Teaching Young Children Social Studies Gayle Mindes,2006-09-30 By linking theory to practice with an emphasis on national and state standards Head Start Performance Standards No Child Left Behind and IDEA the authors coherently

combine principles of child development and social studies content to create a solid program for preschool through grade three. The authors maintain the overriding idea throughout the Teaching Young Children series that strategies derived from knowledge of child development are used to teach content knowledge. It is this concern that makes this volume an excellent resource for teachers and parents. In addition to specific discussions of how to build and conduct a social studies curriculum, the work includes vignettes of teachers and children in the classroom, graphics illustrating concepts and methods, and matrices, charts, and tables to enhance understanding. The authors effectively intertwine social learning in young children and development of self-concept with the theme-based curriculum of the National Council for Social Studies, the principles of multicultural education, parent collaboration to support learning, and creating connections between classroom and community.

Handbook of Research in Second Language Teaching and Learning (Eli Hinkel, 2016-11-18) Volume III of the Handbook of Research in Second Language Teaching and Learning, like Volumes I and II, is a comprehensive state-of-the-art overview of current research into social contexts of second language (L2) foreign language (FL) teaching and learning, language policy, curriculum types of instruction, incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar, international communication, pragmatics, assessment, and testing. It differs from earlier volumes in its main purpose to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2 FL teaching and learning and applied linguistics, but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning, the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2 FL teaching and learning and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2 FL teaching and learning. Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.
