Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large

The Search for the Absolute Jeffrey H Williams, 2020-03-26 History and archaeology tell us that when our far ancestors began to settle in localized groups they codified their lives and experiences and formed a collective for mutual support This proto civilization would have arisen from each individual s questions about the world and their attempt to understand themselves and their place in the world These groups or tribes evolved rules of conduct to facilitate communal living and made a calendar for the group s celebration of harvests and other events upon which the group was utterly dependent This process of social evolution is the origin of religion and of a magical way of looking at Nature Eventually this developing worldview was also the origin of science which is our investigation of Nature to understand something of what is happening around us and to use this knowledge to ensure our survival in a violent indifferent Universe After all science and religion seek to answer the same question Why and how is the natural world the way it is This book seeks to show how science evolved from religion and magic in response to a need to understand Nature

Technology and Science in Ancient Civilizations Richard G. Olson, 2009-12-21 Why did the Greeks excel in geometry but lag begin the Mesopotamians in arithmetic How were the great pyramids of Egypt and the Han tombs in China constructed What did the complex system of canals and dykes in the Tigris and Euphrates river valley have to do with the deforestation of Lebanon s famed cedar forests

This work presents a cross cultural comparison of the ways in which the ancients learned about and preserved their knowledge of the natural world and the ways in which they developed technologies that enabled them to adapt to and shape their surroundings Covering the major ancient civilizations those of Mesopotamia Egypt China Greece the Indus Valley and Meso America Olson explores how language and numbering systems influenced the social structure how seemingly beneficial construction projects affected a civilization s rise or decline how religion and magic shaped both medicine and agriculture and how trade and the resulting cultural interactions transformed the making of both everyday household items and items intended as art Along the way Olson delves into how scientific knowledge and its technological applications changed the daily lives of the ancients
