A large, dark tree trunk rises from the water, leading up to a large, rounded, reddish-brown tree canopy. The background is a mix of orange, yellow, and green brushstrokes, suggesting a field or foliage. The sky is a light blue with white clouds.

UNIX in a Nutshell Arnold Robbins, 1999 You may have seen Unix quick reference guides but you've never seen anything like UNIX in a Nutshell. Not a scaled-down quick reference of common commands, UNIX in a Nutshell is a complete reference containing all commands and options along with generous descriptions and examples that put the commands in context. For all but the thorniest Unix problems, this one reference should be all the documentation you need. The third edition of UNIX in a Nutshell includes thorough coverage of System V Release 4. To that, author Arnold Robbins has added the latest information about sixty new commands in The Alphabetical Summary of Commands, Solaris 7 Shell syntax, sh, csh, and the 1988 and 1993 versions of ksh. Regular expression syntax via `index` commands as well as newly updated Emacs information, `sed` and `awk` commands, `troff` and related commands and macros with a new section on `refer`, `make`, RCS version 5.7 and SCCS commands. In addition, there is a new Unix bibliography to guide the reader to further reading about the Unix environment. If you currently use Unix SVR4 or if you're a Solaris user, you'll want this book. UNIX in a Nutshell is the most comprehensive quick reference on the market, a must for any Unix user. Systems Performance Brendan Gregg, 2014 The Complete Guide to Optimizing Systems Performance. Quality of Service - IWQoS 2001 Lars Wolf, David Hutchison, Ralf Steinmetz, 2003-05-15. Welcome to IWQoS2001 in Karlsruhe. Quality of Service is a very active research field especially in the networking community. Research in this area has been going on for some time with results getting into development and finally reaching the stage of products. Trends in research as well as a reality check will be the purpose of this Ninth International Workshop on Quality of Service. IWQoS is a very successful series of workshops and has established itself as one of the premier forums for the presentation and discussion of new research and ideas on QoS. The importance of this workshop series is also reflected in the large number of excellent submissions. Nearly 150 papers from all continents were submitted to the workshop; about a fifth of these being short papers. The program committee were very pleased with the quality of the submissions and had the difficult task of selecting the relatively small number of papers which could be accepted for IWQoS2001. Due to the tough competition many very good papers had to be rejected.

SCI: Scalable Coherent Interface Hermann Hellwagner, Alexander Reinefeld, 1999-10-20. Scalable Coherent Interface (SCI) is an innovative interconnect standard (ANSI IEEE Std 1596-1992) addressing the high performance computing and networking domain. This book describes in depth one specific application of SCI: its use as a high speed interconnection network often called a system area network (SAN) for computer clusters built from commodity workstation nodes. The editors and authors, coming from both academia and industry, have been instrumental in the SCI standardization process, the development and deployment of SCI adapter cards, switches, fully integrated clusters, and software systems, and are closely involved in various research projects on this important interconnect. This thoroughly cross reviewed state of the art survey covers the complete hardware/software spectrum of SCI clusters from the major concepts of SCI through SCI hardware, networking, and low level software issues, various programming models and environments, up to tools and application experiences.
