I would encourage the pupil to think and make their own decisions I am not alone in this but many people see my role as one of telling people what to do and how to do it I always insisted that my role was to make people think and as I progressed along my boot camp Spiritual training I realized that what I was actually teaching was an intuitive way of working out problems on the road I used examples of situations far removed from driving to make people think about how these skills could be used in every day life and as a result most of my pupils passed their driving test at the first attempt I was giving my pupils more than just driving lessons they were being taught about intuition and how valuable it is What I was receiving was the insight into intuition in the physical world that would be explained to me in spectacular style when I got the call from the Spirit World The book is divided into chapters that explain how I was contacted by the Spirit World and trained in a very short time to recognise and use various psychic skills how spirit used the people I was teaching to train me in the skills I needed to develop and how I began to realise that learning to drive is very similar to the spiritual path each one of us walks every day Anecdotal evidence is used as well as my conclusions about what I had learnt and understood The book can be received on many levels It can be seen as a book about driving instruction spiritual awakening inspirational philosophical or just an amusing story of one man s awakening However you decide to approach this book you will find it written in an ordinary way because after all I am an ordinary man

Sounds and Society Peter J. Martin,1995 In this pioneering new book Dr Martin presents a lively and accessible introduction to the social analysis of music Dr Martin argues that musical meaning must be understood as socially constructed rather than inherent and that the notion of a correspondence between social and musical structures is highly problematic An alternative approach based on the social action perspective is outlined and the book concludes with a discussion of the social situation of music in advanced capitalist society Along the way leading thinkers are introduced Adorno Weber and Schntz as well as more recently John Shepherd and the feminist musicologists The book draws on studies spanning the whole spectrum of Western music rock bands to symphony orchestras medieval plainchant to avant garde jazz and concludes with a discussion of the social situation of music in advanced capitalist society
