China's and India's strategic interests overlap in this region both in maritime strategic competition or conflict which might be played out in the Bay of Bengal the Malacca and Singapore Straits and the South China Sea The sea lines of communication SLOCs through Southeast Asian waters constitute vital choke points between the Indian and Pacific Oceans carrying essential energy supplies for China and other Northeast Asian countries Any strategic competition between China and India has implications for other major maritime players in the Pacific and Indian Oceans especially Australia the Republic of Korea and Japan as well as the US This book identifies possible cooperative and confidence building measures that may contribute to enhanced relations between these two major powers and dampen down the risks associated with their strategic competition

Bibliography Christian L. Wiktor, L.A. Foster, 2024-12-02 **Indonesia's Delimited Maritime Boundaries** Vivian Louis Forbes, 2014-05-06 This book examines the delimited maritime boundaries of Indonesia with its neighbours. It features carefully drawn maps based on the geographical coordinates of the defined maritime boundaries, the reproduction of a complete set of the primary documents with direct relation to the boundaries and a comprehensive narrative on the geography and the historical development of the archipelagic State. Indonesia has an immense maritime domain that encompasses much of the sea between Australia and the Asian mainland. In addition, Indonesia is itself made up largely of water in excess of 17 000 islands. Indonesia's archipelagic and territorial waters together form about three fifths of the country's sovereign territory. This book offers readers clear accessible information on the maritime boundaries of the world's largest archipelagic state.

Southeast Asia Transformed Chia Lin Sien, 2003 Southeast Asia with a total population of 520 million remains a region characterized by fragmentation, diversity and considerable internal conflict despite the unifying influence of the Association of Southeast Asian Nations (ASEAN) formed some thirty five years ago. In the new millennium it has lost the distinction of being one of the world's faster growing group of economies since the 1997 financial crisis. While it has benefited from the winds of globalization it has now to cope with the painful adjustments to problems that stem from the inadequacies of good governance and structural changes.

Marsh, 2018-12-18 This volume brings together a cross section of marine experts who provide a comprehensive exploration of the major facets of Asia's marine sector. Blue Security in the Indo-Pacific Ian Hall, Troy Lee-Brown, Rebecca Strating, 2024-11-14 This book advances a holistic conceptualisation of maritime security under the term Blue Security and situates it in states across the Indo Pacific. The Indo Pacific encompasses a vast space incorporating two of the planet's biggest oceans, the Indian Ocean and Pacific Ocean, as well as littoral and hinterland states home to half the world's population. Security challenges abound across the maritime Indo Pacific, ranging from the risk of inter state war at sea to so called blue crimes like piracy, smuggling and illegal fishing. Climate change and marine pollution, as well as the over exploitation of scarce and sometimes fragile resources, also pose threats to human security, sustainability and biodiversity. Using the concept of Blue Security, this book assesses these various challenges and analyses the approaches to their management used by Indo Pacific states. It argues that we should embrace a holistic understanding of maritime security incorporating national, regional, international, human and environmental dimensions. To that end, it explores the Blue Security strategies of 18 Indo Pacific states, examining their changing perceptions of threat, their

approaches to managing those challenges and their capabilities The volume makes an innovative contribution to our knowledge of a region crucial to global security and prosperity This book will be of interest to students of maritime strategy security studies Asian politics and International Relations The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license
