*Investigations in Algebra* Albert Cuoco, 1990 *Investigations in Algebra* departs from a preoccupation with calculus as the ultimate goal of and the universal introduction to advanced mathematics by using Logo to explore combinatorics number theory the study of discrete functions and other topics that are not on the traditional path to calculus This approach encourages students to participate actively in exciting mathematics

developing in them a facility for abstraction and an appreciation for the power of mathematical methods Most of the projects in the first two parts of the book have been worked through by students at Woburn High School often without assistance from a teacher In three parts Investigations in Algebra emphasizes the treatment of functions as concrete objects modeled as Logo procedures applies the techniques of induction and recursion to combinatorial problems and takes up topics in number theory including unique factorization congruence and multiplicative functions Integral to the presentation are numerous carefully constructed problems routine exercises long term projects and open ended experiments developed in twenty years of classroom use Investigations in Algebra is included in the series Exploring with Logo edited by E Paul Goldenberg

Rules of the Mind John R. Anderson, 2014-01-14 Related to the earlier well known ACT production system theory this book's basic goal is to present evidence for the psychological reality of a production system model of mind Distinguished from the original theory in three ways this volume uses the rational analyses of Anderson 1990 to improve upon that theory and extend its scope It also relates the theory to a great deal of new data on the performance and acquisition of cognitive skills The new theory ACT R involves a neurally plausible implementation of a production system architecture Rational analysis is used to structure and parameterize the system to yield optimal information processing The theory is applicable to a wide variety of research disciplines including memory problem solving and skill acquisition Using intelligent tutors much of the data is concerned with the acquisition of cognitive skills The book provides analyses of data sets describing the extended course of the acquisition of mathematical and computer programming skills Where There Be Monsters Alby C.
