Environmental Choices Lawrence S. Rothenberg, 2002-02-01 Within a federal system government agencies and regulatory policies can be fractured even at odds with each other National actors share power with their counterparts in states and localities as do presidents with Congressional leaders and bureaucrats with judges Understanding the broad economic and political contexts of environmental policymaking illuminates the motivations behind policy choices of various interested parties from the National Park Service and the EPA to environmental activists and members of Congress Rothenberg utilizes basic economic ideas to provide not only a fresh look at how the U S deals with environmental ills but a way of thinking about policy making in general **Putting Trust in the US Budget** Eric M. Patashnik, 2000 In the United States many important programs are paid from trust funds At a time when major social insurance funds are facing insolvency this book provided the first comprehensive study of this significant yet little studied feature of the American welfare state Equally importantly the author investigates an enduring issue in democratic politics can current officeholders bind their successors By law trust funds which get most of their money from earmarked taxes are restricted for specific uses Patashnik asks why these structures were created and how they have affected political dynamics He argues that officeholders have

used trust funds primarily to reduce political uncertainty and bind distant futures Based on detailed case studies of trust funds in a number of policy sectors he shows how political commitment is a developmental process whereby precommitments shape the content of future political conflicts This book will be of interest to students of public policy political economy and American political development *Budget Options*, 2000 *Budget options* United States. Federal Estate? Holly Lippke Fretwell, 2009-03-16 Sewage seeping into creeks crumbling cabins and disintegrating roads dilapidated visitor centers catastrophic wildfires these are some of the sights awaiting visitors to federal lands today Federal agencies in charge of the public domain call for more support in the form of taxpayer dollars while constantly seeking to add to their holdings environmental groups call for increased restrictions on land use and resource development private citizens call for a return to the good old days of crisply tended crime free and unspoiled national parks All it seems overlook the sad fact that the existing federal estate is in terrible shape badly maintained and managed and with no immediate hope for improvement Will more money more restrictions more regulations address the problems that plague America's public domain No Rather real improvement requires reform of the managing institutions Who Is Minding the Federal Estate is a book intended for any reader with an interest in improving the condition of our public lands It begins by examining the origins of the federal estate which though originally intended to be a temporary clearinghouse now comprises a third of the U S

landmass The book describes the evolution of laws governing that estate and of the public conception of wilderness once thought to be abundant and in need of taming now considered to be inviolable and even sacrosanct In non technical prose that draws on economic theory and empirical analysis it systematically investigates patterns of federal land management and more to the point mismanagement The book closes by offering a set of alternatives that will improve stewardship of the federal estate both by incorporating more private initiatives and by freeing those lands from the grasp of politicians who come and go in favor of a sustainable long term management ethic These alternatives come unshackled by policies that lead to disasters such as the recent and ongoing epidemic of massive fires sweeping the forests of t Legislative Calendar
