Reclaiming A Conversation The Ideal Of The Educated Woman:

Reclaiming a Conversation Jane Roland Martin, 1985 *Reclaiming a Conversation* Jane Roland Martin, 1987-07-01
Examines the theories of Plato Rousseau Mary Wollstonecraft Catherine Beecher and Charlotte Perkins Gilman concerning the education of women **The Educated Person** Donal G. Mulcahy, 2008 Liberal education has long been a fascination for scholars in a variety of disciplines and is closely associated with the idea of the educated person Seen at one time as a matter for colleges and universities over the years it has become central to the debate surrounding general education in high school and even the earlier grades Yet so many and varied are the uses of the term liberal education that the question arises of whether and how the idea is any longer a useful or helpful construct In what way might it speak helpfully to educational challenges we face today In what ways does it still speak helpfully to educational challenges we face today In what ways might it be a guide as we search for a better way forward These are the central questions that are addressed in this book In doing so the positions of three theorists John Henry Newman Mortimer J Adler and Jane Roland Martin who have written about liberal education in a compelling way and from different perspectives are selected for close analysis The analysis is built upon to fashion a new ideal of the educated person and a new theory of liberal education *Women in Ancient Greece* Sue Blundell, 1995 Largely excluded from any public role the women of ancient Greece nonetheless appear in various guises in the art and writing of the period and in legal documents These representations in Sue Blundell s analysis reveal a great deal about women s day to day experience as well as their legal and economic position and how they were regarded by men *University Women* Sara Z. MacDonald, 2021-11-15 Bessie Scott nearing the end of her first year at university in the spring of 1890 recorded in her diary Wore my gown for first time It didn t seem at all strange to do so Often deemed a cumbersome tradition by men the cap and gown were dearly prized by women as an outward sign of their hard won admission to the rank of undergraduates For the first generations of university women higher education was an exhilarating and transformative experience but these opportunities would narrow in the decades that followed In *University Women* Sara MacDonald explores the processes of integration and separation that marked women s contested entrance into higher education Examining the period between 1870 and 1930 this book is the first to provide a comparative study of women at universities across Canada MacDonald concludes that women s higher education cannot be seen as a progressive narrative a triumphant story of trailblazers and firsts of doors being thrown open and staying open The early promise of equal education was not fulfilled in the longer term as a backlash against the growing presence of women on campuses resulted in separate academic programs closer moral regulation and barriers that restricted their admission into the burgeoning fields of science technology engineering and mathematics The modernization of higher education ultimately marginalized women students researchers and faculty within the diversified universities of the twentieth century *University Women* uncovers the systemic inequalities based on gender race and class that have shaped Canadian higher education It is indispensable reading for those

concerned with the underrepresentation of girls and women in STEM and current initiatives to address issues of access and equity within our academic institutions
