that Mark Monmonier tackles in *Coast Lines* Setting sail on a journey across shifting landscapes cartographic technology and climate change Monmonier reveals that coastlines are as much a set of ideas assumptions and societal beliefs as they are solid black lines on maps Whether for sailing charts or property maps Monmonier shows coastlines challenge mapmakers to capture on paper a highly irregular land water boundary perturbed by tides and storms and complicated by rocks wrecks and shoals *Coast Lines* is peppered with captivating anecdotes about the frustrating effort to expunge fictitious islands from nautical charts the tricky measurement of a coastline s length and the contentious notions of beachfront property and public access Combining maritime history and the history of technology *Coast Lines* charts the historical progression from offshore sketches to satellite images and explores the societal impact of coastal cartography on everything from global warming to homeland security Returning to the form of his celebrated *Air Apparent* Monmonier ably renders the topic of coastal cartography accessible to both general readers and historians of science technology and maritime studies In the post Katrina era when the map of entire regions can be redrawn by a single natural event the issues he raises are more important than ever
