Statistical Abstract of Undergraduate Programs in the Mathematical Sciences in the United States David John Lutzer, James W. Maxwell, Stephen B. Rodi, 2002 *Subject Catalog, 1980* Library of Congress, 1980 In Search of the Movement Benjamin Hedin, 2015-03-09 Benjamin Hedin went looking for the civil rights movement s past but he also ran

smack into the present which can suddenly look like the past and then just as suddenly look totally different By bringing stirring people like Septima Clark into focus Hedin does what good historians do but by entwining history with current events he does a lot more Here is a haunting meditation on living in history as well as with it Sean Wilentz author of *The Rise of American Democracy* Jefferson to Lincoln *In Search of the Movement* is a true marvel Benjamin Hedin's insightful combination of reportage and history of the Civil Rights movement allows us to see the era with fresh eyes By tracing the continued legacy of the black freedom struggle from the 1960s to the present this gem of a book wonderfully illuminates how the movement is living and thriving in our own time Peniel Joseph author of *Stokely A Life and Waiting Til the Midnight Hour* A Narrative History of Black Power in America Beloved community and the exuberant humanism of the Civil Rights movement have never been so vividly rendered Carry this book with you as a guide through our own anxious age Beautifully written sharply observed whimsical and tender *In Search of the Movement* is a road trip into America's better self Charles Marsh author of *God's Long Summer* Stories of Faith and Civil Rights In March of 1965 Martin Luther King led thousands in an epic march from Selma Alabama to the state capital in Montgomery in what is often seen as the culminating moment of the Civil Rights movement The Voting Rights Act was signed into law that year and with Jim Crow eradicated and schools being desegregated the movement had supposedly come to an end America would go on to record its story as an historic success Recently however the New York Times featured an article that described the reversion of Little Rock's schools to all black or all white The next day the paper printed a story about a small town in Alabama where African Americans were being denied access to the polls Massive demonstrations in cities across the country protest the killing of black men by police while we celebrate a series of 50th anniversary commemorations of the signature events of the Civil Rights movement In such a time it is important to ask In the last fifty years has America progressed on matters of race or are we stalled or even moving backward With these questions in mind Benjamin Hedin set out to look for the Civil Rights movement I wanted to find the movement in its contemporary guise he writes which also meant answering the critical question of what happened to it after the 1960s He profiles legendary figures like John Lewis Robert Moses and Julian Bond and also visits with contemporary leaders such as William Barber II and the staff of the Dream Defenders But just as powerful and instructional are the stories of those whose work goes unrecorded the organizers and teachers who make all the rest possible In these pages the movement is portrayed as never before as a vibrant tradition of activism that remains in our midst *In Search of the Movement* is a fascinating meditation on the patterns of history as well as an indelible look at the meaning and limits of American freedom Benjamin Hedin has written for the New Yorker Slate the Nation and the Chicago Tribune He's the editor of *Studio A The Bob Dylan Reader* and the producer and author of a forthcoming documentary film *The Blues House*

Care in Mathematics Education Anne Watson, 2021-02-13 This book investigates the process of care in mathematics teaching The author proposes transformative educational spaces in which learning mathematics rather than consisting of a repetitive

grind of exercises and facts can become a part of learner identity This book describes examples of mathematics teachings in a wide range of contexts and pedagogies coordinated to identify common features where care for mathematical learning and thinking is combined with care for learners Along with detailing caring mathematics education practices in alternative spaces the author demonstrates similar practices alive even with the current mainstream spaces of acquisition and performance Care is integrated through listening and developing responsive and trusting relationships It will be of interest to scholars of mathematics education as well as pre service and in service teachers and teacher educators
