System Innovation and the Transition to Sustainability Boelie Elzen, Frank W. Geels, Kenneth Green, 2004-01-01 Modern societies face several structural problems such as transport congestion and greenhouse gas emissions due to the widespread use of fossil fuels To address these important societal problems and achieve sustainability in the broad sense major transformations are required but this poses an enormous challenge given the complexity of the processes involved Such transformations are called transitions or system innovations and involve changes in a variety of elements including technology regulation user practices and markets cultural meaning and infrastructure This book considers two main questions how do system innovations or transitions come about and how can they be influenced by different actors in particular by governments The authors identify the theories which can be used to conceptualise the

dynamics of system innovations and discuss the weaknesses in these theories They also look at the lessons which can be learned from historical examples of transitions and highlight the instruments and policy tools which can be used to stimulate future system innovations towards sustainability The expert contributors address these questions using insights from a variety of different disciplines including innovation studies evolutionary economics the sociology of technology environmental analysis and governance studies The book concludes with an extensive summary of the results and practical suggestions for future research This important new volume offers an interdisciplinary assessment of how and why system innovations occur It will engage and inform academics and researchers interested in transitions towards sustainability and will also be highly relevant for policymakers concerned with environmental issues structural change and radical innovation

The Theory and Philosophy of Organizations John Hassard, Denis Pym, 2012-11-12 The Theory and Philosophy of Organizations makes a major contribution to the debate on the status of organizational theory as a discipline The volume is divided into three sections exploring issues under the headings theory analysis and philosophy In each the limitations of traditional or scientific organizational paradigms are illuminated and new forms of interpretation offered

Technology and Organization (RLE: Organizations) Harry Scarbrough, J. Martin Corbett, 2013-08-21 In this important MBA text the authors adopt a highly integrated approach Using the three conceptual lenses of power meaning and design they explore fully the many different ways in which technology and organizations interact They highlight the major debates within these competing perspectives and argue that the flow of

knowledge and ideas within and between organizations is crucial in shaping technologies and organizations alike

Operational Research and the Social Sciences S.A. Cropper, Michael C. Jackson, Paul Keys, 2012-12-06 Twenty five years ago in 1964 The Operational Research Society's first International Conference held at Gonville and Caius College Cambridge took as its theme Operational Research and the Social Sciences The Conference sessions were organised around topics such as Organisations and Control Social Effects of Policies Conflict Resolution The Systems Concept Models Decisions and Operational Research An examination of the published proceedings J R Lawrence ed 1966 Operational Research and the Social Sciences Tavistock London reveals a distinct contrast between the types of contribution made by the representatives of the two academic communities involved Nevertheless the Conference served to break down some barriers largely of ignorance about the objects methods and findings of each concern In the ensuing twenty five years although debate has continued about the relationship between OR and the social sciences mutual understanding has proved more difficult to achieve than many must have hoped for in 1964

Time, Temporality, and History in Process Organization Studies Juliane Reinecke, Roy Suddaby, Ann Langley, Haridimos Tsoukas, 2020 Time temporality and history are inherently important constructs in process organization studies yet have struggled to move beyond limited conceptualizations in management theory This volume draws together emerging strands of interest to adopt a more nuanced approach in understanding the temporal aspects of organizational processes

Postmodernism and Organizations John Hassard Martin Parker, 1993-07-13 Essential reading for all those concerned with contemporary theorizing of organization this important and thought provoking volume explores the implications of postmodernist poststructuralist thinking for organizations and organizational analysis The book introduces the concepts underpinning a postmodern organizational analysis contrasting modern and postmodern forms of explanation and addressing the distinctions between postmodernity and postmodernism Succeeding chapters then examine and assess the interplay of major postmodernist themes such as deconstruction desire difference pluralism and relativism with key topics of organizational analysis and research The final section is one of critique as its authors variously argue that postmodernism fails adequately to address the realities of power control and change in a globalizing world
