Magic's Translations Margaret J. Wiener, 2025-04-04 Do you believe in magic This familiar question suggests magic is easily recognized but unreal In *Magic's Translations* Margaret J Wiener argues that such views are shaped by historical power struggles especially in Europe's relations with the wider world Focusing on nineteenth and twentieth century Dutch interactions with Indonesians Wiener reveals how colonial agents framed unfamiliar practices practitioners and objects as magic rendering distinct phenomena fundamentally alike and advancing colonizing projects that deemed magic antithetical to reason and reality While colonial authorities including ethnologists mobilized the concept of magic to differentiate Europeans from Indonesians nature from culture reason from superstition and fact from fetish their efforts produced unexpected outcomes Some Indonesian artifacts and acts not only retained their power but invaded European experiences As anthropologists were among the key translators of magic throughout the world Wiener intersperses accounts of magic's translations in the Indies with reflections on anthropology's ongoing engagement with the concept She demonstrates that magic became an object of expert knowledge political control and popular fascination rather than a self-evident category or relic of naïve belief

Software and Mind Andrei Sorin, 2013-01-01 Addressing general readers as well as software practitioners *Software and Mind* discusses the fallacies of the mechanistic ideology and the degradation of minds caused by these fallacies Mechanism holds that every aspect of the world can be represented as a simple hierarchical structure of entities But while useful in fields like mathematics and manufacturing this idea is generally worthless because most aspects of the world are too complex to be reduced to simple hierarchical structures Our software-related affairs in particular cannot be represented in this fashion And yet all programming theories and development systems and all software applications attempt to reduce real world problems to neat hierarchical structures of data operations and features Using Karl Popper's famous principles of demarcation between science and pseudoscience the book shows that the mechanistic ideology has turned most of our software-related activities into pseudoscientific pursuits Using mechanism as warrant the software elites are promoting invalid even fraudulent software notions They force us to depend on generic inferior systems instead of allowing us to develop software skills and to create our own systems Software mechanism emulates the methods of manufacturing and thereby restricts us to high levels of abstraction and simple isolated structures The benefits of software however can be attained only if we start with low-level elements and learn to create complex interacting structures Software the book argues is a non-mechanistic phenomenon So it is akin to language not to physical objects Like language it permits us to mirror the world in our minds and to communicate with it Moreover we increasingly depend on software in everything we do in the same way that we depend on language Thus being restricted to mechanistic software is like thinking and communicating while being restricted to some ready-made sentences supplied by an elite Ultimately by impoverishing software our elites are achieving what the totalitarian elite described by George Orwell in *Nineteen Eighty Four* achieves by

impoverishing language they are degrading our minds World of Forensic Science K. The Educational Value of Certain After-school Materials and Activities in Science Morris Meister, 1921 **Symposium on Satanism (JCR Vol. 1 No. 2)** R. J. Rushdoony, Gary North, David Ketchen, Thomas Molnar, Mark Wyndham, Diana Lynn Walzel, F. Seth Dyrness, Jean C. Blasdale, Greg Bahnsen, 2019-03-22

Witchcraft, occultism, paranormal science, and mysticism are growing like plagues in the Western world. These phenomena have baffled modern educators and conventional rationalists since such activities seem to be completely opposed to everything that the public schools have taught for over a hundred years. Worst of all, in the minds of conventional secularists, all this discussion of demonic forces may lead to an even more appalling conclusion: the idea that God, also a supernatural force, may reappear in the modern post-Christian world. At all costs, a God who can make himself felt in time and on earth must be avoided. Mysticism is one thing totally internalized, but supernatural forces are not supposed to have any impact on external, so-called phenomenal affairs. Occultism is another form of humanism. It is the product of the quest for power apart from God and His law order. It was not a major force in the so-called Dark Ages. Not until the fifteenth century did witchcraft become a serious problem in Europe, and it was the Renaissance, not medievalism, which sparked the great explosion of demonism and magic in the sixteenth century. During the period of the early Middle Ages, A.D. 500-1000, there were practically no signs of witchcraft in Europe. Only with the revival of ancient Gnosticism and the invasion of Middle Eastern dualism did signs of widespread witchcraft reappear. Occultism and humanism are not sworn enemies; they are first cousins. It was only the influence of Christian principles which laid such stress

on the orderliness of God's universe that made possible the confidence of modern rationalists in denying the influence of supernatural forces. As the confidence in creation law has waned in this century, rational humanism has become increasingly unsuccessful in retarding the expansion of occult humanism. This Journal of Christian Reconstruction offers readers the necessary evidence for a refutation of the familiar charge that occultism and religion necessarily go together and that only a hard-headed rationalism can restrain the forces of spiritual anarchy. Far from retarding occultism, modern rationalism's blindness to the reality of occult forces is now creating a perverse inquisitiveness on the part of modernism's children who have learned to be critical of everything, including old-fashioned rationalism. The philosophy of the open universe, closed to God, has produced the new occult experimentalism. If anything except Christian orthodoxy might be true, why not find out through personal observation and experiment? Since 1965, the Western world has faced the greatest explosion of occultism that it has seen in three hundred years. This time, no one can blame orthodox Christianity; it has been the secularists who have wielded the power.
