*Contemporary European Playwrights* Maria M. Delgado, Bryce Lease, Dan Rebellato, 2020-07-22 *Contemporary European Playwrights* presents and discusses a range of key writers that have radically reshaped European theatre by finding new ways to express the changing nature of the continent's society and culture and whose work is still in dialogue with Europe today. Traversing borders and languages, this volume offers a fresh approach to analyzing plays in production by some of the most widely performed European playwrights, assessing how their work has revealed new meanings and theatrical possibilities as they move across the continent, building an unprecedented picture of the contemporary European repertoire. With chapters by leading scholars and contributions by the writers themselves, the chapters bring playwrights together to examine their work as part of a network and genealogy of writing, examining how these plays embody and interrogate the nature of contemporary Europe. Written for students and scholars of European theatre and playwriting, this book will leave the reader with an understanding of the shifting relationships between the subsidized and commercial, the alternative and the mainstream stage, and political stakes of playmaking in European theatre since 1989. **Postscript** Andrea

Andersson, 2018-01-01 *Postscript* is the first collection of writings on the subject of conceptual writing by a diverse field of scholars in the realms of art, literature, media, as well as the artists themselves. **Arts & Humanities Citation Index**, 2002

**Finding Equilibrium** Till D ppe, E. Roy Weintraub, 2014-07-21 The remarkable story and personalities behind one of the most important theories in modern economics. *Finding Equilibrium* explores the post-World War II transformation of economics by constructing a history of the proof of its central dogma: that a competitive market economy may possess a set of equilibrium prices. The model economy for which the theorem could be proved was mapped out in 1954 by Kenneth Arrow and Gerard Debreu collaboratively and by Lionel McKenzie separately and would become widely known as the Arrow-Debreu Model. While Arrow and Debreu would later go on to win separate Nobel prizes in economics, McKenzie would never receive it. Till D ppe and E. Roy Weintraub explore the lives and work of these economists and the issues of scientific credit against the extraordinary backdrop of overlapping research communities and an economics discipline that was shifting dramatically to mathematical modes of expression. Based on recently opened archives, *Finding Equilibrium* shows the complex interplay between each man's personal life and work and examines compelling ideas about scientific credit, publication, regard for different research institutions, and the awarding of Nobel prizes. Instead of asking whether recognition was rightly or wrongly given and who were the heroes or villains, the book considers attitudes toward intellectual credit and strategies to gain it, as well as the communities that grant it. Telling the story behind the proof of the central theorem in economics, *Finding Equilibrium* sheds light on the changing nature of the scientific community and the critical connections between the personal and public rewards of scientific work. **Routledge International Encyclopedia of Women** Cheris Kramarae, Dale
