**Environmental Movements and Waste Infrastructure** Christopher Rootes, Liam Leonard, 2013-09-13 As rates of consumption grow the problem of waste management has increased significantly National and local waste authorities seek to manage such problems through the implementation of state regulation and construction of waste infrastructure including landfills and incinerators These however are undertaken in a context of increasing supra state regulatory frameworks and directives on waste management and of increasing activity by multi national corporations and are increasingly contested by activists in the affected communities Environmental Movements and Waste Infrastructure sheds new light on the structures of political opportunity that confront environmental movements that challenge the state or corporate sector A series of case studies on collective action campaigns from the EU US and Asia is elaborated in order to illuminate the similarities and differences between anti incinerator protests within different states Several contributions share a concern about cross border or transnational waste flows Each case study looks beyond its initial local frame of reference and goes on to interrogate assumptions about NIMBYism or localism demonstrating the wider linkages and networks established by both grassroots campaigns and state and multinational agencies This book was previously published as a special issue of Environmental Politics

**Environmental Crime** Mary Clifford, Terry Edwards, 2011-09 Updates on state and local issues

**Handbook of Political Citizenship and Social Movements** Hein-Anton van der Heijden, 2014-10-31 This Handbook uniquely collates the results of several decades of academic research in these two important fields The expert contributions successively address the different forms of political citizenship and current approaches and recent development

**The State of Nonprofit America** Lester M Salamon, 2012-05-14 Today America's nonprofit organizations seem caught in a force field

buffeted by four impulses: voluntarism, professionalism, civic activism, and commercialism. Too little attention, however, has been paid to the significant tensions among these impulses. Understanding this force field and the factors shaping its dynamics thus becomes central to understanding the future of particular organizations and of the nonprofit sector as a whole. In this second edition of an immensely successful volume, Lester Salamon and his colleagues offer an overview of the current state of America's nonprofit sector, examining the forces that are shaping its future and identifying the changes that might be needed. The State of Nonprofit America has been completely revised and updated to reflect changing political realities and the punishing economic climate currently battering the nonprofit sector, which faces significant financial challenges during a time when its services are needed more than ever. The result is a comprehensive analysis of a set of institutions that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment. Handbook of U.S. Environmental Policy David M. Konisky, 2020-04-24 A comprehensive analysis of diverse areas of scholarly research on U.S. environmental policy and politics, this Handbook looks at the key ideas, theoretical frameworks, empirical findings, and methodological approaches to the topic. Leading environmental policy scholars emphasize areas of emerging research and opportunities for future enquiry. *Digital Rebellion* Todd Wolfson, 2014-11-30 Digital Rebellion examines the impact of new media and communication technologies on the spatial, strategic, and organizational fabric of social movements. Todd Wolfson reveals how aspects of the mid-1990s Zapatistas movement, network organizational structure, participatory democratic governance, and the use of communication tools as a binding agent became essential parts of Indymedia and other Cyber Left organizations. From there, he uses oral interviews and other rich ethnographic data to chart the media-based think tanks and experiments that continued the Cyber Left's evolution through the Independent Media Center's birth around the 1999 WTO protests in Seattle. Melding virtual and traditional ethnographic practice to explore the Cyber Left's cultural logic, Wolfson maps the social, spatial, and communicative structure of the Indymedia network and details its operations on the local, national, and global level. He looks at the participatory democracy that governs global social movements and the ways democracy and decentralization have come into tension and how the switchboard of struggle conducts stories from the hyper-local and disperses them worldwide. As he shows, understanding the intersection of Indymedia and the Global Social Justice Movement illuminates their foundational role in the Occupy struggle and other emergent movements that have re-energized radical politics. Citizen Environmentalists James Longhurst, 2012-06-22 A telling look at the lives and strategies of women environmental activists in the long 1960s, solidly grounded in a national context. **To Care for Creation** Stephen Ellingson, 2016-08-26 Controversial megachurch pastor Mark Driscoll proclaimed from a conference stage in 2013, "I know who made the environment, and he's coming back and going to burn it all up. So yes, I drive an SUV." The comment, which Driscoll later explained away as a joke, highlights what has been a long history of religious anti-environmentalism. Given how firmly entrenched this sentiment has been, surprising inroads have been made by a new movement with few financial

resources which is deeply committed to promoting green religious traditions and creating a new environmental ethic To Care for Creation chronicles this movement and explains how it has emerged despite institutional and cultural barriers as well as the hurdles posed by logic and practices that set religious environmental organizations apart from the secular movement Ellingson takes a deep dive into the ways entrepreneurial activists tap into and improvise on a variety of theological ethical and symbolic traditions in order to issue a compelling call to arms that mobilizes religious audiences Drawing on interviews with the leaders of more than sixty of these organizations Ellingson deftly illustrates how activists borrow and rework resources from various traditions to create new meanings for religion nature and the religious person's duty to the natural world

*The Grassroots of a Green Revolution* Deborah Lynn Guber, 2003 An analysis of Americans' environmental concerns and their willingness to translate their beliefs into action

**Effluent America** Martin V. Melosi, 2001-09-02 What's the difference between an anthill and a city Protection from weather and predators living and working quarters transportation networks food storage capability all these they hold in common And while there are obvious differences between humans and ants both exist in the same space and time dimension in nature This simple idea imagining cities as part of the larger physical world has driven the work of the historian Martin Melosi for twenty five years Melosi is one of a handful of scholars who examine urban history from an ecological perspective using the city to help define the place of nature in human life Cities he maintains are places where humans live work play consume goods and make waste just as humans have in caves on farms and in villages To imagine the city as outside of nature limits what can be known about our past and our future

**Effluent America** is a collection of essays spanning this innovative scholar's career and the growing field of urban environmental history Garbage wastewater hazardous waste these are the lenses through which Melosi views nineteenth and twentieth century America In broad overviews and specific case studies **Effluent America** treats the relationship between industrial expansion and urban growth from an ecological perspective He charts the development of city services the rationale for their implementation and how they affected growth He explores the environmental impacts of unprecedented methods of production the influence of new forms of energy and changing patterns of consumption during the Industrial Revolution and beyond In so doing he traces how one of the richest nations in the world became also the most wasteful a juxtaposition of affluence and effluence Other essays consider the important role of American cities in the history of the conservation and environmental movements Melosi sketches the reforms and reformers born out of such urban quality of life issues as pollution sanitation public health and the need for greenspace He also profiles the environmental justice movement whose response to environmental problems is a question Who bears the most risk Urban environmental history is a window on the past but it also directly informs issues of the present public health pollution the role of government in delivering services etc

**Effluent America** is an important volume for students of history and urban affairs as well as for policymakers and all those concerned about the one world we inhabit
