Month of Pure Light Elizabeth Kemf,1990 *Vietnam in a Changing World* Carolyn Gates,Irene Noerlund,Vu Cao Dam Vu,2014-02-25 The last two decades saw Vietnam largely isolated in the world but during this time economic reform and development slowly gathered pace Recent events have led to Vietnams rapid re emergence into the world and an escalation of economic changes A unique insight into these changes *Coastal Waters of the World* Don Hinrichsen,2013-03-19 Nearly 60% of the world s population lives and works within 100 miles of a coast and even those who don t are connected to the world s oceans through an intricate drainage of rivers and streams Ultimately the whole of humankind is coastal Coastal Waters of the World is a comprehensive reference source on the state of the world s coastal areas It focuses on the tremendous pressures facing coastal areas and the management systems and strategies needed to cope with them Don Hinrichsen explores the origins and implications of three related issues the overwhelming threats to our coastal resources and seas from population and pollution the destruction of critical resources through unsustainable economic activity and the inability of governments to craft and implement rational coastal management plans Introductory chapters present a concise summary of our coastal problems including coastal habitat degradation and the fisheries crisis along with a discussion of better management options Three case studies of successful coastal governance focus on some of the problems and bring to life potential solutions Following that are regional profiles that provide detailed information on the main population resource and management challenges facing each of the world s thirteen major coastal waters and seas The profiles are presented in a standard format to allow for ease of comparison between regions and accessibility of information The book ends with a realistic and practical agenda for action that can be implemented immediately Safeguarding these complex interlinked ecosystems is humanity s most challenging management job Coastal Waters of the World will help raise our awareness of coastal area concerns and provide a constructive contribution to the ongoing debate over how to manage these ever changing areas both for ourselves and for future generations It will serve as a valuable reference tool and an up to date resource for policymakers management specialists and students interested in sustainable coastal governance

Indigenous Peoples and Protected Areas Elizabeth Kemf,1993 Indigenous peoples and protected areas all over the world are portrayed The conflict between modern life and the lifestyle practised for ages in these areas is discussed

Tropical Forests and Climate N. Myers,2013-06-29 Tropical forests affect climate and the removal of the forests will change climate Or not This book discusses basic questions on how far if at all tropical deforestation leads to climatic change The question of this uncertainty is particularly addressed One important consequence of the uncertainties of whether deforestation affects climate is how scientific findings best illuminate the policy making process *Third World International* ,1991

Quagmire David Andrew Biggs,2012-03-15 Winner of the 2012 George Perkins Marsh Prize for Best Book in Environmental History In the twentieth century the Mekong Delta has emerged as one of Vietnam s most important

economic regions Its swamps marshes creeks and canals have played a major role in Vietnam's turbulent past from the struggles of colonialism to the Cold War and the present day Quagmire considers these struggles their antecedents and their legacies through the lens of environmental history Beginning with the French conquest in the 1860s colonial reclamation schemes and pacification efforts centered on the development of a dense network of new canals to open land for agriculture These projects helped precipitate economic and environmental crises in the 1930s and subsequent struggles after 1945 led to the balkanization of the delta into a patchwork of regions controlled by the Viet Minh paramilitary religious sects and the struggling Franco Vietnamese government After 1954 new settlements were built with American funds and equipment in a crash program intended to solve continuing economic and environmental problems Finally the American military collapse in Vietnam is revealed as not simply a failure of policy makers but also a failure to understand the historical political and environmental complexity of the spaces American troops attempted to occupy and control By exploring the delta as a quagmire in both natural and political terms Biggs shows how engineered transformations of the Mekong Delta landscape channelized rivers a complex canal system hydropower development deforestation have interacted with equally complex transformations in the geopolitics of the region Quagmire delves beyond common stereotypes to present an intricate rich history that shows how closely political and ecological issues are intertwined in the human interactions with the water environment in the Mekong Delta Watch the book trailer <https://www.youtube.com/watch?v=gp1UItZqsk> *The Causes of Tropical Deforestation* Katrina Brown, David W.
