guides researchers and graduate students of virtually any discipline in the creation of compelling science communication. Most scientists never receive formal training in the creation, delivery and evaluation of such material yet it is essential for publishing in high quality journals, soliciting funding, attracting lab personnel and advancing a career. This clear, readable volume fills that gap and provides visually intensive guidance at every step from the construction of original figures to the presentation and delivery of those figures in papers, slideshows, posters and websites. It provides pragmatic advice on the preparation and delivery of exceptional scientific presentations, demonstrates hundreds of visually striking presentation techniques, giving readers inspiration for creating their own and is structured so that readers can easily find answers to particular questions. Clear heading for each section indicates its message, highlighted with graphic illustrations. Two summary paragraphs that complement the visual images and clearly discuss the main point. Numerous examples of high quality figures, page layouts, slides, posters and web pages to help stimulate readers' ideas for their own presentations. Numerous before and after examples to illustrate the contrast between poor and outstanding presentations.

Thomas Prendergast, 1875      *Dialects at School* Jeffrey Reaser, Carolyn Temple Adger, Walt Wolfram, Donna Christian, 2017-05-12. Like its predecessor *Dialects in Schools and Communities*, this book illuminates major language-related issues that educational practitioners confront, such as responding to dialect-related features in students' speech and writing, teaching Standard English, teaching students about dialects and distinguishing dialect difference from language disorders. It approaches these issues from a practical perspective rooted in sociolinguistic research with a focus on the research base for accommodating dialect differences in schools. Expanded coverage includes research on teaching and learning and attention to English language learners. All chapters include essential information about language variation, language attitudes and principles of handling dialect differences in schools. Classroom-based samples illustrating the application of these principles and an annotated resources list for further reading. The text is supported by a Companion Website [www.routledge.com/cw/Reaser](http://www.routledge.com/cw/Reaser) providing additional resources including activities, discussion questions and audio-visual enhancements that illustrate important information and/or pedagogical approaches. Comprehensive and authoritative, *Dialects at School* reflects both the relevant research bases in linguistics and education and educational practices concerning language variation. The problems and examples included are authentic, coming from the authors' own research observations and interactions in public school classrooms and feedback in workshops. Highlights include chapters on oral language and reading and writing in dialectally diverse classrooms as well as a chapter on language awareness for students offering a clear and compelling overview of how teachers can inspire students to learn more about language variation including their own community language patterns. An inventory of dialect features in the Appendix organizes and expands on the structural descriptions presented in the chapters.
