

The top half of the book cover features a detailed illustration of a golden leopard's head. The leopard has a fierce expression with its mouth slightly open, showing its teeth. It is wearing a silver chain collar with a single gold coin hanging from it. The background is dark, and numerous gold coins and banknotes are depicted as if falling or floating around the leopard's head, creating a sense of wealth and chaos. The overall color palette is dominated by gold, silver, and dark tones.

Wild Cats of the World Mel Sunquist, Fiona Sunquist, 2017-05-15

Did you know that European royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start? Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow? *Wild Cats of the World* is a treasure trove of answers to questions like these and many others for anyone who's interested in learning more about the world's felids including the ones with whom we share our homes. Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source, many of them quite difficult to find, including scientific papers, descriptions of hunts, archeological findings, observations by naturalists and travelers, reports from government agencies and newsletters from a wide variety of organizations. Weaving information from these sources together with their own experiences observing wild cats around the world, the Sunquists have created the most comprehensive reference on felids available. Each of their accounts of the 36 species of cat contains a description of the cat including human interactions with it as well as detailed data on its distribution, ecology and behavior, status in the wild and efforts to conserve it. Numerous photographs including more than 40 in full color illustrate these accounts. Ranging from the two pound black footed cat to the five hundred pound tiger and from the African serval with its satellite dish ears to the web footed fishing cat of Asia, *Wild Cats of the World* will fascinate and educate felid fans of any stripe or spot. *Barefoot Angel* Arijit

Noun phrase character encompasses remnant noun classes, nominal modification types and pronoun forms followed by conjunction. Verb phrase features include complex predicates, both verbs in series and verb plus postverbal particle, functionally distinct copulas, double objects and sentence complement types constrained by matrix verb. Also analyzed are preverbal and postverbal adverbials relative to information question types. Multi clause constructions are profiled as to coding varieties across dependent clauses as well as precedence relations.
