Development Derailed Max Foran,2013-11-01 In June of 1962 the Canadian Pacific Railway announced a proposal to redevelop part of its reserved land in the heart of downtown Calgary In an effort to bolster its waning revenues and to redefine its urban presence the CPR proposed a multimillion dollar development project that included retail office and convention facilities along with a major transportation centre With visions of enhanced tax revenues increased land values and new investment opportunities Calgary s political and business leaders greeted the proposal with excitement Over the following year the scope of the project expanded growing to a scale never before seen in Canada The plan took official form through an agreement between the City of Calgary and the railway company to develop a much larger area of land and to reroute or remove the railway tracks from the downtown area a grand design for reshaping Calgary s urban core In 1964 amid bickering and a failed negotiating process the project came to an abrupt end What caused this promising partnership between the nation s leading corporation and the burgeoning city of Calgary to collapse What in economic terms was perceived to be a win win situation for both parties fell prey to a conflict between corporate rigidity and an unorganized ill informed and over enthusiastic civic administration and city council Drawing on the private records of Rod Sykes the CPR s onsite negotiator and later Calgary s mayor Foran unravels the fascinating story of how politics ultimately undermined promise *Rails Across Canada* Tom Murray,2011-03-07 Few stories in the annals of railroading are as compelling as the construction evolution and astounding successes of the Canadian Pacific and Canadian National railways This sprawling volume combines two of Voyageur Press most successful Railroad Color History titles into one volume taking in the grand

scope of both railroads Author Tom Murray presents fastidiously researched and concisely presented histories of each railroad along with more than 300 photographs including rare archival black and white images and modern and period color photography sourced from national archives and private collections **Gravity, Steam, and Steel** Graeme Pole, 2022-12-19

In 1882 the Canadian Pacific Railway Company committed to building Canada's first trans continental railway across unknown ground in the Selkirk Mountains of southern British Columbia It was a gamble that almost scuttled the project and the promise of the young country During the next three years a small army of surveyors engineers and labourers cleared the grade and built track across Rogers Pass the only break in the Selkirk Mountains a place that defined wilderness Trestles tunnels snowsheds bridges and miles of looping track the Canadian Pacific Railway has since employed them all to reduce the dangers and to make railway operations in Rogers Pass safer and more reliable Gravity Steam and Steel recounts the triumphs and tragedies of building and operating a railway in a place where 40 feet of snow falls each year and where trains routinely run on grades that many other railways would consider impossibly steep The Duluth, South Shore & Atlantic Railway John Gaertner, 2009 The rise and fall of the Duluth South Shore Atlantic Railway from 1887 to its merger with the Soo Line in 1961 is the subject of this thoroughly researched book The DSS A was organized in the hope that it would become a transcontinental link between the Canadian Pacific at the Sault and the Northern Pacific at Duluth with the major route taking passengers from the Twin Ports of Duluth Superior through Northern Wisconsin and the Upper Peninsula of Michigan to St Ignace The line was forced to merge because of competition from more efficient lake vessels on Lake Superior which could carry goods of lower value at much better rates than the DSS A John Gaertner's account draws on a wide array of sources such as the Soo Line records at the Minnesota Historical Society in St Paul the Michigan State Archives at Lansing the Burton Historical Collection in Detroit and local newspaper accounts A compelling read for history buffs and railroad enthusiasts alike The Oxford Handbook of Megaproject Management Bent Flyvbjerg, 2017-04-13 The Oxford Handbook of Megaproject Management provides state of the art scholarship in the emerging field of megaproject management Megaprojects are large complex projects which typically cost billions of dollars and impact millions of people like building a high speed rail line a megadam a national health or pensions IT system a new wide body aircraft or staging the Olympics The book contains 25 chapters written especially for this volume covering all aspects of megaproject management from front end planning to actual project delivery including how to deal with stakeholders risk finance complexity innovation governance ethics project breakdowns and scale itself Individual chapters cover the history of the field and relevant theory from behavioral economics to lock in and escalation to systems integration and theories of agency and power All geographies are covered from the US to China Europe to Africa South America to Australia as are a wide range of project types from hard infrastructure to soft change projects In depth case studies illustrate salient points The Handbook offers a rigorous research oriented up to date academic view of the discipline based on high quality data and strong theory It will be an indispensable

resource for students academics policy makers and practitioners **Blood, Iron, and Gold** Christian Wolmar,2010-03-02

The opening of the world s first railroad in Britain and America in 1830 marked the dawn of a new age Within the course of a decade tracks were being laid as far afield as Australia and Cuba and by the outbreak of World War I the United States alone boasted over a quarter of a million miles With unrelenting determination architectural innovation and under gruesome labor conditions a global railroad network was built that forever changed the way people lived From Panama to Punjab from Tasmania to Turin Christian Wolmar shows how cultures were enriched and destroyed by one of the greatest global transport revolutions of our time and celebrates the visionaries and laborers responsible for its creation **A Thousand Blunders**

Frank Leonard,2011-11-01 During the first two decades of this century the Grand Trunk Pacific Railway played an important part in the development of the north central corridor of British Columbia The GTP which ran from Winnipeg via the Yellowhead Pass and Edmonton to Prince Rupert on the northwest coast was built to supplant the Canadian Pacific line to Vancouver The B C line was the most expensive and least remunerative of its sections and contributed ultimately to the company s collapse in 1919 In *A Thousand Blunders* Frank Leonard looks at why the Road of a Thousand Wonders failed to live up to the expectations forecast by company president Charles M Hays and other senior managers Not only was the railway built through a sparsely settled region which generated little immediate traffic but its economic difficulties were also compounded by the numerous mistakes made by managers at all levels for example their failure to respond adequately to labour shortages caused serious delays and prevented the company from proving Prince Rupert as an effective alternative harbour before World War I broke out For this book Frank Leonard had access to a wealth of original documents among them the GTP legal department files providing him with insights into the decisions that formed the basis for policies in townsites and on Indian reserves *A Thousand Blunders* is a provocative account of one of the greatest failures in Canadian entrepreneurial history Richly detailed and thoroughly documented it makes an important contribution to the fields of railway and business history as well as to the study of the history of northern British Columbia *The Sweet Sixteen* Linda
