Magnesium: Current Status and New Developments T. Theophanides, Jane Anastassopoulou, 2012-12-06 This book presents the lectures and posters of some of the main leaders in the field of the magnesium research and medical applications delivered at the 8 International Symposium on Magnesium which took place on 5-9 October 1997 in Heraklion Crete under the chairmanship of Professor Theophilos Theophanides. The meeting was sponsored by the National Technical University of Athens and Ministry of Industry Energy and Technology. The aim of this meeting was to promote research and applications of magnesium and interface between medical doctors, clinicians and scientists in order to understand the mechanisms responsible for magnesium involvement in the pathogenesis of diseases, its biological significance, metabolism and many other utilizations which are associated with membranes and cells. The success of this interface is due to the contribution of its participants who came from all continents and to their high scientific level. The topics which were presented and the questions which were asked concerned mechanisms of mode of action of free magnesium cations Mg^{2+} , hydrated cations $Mg^{2+} \cdot 6H_2O$ and magnesium linked cations $Mg \cdot L_xH_0$ where L ligand and $x = 2, 1, 6$ H_2O . We would like to express our utmost gratitude to the sponsors and to extend our deep appreciation and thanks to all those who helped and encouraged the scientific and material organization of this meeting. We wish to thank all the members of the scientific committee and the organizing committee.
