Disagreements in Context Dale Boesky, 2008 Contemporary psychoanalysts are eclectic and believe they use the best ideas from each of our numerous competing theoretic models. However, there is confusion and controversy about what constitutes the best. Critical differences between these theories are about inferences concerning the disguised meaning of what patients tell us. There can be no meaning without context, but we have never developed a consensus about how we establish context. Contextualization. This book offers a number of detailed clinical examples to illustrate how confusion about contextualization serves as the source of some of our most important disagreements.

Lacan in Contexts David Macey, 2020-05-05 In the most comprehensive study of Jacques Lacan yet to be published in English, David Macey challenges many of the assumptions that have come to surround Lacan's work. He shows that key elements of Lacanian thought relate not to structuralism as is often claimed, but to surrealism, Bataille, and the early French phenomenologists. The famous return to Freud is shown to mask Lacan's adherence to a psychiatric tradition and to trends within French psychoanalysis which were opposed by Freud himself. A detailed and challenging reading of work by Lacan and his associates on femininity reveals its reliance upon a virulently sexist discourse and upon an iconography derived from surrealism. The view that Lacanian psychoanalysis has a positive contribution to make to feminism and to theories of gender and sexual difference is contested. As well as providing a new and provocative reading of Lacan's work, *Lacan in Contexts* is an important contribution to psychoanalytic history and to the history of French intellectual life.

Contexts of Being Robert D. Stolorow, George E. Atwood, 2014-05-22 In this volume the authors complete the circle begun with *Faces in a Cloud* (1979) and continued with *Structures of Subjectivity* (1984) and *Psychoanalytic Treatment: An Intersubjective Approach* (1987) with Brandchaft. They now extend intersubjectivity theory to a rethinking of the foundational pillars of psychoanalytic theory since they have already demonstrated the degree to which psychological theory is influenced by the subjective world of the psychological theorist. They explored the various structures of subjectivity that organize the subjective world and applied the intersubjective perspective to a broad array of clinical issues. Beginning with an in-depth critique of the concept of the isolated individual mind, Stolorow and Atwood argue that this myth has long obstructed recognition of the intersubjective foundations of psychological life. The authors then proceed to a series of chapters that reframe from the standpoint of intersubjectivity theory the basic assumptions of the psychoanalytic theory of mental life. Concluding chapters on varieties of therapeutic alliance and varieties of therapeutic impasse further exemplify the ability of intersubjectivity theory to reorient the psychoanalytic therapist, thus providing fresh strategies for understanding and addressing the most challenging clinical contingencies. *Contexts of Being* is the conceptual culmination of Stolorow and Atwood's earlier studies, giving them a forum to explain why the perspective of intersubjectivity cannot be reduced to a clinical sensibility that can be grafted onto existing psychoanalytic theory. Rather, the authors argue, the intersubjective perspective has methodological and epistemological implications that mandate a radical revision of all aspects of psychoanalytic thought. Not only a cogent elaboration of these implications, the volume is also an important first step in

effecting the sweeping revision that follows from them *The Clinic and the Context* Elisabeth Young-Bruehl, 2018-05-08

History of Modern Psychology in Context Wade Pickren, Alexandra Rutherford, 2010-02-19 In *A History of Modern Psychology in Context* the authors resist the traditional storylines of great achievements by eminent people or schools of thought that rise and fall in the wake of scientific progress Instead psychology is portrayed as a network of scientific and professional practices embedded in specific contexts The narrative is informed by three key concepts indigenization

reflexivity and social constructionism and by the fascinating interplay between disciplinary Psychology and everyday psychology *Persons in Context* Roger Frie, William J. Coburn, 2010 In contemporary forms of psychoanalysis particularly intersubjective systems theory the turn towards contextualism has permitted the development of new ways of thinking and practicing that have dispensed with the notion of isolated individuality For many who embrace this post subjectivist way of thinking and practicing the recognition that all human experience is fundamentally immersed in the world makes the question of individuality seem confusing even anachronistic Yet the challenge of individuality remains an important and pressing issue for contemporary theory and practice
