Simulation Training through the Lens of Experience and Activity Analysis Simon Flandin, Christine Vidal-Gomel, Raquel Becerril Ortega, 2022-02-21

This book offers various ways in which analyzing professional experience and activity in simulation training makes it possible to describe practice based learning affordances and processes. Research has been conducted in various simulation programs in the domains of healthcare, victim rescue and population protection involving healthcare workers, firemen, policemen, servicemen and civil security leaders. Work as done, training as done in simulation has been analyzed with ergonomics, occupational psychology and vocational training approaches. The authors describe and discuss theoretical, methodological and/or practical issues related to practitioner experience and activity in simulation training. The book also provides evidence on the conditions under which lived experience in simulation can foster or hinder learning and derives appropriate orientations for simulation design and implementation.

Le projet de logements collectifs Michel Platzer, Michel Vivinis, 2025-07-09

La France compte plus de 16 millions de logements collectifs qui sont sociaux ou privés et plus de 200 000 logements collectifs neufs sont construits chaque année. La demande en logements est toujours élevée particulièrement dans les zones tendues. Où et pour qui construire? Comment bien construire? Quel équilibre économique viser? Cet ouvrage aborde ces grandes questions en quatre parties en proposant d'abord un état des lieux des spécificités du logement collectif en France depuis ses origines jusqu'aux caractéristiques actuelles de la demande. La complémentarité entre logement privé et logement social est mise en évidence et il construit certains préjugés concernant ce dernier. Puis il rappelle les principales lois qui ont façonné le secteur du logement, l'évolution des surfaces et présente les bases des réglementations actuelles applicables au logement collectif, notamment en matière de sécurité incendie, d'exigences environnementales et d'accessibilité. Cet ouvrage expose ensuite les enjeux liés à la programmation d'un projet de construction de logements collectifs. Il guide le maître d'ouvrage pas à pas dans l'expression des besoins depuis les parties communes jusqu'aux façades en passant par chaque pièce du logement. Enfin il décrit le déroulement et les points clés d'une opération immobilière: promotion privée, locatif social, emprise d'ouvrage, directe acquisition en Vendée et conception rationalisation. Il détaille notamment le rôle et les stratégies des principaux acteurs: promoteur, organisme de logement social, instances autorisant le projet, maire, Caisse des dépôts, Action Logement, banques, etc. et analyse en construction sociale comme en promotion privée, les postes de dépenses et l'équilibre économique des projets. Enrichi de nombreuses illustrations, photos, schémas, tableaux et logigrammes, cet ouvrage pratique et technique aborde aussi bien l'histoire que l'économie du logement collectif. Il est destiné aux acteurs de ce secteur: élus locaux, ingénieurs et techniciens, architectes et maîtres d'œuvre, promoteurs et organismes de logement social qui ont en charge de participer, accompagner et coordonner ceux qui construisent ou réalisent un projet de logements collectifs.
