these texts set out the essentials of Leibniz's mature metaphysical views. The edition includes an introductory essay and a set of appendices of seventeenth and eighteenth century texts which help illuminate and contextualize Leibniz's ideas. Among these are extensive passages from Leibniz's Theodicy, many of which are cited in The Monadology. *Leibniz's Monadology* Lloyd Strickland, 2014-09-10 Lloyd Strickland presents a new translation of the Monadology alongside key parts of the Theodicy and an in-depth section by section commentary that explains in detail not just what Leibniz is saying in the text but also why he says it.

Architectures of Transversality Shima Mohajeri, 2018-07-11 Architectures of Transversality investigates the relationship between modernity, space, power, and culture in Iran. Focusing on Paul Klee's Persian inspired miniature series and Louis Kahn's unbuilt blueprint for a democratic public space in Tehran, it traces the architectonics of the present as a way of moving beyond universalist and nationalist accounts of modernism. Transversality is a form of spatial production and practice that addresses the three important questions of the self, objects, and power. Using Deleuzian and Heideggerian theory, the book introduces the practices of Klee and Kahn as transversal spatial responses to the dialectical tension between existential and political territories, and in doing so, situates the history of the silent, unrepresented, and the unbuilt constructed from the works of Klee and Kahn as a possible solution to the crisis of modernity and identity-based politics in Iran.

[A Critical Approach to Conceptual and Historical Issues in Psychology](#) Stanley O. Gaines, Jr., 2025-03-14 A Critical Approach to Conceptual and Historical Issues in Psychology: Soul, Self, and Science examines the evolving concept of human consciousness throughout the ages to show how humanity progressed from studies of the soul, a major concern of ancient philosophy, to a science of the mind, including the self, a primary concern of contemporary psychology. Divided into five parts, the book moves through the history of psychology from its philosophical roots into the present day and beyond. It takes a balanced and critical approach to figures and theories which have been instrumental in the development of psychology as a discipline, such as Plato, Descartes, Wundt, Du Bois, Freud, Jung, Watson, Skinner, and Maslow. Throughout, it offers diverse perspectives on the field's history, providing insights into such topics as race and intelligence, gender and personality, and their treatment within psychology. Each chapter is supported by breakout boxes highlighting key theories related to that chapter's topic. Thought questions to encourage the reader to critically evaluate what they have read, notes with further information, and suggestions for further reading are provided online. Of particular interest to postgraduate students on MSc conversion courses, the book will also interest undergraduate
