Book jacket

Monsters of Film, Fiction, and Fable Lisa Wenger Bro, Mary Ann Gareis, Crystal O'Leary-Davidson, 2018-07-27 Monsters are a part of every society and ours is no exception. They are deeply embedded in our history, our mythos and our culture. However, treating them as simply a facet of children's stories or escapist entertainment belittles their importance. When examined closely, we see that monsters have always represented the things we fear that which is different, which we can't understand, which is dangerous, which is Other. But in many ways, monsters also represent our growing awareness of ourselves and our changing place in a continually shrinking world. Contemporary portrayals of the monstrous often have less to do with what we fear in others than with what we fear about ourselves, what we fear we might be capable of. The nineteen essays in this volume explore the place and function of the monstrous in a variety of media stories and novels like Baum's Oz books or Gibson's Neuromancer television series and feature films like *The Walking Dead* or *Edward Scissorhands* and myths and legends like Beowulf and The Loch Ness Monster in order to provide a closer understanding of not just who we are and who we have been but also who we believe we can be for better or worse.

Jung & Film II Christopher Hauke, Luke Hockley, 2011 This book tackles the broader issues of film production and consumption, the audience and the place of film culture in our lives.

The Fantastic Made Visible Matthew Wilhelm Kapell, Ace G. Pilkington, 2015-05-01 Fantasy and science fiction began in print and from the first films to the latest blockbusters, print stories have provided the inspirations, the ideas and in some cases the detailed blueprints. Adaption Studies has long been an area of intense debate in literature and film studies but no single work has ever approached fantasy and science fiction texts as unique and important areas of inquiry by themselves. *The Fantastic Made Visible* with 16 fresh essays is the first book to do exactly that. From the earliest adaptations of Jules Verne, Robert A. Heinlein and Shakespeare to recent films based on *The Hobbit*, *Planet of the Apes* and *The Hunger Games*, this book offers a wide range of critical approaches and films from around the world.

Jung and Film II: The Return Christopher Hauke, Luke Hockley, 2012-05-23 Since *Jung and Film* was first published in 2001, Jungian writing on the moving image in film and television has accelerated. *Jung and Film II: The Return* provides new contributions from authors across the globe willing to tackle the broader issues of film production and consumption, the audience and the place of film culture in our lives. As well as chapters dealing with particular film makers

such as Maya Derren and films such as *Birth* *The Piano* *The Wrestler* and *Breaking the Wave* there is also a unique chapter co written by documentary film maker Tom Hurvitz and New York Jungian analyst Margaret Klenck Other areas of discussion include the way in which psychological issues come under scrutiny in many movies the various themes that concern Jungian writers on film how Jungian ideas on psychological personality types can be applied in fresh ways to analyse a variety of characters The book also includes a glossary to help readers with Jungian words and concepts *Jung and Film II* is not only a welcome companion to the first volume it is an important stand alone work essential for all academics and students of analytical psychology as well as film media and cultural studies

Film Remakes, Adaptations and Fan Productions K. Loock, C. Verevis, 2012-10-23 A dynamic investigation of processes of cultural reproduction remaking and remodelling which considers a wide range of film adaptations remakes and fan productions from various industrial textual and critical perspectives

Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14 Mark J P Wolf's study of imaginary worlds theorizes world building within and across media including literature comics film radio television board games video games the Internet and more *Building Imaginary Worlds* departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves Wolf argues that imaginary worlds which are often transnarrative transmedial and transauthorial in nature are compelling objects of inquiry for Media Studies Chapters touch on a theoretical analysis of how world building extends beyond storytelling the engagement of the audience and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's *Odyssey* to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds the resulting concentric circles of authorship and related topics of canonicity participatory worlds and subcreation's relationship with divine Creation *Building Imaginary Worlds* also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared
