12,000 BC Jerry Kroth, 2024-10-01 Professor Jerry Kroth s book 12 000 BC Two Extinction Level Events We Know Nothing About explores the often popularized ancient apocalypse narratives so frequently depicted on Netflix and YouTube Kroth s approach however is systematic in that it examines the science behind these controversies without tiptoeing into fringe or conspiracy literature to establish its credentials For example mainstream archeology alleges the ice age came to its conclusion in a gradual manner while the spread of Homo sapiens throughout the world resulted in the extinction of 35 species of megafauna mainly as a result of humans hunting down large animals Woolly Mammoths Mastodons Giant Sloths and others went extinct because of this hunter overkill hypothesis so says the mainstream A counter argument to this view is that two major cosmic cataclysms occurred first a Miyake solar storm that caused radiocarbon levels to rise across the planet This occurred 14 300 years ago It was one of the largest solar storms ever to hit the planet far greater than the Carrington Event of 1859 and it caused massive melting of the ice caps and flooding incineration of vegetation fused rocks etc Dr Kroth presents a great deal of experimental data to support this theory backed up by interviews with scientists from around the world and not from anthropology or archeology at all but from solar physicists and other physical scientists A rapid increase in global temperatures resulted but as a result of the soot rising from the cataclysm global temperatures again fell precipitously eventually ushering in the Younger Dryas a period of unstable rising and falling global temperatures Then 12

300 years ago a second cataclysmic event happened A giant comet fragmented over the Northern Hemisphere destroying Lake Agassiz and causing massive flooding across America It similarly exacerbated the extinctions that were taking place The physical evidence nanodiamonds fused rocks radiocarbon levels in fossilized tree rings all point to the reality of these planetary shocks In Part II of 12 000 BC Dr Kroth examines the impact these events had on humanity Besides wiping out the Clovis people of North America recent DNA studies show that the human race also experienced a precipitous decline at this time Kroth then takes up issues of antediluvian human societies and looks at the evidence supporting the presence of advanced human societies before these cataclysms happened Gobekli Tepe Atlantis the Yonaguni Monuments Gulang Padang His conclusion from a review of this literature in contradiction to Graham Hancock s position is that advanced human societies did not in fact exist Stone Age peoples yes but some advanced mathematically sophisticated antediluvian culture does not succeed in passing through Kroth s filter The evidence is just not there Perhaps if Atlantis one day is discovered this theory will be revised but as it stands the earliest sophisticated and advanced human culture still remains that of Sumeria of only 6 000 years ago Part III of the text presents a uniquely controversial hypothesis to explain the rapid and exponential rise of human society In a mere 6 000 years human culture and technology developed so rapidly that conventional evolutionary biology and mainstream anthropology have enormous difficulty trying to explain how that all happened Why did it take Homo sapiens 196 500 years to invent a wheel Why was it 194 600 years before he got the idea of cultivating potatoes Kroth provides a provocative explanation for these anomalies and vicissitudes of human cultural advance Aliens and Man Jerome A. Kroth,2010 When it comes to extraterrestrials UFOs crop circles and ancient astronaut literature most intelligent readers are repulsed by New Age hype turned off by Erik Van Daniken flustered by blatant pseudo science and deeply chagrined at how even the History Channel got dragged into the tabloid and sensational Yet many intelligent open minded readers harbor secret interests in the Great Pyramid and how it was built in mythic tales of sky gods coming and going from Ezekiel to the Rig Veda They are awed by the intricate fractals in crop circles and they more than take notice when a NASA astronaut says he was trailed in space by UFOs That questioning readership however swims in a vast sea of agnosticism curious but not convinced And there just aren t any books for them None they can trust None that reaches them None that transcends tabloid fantasies to authentically treat issues with enough dispassion and scholarly erudition not to insult their intelligence Here Dr Kroth gives the run down on a wide range of evidence and ponders how reliable any of it may be Readers are left with all the elements to form their own equation **The Riddled Chain** Jeffrey Kevin McKee,2000 Had any link in the evolutionary chain of events been slightly different then our species would not be as it is today or our ancestors may not have survived at all BOOK JACKET Encyclopedia of Prehistory Peter N. Peregrine,Melvin Ember,2012-12-06 The Encyclopedia of Prehistory represents also defined by a somewhat different set of an attempt to provide basic information sociocultural characteristics than are eth on all archaeologically known cultures nological cultures Major traditions are

Reflections of Our Past John H. Relethford, Deborah A.

Bolnick, 2018-03-26 The rise of the multi billion dollar ancestry testing industry points to one immutable truth about us as human beings we want to know where we come from and who our ancestors were John H Relethford and Deborah A Bolnick explore this topic and many more in this second edition of Reflections of Our Past Where did modern humans come from and how important are the biological differences among us Are we descended from Neandertals How should we understand the connections between genetic ancestry race and identity Were Native Americans the first to inhabit the Americas Can we see evidence of the Viking invasions of Ireland a millennium ago even in the Irish of today Through engaging examination of issues such as these and using non technical language Reflections of Our Past shows how anthropologists use genetic information to suggest answers to fundamental questions about human history By looking at genetic variation in the world today and in the past we can reconstruct the recent and remote events and processes that have created the variation we see providing a fascinating reflection of our genetic past

Émile Durkheim and the Birth of the Gods Alexandra

Maryanski, 2018-06-18 The Birth of the Gods is dedicated to Durkheim s effort to understand the basis of social integration Unlike most social scientists then and now Durkheim concluded that humans are naturally more individualistic than collectivistic that the primal social unit for humans is the macro level unit the horde rather than the family and that social cohesion is easily disrupted by human self interest Hence for Durkheim one of the gravest problems facing sociology is how to mold these human proclivities to serve the collective good The analysis of elementary religions Durkheim believed would allow social scientists to see the fundamental basis of solidarity in human societies built around collective representations totems marking sacred forces and emotion arousing rituals directed at these totems The first half of the book traces the key influences and events that led Durkheim to embrace such novel generalizations The second part makes a significant contribution to sociological theory with an analysis that essentially tests Durkheim s core assumptions using cladistic analysis social network tools and theory and data on humans closest living relatives the great apes Maryanski marshals hard data

from primatology paleontology archaeology genetics and neuroscience that enlightens and surprisingly confirms many of Durkheim's speculations. These data show that integration among both humans and great apes is not so much group or kin oriented per se but orientation to a community standing outside each individual that includes a sense of self but also encompassing a cognitive awareness of a sense of community or a connectedness that transcends sensory reality and concrete social relations. This community complex as Maryanski terms it is what Durkheim was beginning to see although he did not have the data to buttress his arguments as Maryanski is able to do.

Ancestral DNA, Human Origins, and Migrations Rene J. Herrera, Ralph Garcia-Bertrand, 2018-06-13 *Ancestral DNA, Human Origins, and Migrations* describes the genesis of humans in Africa and the subsequent story of how our species migrated to every corner of the globe. Biosocial Evolutionary Analysis Jonathan H. Turner, Alexandra Maryanski, 2024-01-18. This authoritative book proposes a methodological and theoretical strategy for developing sociological explanations of the socio cultural universe. Jonathan H. Turner and Alexandra Maryanski discuss the problems that persist in explaining the socio cultural universe using only biological and psychological approaches and outline new strategies for understanding the evolution of human beings and their biological nature.

Man the Hunted Donna Hart, Robert W. Sussman, 2008-07-29. A provocative view of human evolution that contends early humans occupied a far more vulnerable position in the food chain than we like to imagine.

Marriage, a History Stephanie Coontz, 2006-02-28. Just when the clamor over traditional marriage couldn't get any louder along comes this groundbreaking book to ask: What tradition? In *Marriage a History* historian and marriage expert Stephanie Coontz takes readers from the marital intrigues of ancient Babylon to the torments of Victorian lovers to demonstrate how recent the idea of marrying for love is and how absurd it would have seemed to most of our ancestors. It was when marriage moved into the emotional sphere in the nineteenth century she argues that it suffered as an institution just as it began to

thrive as a personal relationship This enlightening and hugely entertaining book brings intelligence perspective and wit to today s marital debate World History Encyclopedia [21 volumes] Alfred J.
