It highlights landmark research articles and scientific discoveries, discusses how big data, personalized medicine, new biomarkers for disease, and other technological revolutions will shape the future, making it a must-have resource for physicians from all regions of the world. **Key Features:** Includes concise yet thorough description of the landmark studies and scientific breakthroughs; coupled with easy-to-follow organizational structure of chapters that are accessible to readers at different levels of training; Brings together world-leading experts to provide a fresh perspective to trainees such as residents and fellows in training, as well as more senior clinicians and researchers across the field of rheumatology and in specialties such as cardiology, dermatology, pulmonology, nephrology, and neurology, all of whom care for patients with rheumatologic conditions.
