What Determines Social Behavior? Investigating the Role of Emotions, Self-Centered Motives, and Social Norms Corrado Corradi-Dell'Acqua, Leonie Koban, Susanne Leiberg, Patrik Vuilleumier, Ernst Fehr, 2016-09-28 Human behavior and decision making is subject to social and motivational influences such as emotions norms and self other regarding preferences The identification of the neural and psychological mechanisms underlying these factors is a central issue in psychology behavioral economics and social neuroscience with important clinical social and even political implications However despite a continuously growing interest from the scientific community the processes underlying these factors as well as their ontogenetic and phylogenetic development have so far remained elusive In this Research Topic we collect articles that provide challenging insights and stimulate a fruitful controversy on the question of what determines social behavior Indeed over the last decades research has shown that introducing a social context to otherwise abstract tasks has diverse effects on social behavior On the one hand it may induce individuals to act irrationally for instance to refuse money but on the other hand it improves individuals reasoning in that formerly difficult abstract problems can be easily solved These lines of research led to distinct although not necessarily mutually exclusive models for socially driven behavioral changes For instance a popular theoretical framework interprets human behavior as a result of a conflict between cognition and emotion with the cognitive system promoting self interested choices and the emotional system triggered by the social context operating against them Other theories favor social norms and deontic heuristics in biasing human reasoning and encouraging choices that are sometimes in conflict with one's interest Few studies attempted to disentangle between these as well as other models As a consequence although insightful results arise from specific domains tasks a comprehensive theoretical framework is still missing Furthermore studies employing neuroimaging techniques have begun to shed some light on the neural substrates involved in social behavior implicating consistently although not exclusively portions of the limbic system the insular and the prefrontal cortex In this context a challenge for present research lies not only in further mapping the brain structures implicated in social behavior or in describing in detail the functional interaction between these structures but in showing how the implicated networks relate to different theoretical models This is Research

Topic hosted by members of the Swiss National Center of Competence in Research Affective Sciences Emotions in Individual Behaviour and Social Processes We collected contributions from the international community which extended the current knowledge about the psychological and neural structures underlying social behavior and decision making In particular we encouraged submissions from investigators arising from different domains psychology behavioral economics affective sciences etc implementing different techniques behavior electrophysiology neuroimaging brain stimulations on different populations neurotypical adults children brain damaged or psychiatric patients etc Animal studies are also included as the data reported are of high comparative value Finally we also welcomed submissions of meta analytical articles mini reviews and perspective papers which offer provocative and insightful interpretations of the recent literature in the field Social Behavior; Its Elementary Forms George Caspar Homans,1974 Motivational Analyses of Social Behavior Rex A. Wright,Jeff Greenberg,Sharon S. Brehm,2004-04-12 This book honors Jack W Brehm s contributions to psychology all of which revolve around a central theme of motivation and social behavior It begins with two personal chapters and then presents a collection of cutting edge substantive chapters authored by researchers whose work Brehm has strongly influenced It concludes with a chapter by Jack Brehm that reflects on the field of psychology discusses a new theory of social influence and offers ideas about the direction in which our understanding of human behavior could move Motivational Analyses of Social Behavior will be of value to research scientists educators and practitioners interested in social motivational processes and those who developed major theories in this area Interested readers include individuals specializing in social clinical organizational personality health and motivational psychology and psychophysiology The book would also be ideal for advanced courses on social motivation and the history of psychology *The Clinical Study of Social Behavior* Donald Robert Peterson,1968 Principles of Social Psychology Kelly G. Shaver,2015-06-19 Originally published in 1987 this third edition won praise from students and instructors alike for its challenging no nonsense approach to the field Thoroughly updated to reflect current research of the time the text retains the qualities that had become its hallmarks a cognitive approach to the process of socialization and an emphasis on the ideas that give the discipline continuity It offers clear conceptually integrated discussions of all of the major topics in social psychology from the time Shaver s focus on the concepts of social psychology provides a framework for students to develop their own applications The principles of social behavior are presented in the text in the same way they develop in the individual moving from internal processes social perception self recognition to external issues the environment the law that influence behavior Shaver weaves contemporary issues into his treatment of basic theories using examples from everyday situations His supple writing engages students in the complexity of social behavior and is one reason this title remained one of the most highly regarded texts in the field at the time *The Scientific Study of Social Behavior* Michael Argyle,1957 **Social Psychology** Kimball Young,1938 Human Social Behavior Robert A. Baron,Robert M Liebert,1972 *Connectionist Models of Social Reasoning and Social Behavior* Stephen John

Read, Lynn C. Miller, 2014-01-14 Although neural network models have had a dramatic impact on the cognitive and brain sciences social psychology has remained largely unaffected by this intellectual explosion The first to apply neural network models to social phenomena this book includes chapters by nearly all of the individuals currently working in this area Bringing these various approaches together in one place it allows readers to appreciate the breadth of these approaches as well as the theoretical commonality of many of these models The contributors address a number of central issues in social psychology and show how these kinds of models provide insight into many classic issues Many chapters hint that this approach provides the seeds of a theoretical integration that the field has lacked Each chapter discusses an explicit connectionist model of a central problem in social psychology Since many of the contributors either use a standard architecture or provide a computer program interested readers with a little work should be able to implement their own variations of models Chapters are devoted to the following topics and models the learning and application of social categories and stereotypes causal reasoning social explanation and person perception personality and social behavior classic dissonance phenomena and belief change and the coherence of large scale belief systems *Motivational Analyses of Social Behavior* Rex A. Wright, 2003 **Cognition and Social Behavior** John S. Carroll, John W. Payne, 2014-01-14 First published in 1976 This volume presents the collected papers of the Eleventh Annual Symposium on Cognition held at Carnegie Mellon University in April 1975 These papers are unique in the history of these symposia for their orientation toward the study of social behavior This symposium brings together the two fields of social psychology and cognitive psychology in response to a growing desire among many social psychologists to seek out or develop a more systematic body of theory and a corresponding desire among many cognitive psychologists to study the everyday affairs of people outside the laboratory
