Red Canary:

The Red Canary Tim Birkhead, 2014-01-30 The creation of Dolly the sheep in the 1990s was for many people the start of a new era the age of genetically modified animals However the idea was not new for in the 1920s an amateur scientist Hans Duncker decided to genetically engineer a red canary Though his experiments failed they paved the way for others to succeed when it was recognised that the canary needed to be both a product of nature and nurture This highly original narrative of huge contemporary relevance reveals how the obsession with turning the wild canary from green to red heralded the exciting but controversial developments in genetic manipulation

Ten Thousand Birds Tim Birkhead, Jo Wimpenny, Bob Montgomerie, 2014-03-01 Ten Thousand Birds provides a thoroughly engaging and authoritative history of modern ornithology tracing how the study of birds has been shaped by a succession of visionary and often controversial personalities and by the unique social and scientific contexts in which these extraordinary individuals worked This beautifully illustrated book opens in the middle of the nineteenth century when ornithology was a museum based discipline focused almost exclusively on the anatomy taxonomy and classification of dead birds It describes how in the early 1900s pioneering individuals such as Erwin Stresemann Ernst Mayr and Julian Huxley recognized the importance of studying live birds in the field and how this shift thrust ornithology into the mainstream of the biological sciences The book tells the stories of eccentrics like Colonel Richard Meinertzhagen a pathological liar who stole specimens from museums and quite likely murdered his wife and describes the breathtaking insights and discoveries of ambitious and influential figures such as David Lack Niko Tinbergen Robert MacArthur and others who through their studies of birds transformed entire fields of biology Ten Thousand Birds brings this history vividly to life through the work and achievements of those who advanced the field Drawing on a wealth of archival material and in depth interviews this fascinating book reveals how research on birds has contributed more to our understanding of animal biology than the study of just about any other group of organisms

Asian America Rising Diane Wong, Mark Tseng-Putterman, 2025-09-16 A collection of movement flashpoints and insurgent visions for Asian American activism In the late 1960s Asian American political activism emerged to unite disparate Asian diasporic communities living in the United States behind a radical political identity shaped by the Black Power and anti imperialist movements of their times Today Asian Americans are more diverse and at times more politically divided than ever before In media and electoral politics Asian Americans are celebrated as the fastest growing racial demographic in the United States and claimed as evidence of racial progress Yet the rise of Asian America rarely centers the coordinated forms of grassroots political organizing that Asian Americans have used to shape their place in society In Asian America Rising Diane Wong and Mark Tseng Putterman bring together an interdisciplinary group of established and emerging scholars of Asian American activism and politics community organizers artists archivists and

others to highlight the diversity of twenty first century Asian American political movements across a number of critical areas Based on deep collaborations between scholars and frontline organizers contributors like Diane Fujino Vichet Chhuon Lakshmi Sridaran and Kim Compoc examine different facets of the Asian American political experience including the impact of immigrant detention and deportation the emergence of conservative Chinese American opposition to affirmative action in higher education abolitionist perspectives on the Stop Asian Hate movement and transnational resistance to U S economic and military dominance in Hawai i the Philippines and Okinawa Ultimately Wong and Tseng Putterman show important shifts and emergent directions for Asian American politics in the twenty first century Focusing on grassroots mobilization and bold interventions beyond the formal political sphere they shine a light on the diversity and power of Asian American political activism cultural work community building mutual aid and multiracial issue based organizing *DC Ultimate Character Guide New Edition* DK,2024-11-05 Is Superman the strongest Super Hero alive Where is Wonder Woman from Is Darkseid the baddest Super Villain ever Who is the fastest man alive Who are Batman s greatest foes The answers to this and much more can be found in the DC Ultimate Character Guide New Edition Written by a DC expert this beautifully illustrated encyclopedia features more than 230 incredible DC characters including Batman Harley Quinn Justice League Aquaman and so many more The epic DC Universe changing Rebirth event was followed by the momentous Dawn of DC which affected many characters and their stories This comprehensive guide explores these changes alongside stunning new comic images vital statistics and key details of each character s powers from super strength to sorcery The DC Ultimate Character Guide New Edition is guaranteed to enthrall young comics fans for hours on end All DC characters and elements TM DC s24 [The Experiment at Philadelphia](#) Kurt B. The End Times Kurt B. Bakley,2016-01-20 In this book we will read the ancient prophecies for the next 1000 years and beyond It quite different then any other works on this subject but I feel this is the correct one I could be wrong We will read the dates and time periods of Daniel and Revelation all the Bible Nostradamus and ancient Egyptian art to see what will happen and when All prophecies in all books will be fulfilled if true during this time span Se read on and see your future Be sure to read my other books entitled Predictions for 2015 Revised Edition The Experiment at Philadelphia Revised Edition End Time Signs II and The End Times Prophecies dont always happen the way we think they will and many times give more than one date event and time Some preachers call this secondary fulfillment For the prophecies of this book to come true the events of September 24 28 and or October 15 17 December 31 29 24 25 14 7 November 10 11 22 2016 or 2017 must come to pass or else another type of future will happen I explain this in this book and document how other books predicts four or five possible futures and from four or five one will come true as Isaac Newton and a woman in a life after death experience predicted She said when she was dead she saw four or five futures unfold before her She came back to life and forgot about them and one day in her kitchen she notice it was the exact copy of one of her futures she saw long ago when she was dead One comes true out of four or five If the people remain sinning the good prophecy could fail This book was finished on December 14 2015 leave in

Feminist AI Jude Browne, Stephen Cave, Eleanor Drage, Kerry McInerney, 2023-10-22 *Feminist AI: Critical Perspectives on Algorithms, Data and Intelligent Machines* is the first volume to bring together leading feminist thinkers from across the disciplines to explore the impact of artificial intelligence (AI) and related data-driven technologies on human society. Recent years have seen both an explosion in AI systems and a corresponding rise in important critical analyses of these technologies. Central to these analyses has been feminist scholarship which calls upon the AI sector to be accountable for designing and deploying AI in ways that further rather than undermine the pursuit of social justice. This book aims to be a touchstone text for AI researchers concerned with the social impact of their systems, as well as theorists, students and educators in the field of gender and technology. It demonstrates the importance of an intersectional understanding of the risks and benefits of AI, approaching feminism as a political project that aims to challenge various interlocking forms of injustice, social inequality and structural relations of power. *Feminist AI* showcases the vital contributions of feminist scholarship to thinking about AI, data and intelligent machines, as well as laying the groundwork for future feminist scholarship on AI. It brings together scholars from a variety of disciplinary backgrounds, from computer science, software engineering and medical sciences to political theory, anthropology and literature. It provides an entry point for scholars of AI science and technology into the diversity of feminist approaches to AI and creates a rich dialogue between scholars and practitioners of AI to examine the powerful congruences and generative tensions between different feminist approaches to new and emerging technologies. It features original and essential works specially selected to span multiple generations of practitioners and scholars. These contributors are also attuned to conversations at industry level around the risks and possibilities that frame the drive to adopt AI. This collection reflects the increasingly blurred divide between the academy, industry and corporate research groups and brings interdisciplinary feminist insights together with postcolonial studies, disability theory and critical race studies to confront ageism, racism, sexism, ableism and class-based oppressions in AI.
