Masterless Self And Society In Modern America:

The Masterless Wilfred M. McClay,1994 Includes bibliographical references and index **The Masterless** Wilfred M. McClay,1994 **Self, Senility, and Alzheimer's Disease in Modern America** Jesse F. Ballenger,2006-03-31 Historian Jesse F Ballenger traces the emergence of senility as a cultural category from the late nineteenth century to the 1980s a period in which Alzheimer s disease became increasingly associated with the terrifying prospect of losing one s self Changes in American society and culture have complicated the notion of selfhood Ballenger finds No longer an ascribed status selfhood must be carefully and willfully constructed Thus losing one s ability to sustain a coherent self narrative is considered one of life s most dreadful losses As Ballenger writes senility haunts the landscape of the self made man Stereotypes of senility and Alzheimer s disease are related to anxiety about the coherence stability and agency of the self stereotypes that are transforming perceptions of old age in modern America Drawing on scientific clinical policy and popular discourses on aging and dementia Ballenger explores early twentieth century concepts of aging and the emergence of gerontology to understand and distinguish normal aging from disease In addition he examines American psychiatry s approaches to the treatment of senility and scientific attempts to understand the brain pathology of dementia Ballenger s work contributes to our understanding of the emergence and significance of dementia as a major health issue **Loneliness** Keming Yang,2019-01-30 In recent years its medical implications have brought loneliness to the centre of attention of mass media government agents and the general public However as this volume demonstrates loneliness is not merely a psychological individual or health issue In multiple ways it is a serious social problem as well Yang urges fellow researchers and scientists to broaden the existing definition and classification of loneliness to measure loneliness with greater accuracy and to establish more specifically the connection between loneliness and particular illness Drawing on vast sources of data including literary works case studies and large scale sample surveys covering a broad spectrum of countries Europe and beyond the empirical research of this study produces and presents simple but effective evidence for the social nature and variations of loneliness Examining loneliness at higher levels including ethnic groups classes national cultures and societies Loneliness will appeal to students and researchers interested in areas such as sociology psychology and mental health Republic of Drivers Cotten Seiler,2009-05-15 Rising gas prices sprawl and congestion global warming even obesity driving is a factor in many of the most contentious issues of our time So how did we get here How did automobile use become so vital to the identity of Americans Republic of Drivers looks back at the period between 1895 and 1961 from the founding of the first automobile factory in America to the creation of the Interstate Highway System to find out how driving evolved into a crucial symbol of freedom and agency Cotten Seiler combs through a vast number of historical social scientific philosophical and literary sources to illustrate the importance of driving to modern American conceptions of the self and the social and political order He finds that as the figure of the driver blurred into the figure of the citizen automobility became a powerful resource for

women African Americans and others seeking entry into the public sphere And yet he argues the individualistic but anonymous act of driving has also monopolized our thinking about freedom and democracy discouraging the crafting of a more sustainable way of life As our fantasies of the open road turn into fears of a looming energy crisis Seiler shows us just how we ended up a republic of drivers and where we might be headed **Transactions of the Royal Historical Society: Volume 11** Royal Historical Society,2003-03-06 The annual collection of articles from the Royal Historical Society

Constructing Corporate America Kenneth Lipartito,David B. Sicilia,2004 This collection of cutting edge research reviews the evolution of the American corporation the dominant trends in the way it has been studied and at the same time introduces some new perspectives on the historical trajectory of the business organization as a social institution The authors draw on cultural theory anthropology political theory and legal history to consider the place of the firm in nineteenth and twentieth century American Society **Arendt and America** Richard H. King,2015-10-20 German Jewish political philosopher Hannah Arendt 1906-75 fled from the Nazis to New York in 1941 and during the next thirty years in America she wrote her best known and most influential works such as *The Human Condition* *The Origins of Totalitarianism* and *On Revolution* Yet despite the fact that a substantial portion of her oeuvre was written in America not Europe no one has directly considered the influence of America on her thought until now In *Arendt and America* historian Richard H King argues that while all of Arendt's work was haunted by her experience of totalitarianism it was only in her adopted homeland that she was able to formulate the idea of the modern republic as an alternative to totalitarian rule Situating Arendt within the context of U S intellectual political and social history King reveals how Arendt developed a fascination with the political thought of the Founding Fathers King also re-creates her intellectual exchanges with American friends and colleagues such as Dwight Macdonald and Mary McCarthy and shows how her lively correspondence with sociologist David Riesman helped her understand modern American culture and society In the last section of *Arendt and America* King sets out the context in which the Eichmann controversy took place and follows the debate about the banality of evil that has continued ever since As King shows Arendt's work regardless of focus was shaped by postwar American thought culture and politics including the Civil Rights Movement and the Cold War For Arendt the United States was much more than a refuge from Nazi Germany it was a stimulus to rethink the political ethical and historical traditions of human culture This authoritative combination of intellectual history and biography offers a unique approach for thinking about the influence of America on Arendt's ideas and also the effect of her ideas on American thought **American Educational History Revisited** Milton Gaither,2003 Milton Gaither is an assistant professor of education at Messiah College in Grantham Pennsylvania *Civic and Moral Learning in America* D. Warren,J. Patrick,2006-04-17 From its formative years to the present advocates of various persuasions have written and spoken about the country's need for moral and civic education Responding in part to challenges posed by B Edward McClellan this book offers research findings on the ideas people and contexts that have influenced the acquisition of

moral and civic learning in the America *The Politics of Authenticity* Douglas Charles Rossinow,1998 In the 1960s a left wing movement emerged in the United States that not only crusaded against social and economic exploitation but also confronted the problem of personal alienation in everyday life These new radicals young white raised in relative affluence struggled for peace equality and social justice Their struggle was cultural as well as political a search for meaning and authenticity that marked a new phase in the long history of American radicalism *Immigration, Assimilation, and the Cultural Construction of American National Identity* Shannon Latkin Anderson,2015-11-19 Over the course of the 20th century there have been three primary narratives of American national identity the melting pot Anglo Protestantism and cultural pluralism multi culturalism This book offers a social and historical perspective on what shaped each of these imaginings when each came to the fore and which appear especially relevant early in the 21st century These issues are addressed by looking at the United States and elite notions of the meaning of America across the 20th century centering on the work of Horace Kallen Nathan Glazer and Daniel Patrick Moynihan and Samuel P Huntington Four structural areas are examined in each period the economy involvement in foreign affairs social movements and immigration What emerges is a narrative arc whereby immigration plays a clear and crucial role in shaping cultural stories of national identity as written by elite scholars These stories are represented in writings throughout all three periods and in such work we see the intellectual development and specification of the dominant narratives along with challenges to each Important conclusions include a keen reminder that identities are often formed along borders both external and internal that structure and culture operate dialectically and that national identity is hardly a monolithic static formation Figures in the Carpet Wilfred M. McClay,2007-01-02 *Figures in the Carpet* presents a stellar roster of first rate historians dealing seriously with a perennially important subject The case studies and more theoretical accounts in this book amount to an unusually perceptive assessment of how the person has been viewed in American history *Story of American Freedom* Eric Foner,1999-09-07 Freedom is the cornerstone of his sweeping narrative that focuses not only congressional debates and political treatises since the Revolution but how the fight for freedom took place on plantation and picket lines and in parlors and bedrooms **The Age of Charisma** Jeremy C. Young,2017 This book demonstrates how the modern relationship between leaders and followers in America grew out of late nineteenth and early twentieth century charismatic social movements **Merchants and Ministers** Kevin Schmiesing,2016-12-14 Two of the most influential forces in American history are business and religion *Merchants and Ministers* weaves the two together in a history of the relationship between businesspeople and Christian clergy From fur traders and missionaries who explored the interior of the continent to Gilded Age corporate titans and their clerical confidants to black businessmen and their ministerial collaborators in the Civil Rights movement *Merchants and Ministers* tells stories of interactions between businesspeople and clergy from the colonial period to the present It presents a complex picture of this relationship highlighting both conflict and cooperation between the two groups By placing anecdotal

detail in the context of general developments in commerce and Christianity Merchants and Ministers traces the contours of American history and illuminates those contours with the personal stories of businesspeople and clergy Religion, Scholarship, and Higher Education Andrea Sterk, 2002-01-17 Religion Scholarship and Higher Education explores foundational issues surrounding the interaction of religion and the academy in the twenty first century Featuring the work of eighteen scholars from diverse institutional disciplinary and religious backgrounds this outstanding collection of essays issues from a three year Lilly Seminar on Religion and Higher Education Reflecting the diversity of the seminar participants this insightful volume presents a wide variety of viewpoints on the role of religion in higher education and different approaches to religiously informed scholarship and teaching Religion Scholarship and Higher Education is distinct in its orientation toward the personal and the practical Contributors use personal examples to demonstrate how individual religious beliefs and backgrounds shape the way an educator approaches research and teaching The first part of the book addresses foundational issues offering a range of perspectives on the current state of affairs and future prospects for the interrelation of religion and academic endeavor Part II treats specific academic disciplines as they relate to religion and research and provides several models of scholarship grounded in or informed by religious traditions The final section of the volume presents five different approaches to teaching Contributors reflect on how religious perspectives or commitments influence the way in which they understand their role as university or college teachers and carry out their responsibilities in the classroom Sure to capture the interest of scholars teachers and administrators alike this volume features essays from Nicholas Wolterstorff James Turner Alan Wolfe David A Hollinger Mark R Schwehn John McGreevy Nancy T Ammerman Roger Lundin Brian E Daley S J Clarke E Cochran Serene Jones Richard J Bernstein Mark A Noll Denis Donoghue Robert Wuthnow Jean Bethke Elshtain Susan Handelman and Francis Oakley **The Making of the American Creative Class** Shannan Clark, 2021 The Making of the American Creative Class narrates the history of workers in New York s publishing advertising design and broadcasting industries and their efforts to improve their working conditions set against the backdrop of the economic dislocations of twentieth century capitalism **William James at the Boundaries** Francesca Bordogna, 2008-12 At Columbia University in 1906 William James gave a highly confrontational speech to the American Philosophical Association APA He ignored the technical philosophical questions the audience had gathered to discuss and instead addressed the topic of human energy Tramping on the rules of academic decorum James invoked the work of amateurs read testimonials on the benefits of yoga and alcohol and concluded by urging his listeners to take up this psychological and physiological problem What was the goal of this unusual speech Rather than an oddity Francesca Bordogna asserts that the APA address was emblematic it was just one of many gestures that James employed as he plowed through the barriers between academic popular and pseudoscience as well as the newly emergent borders between the study of philosophy psychology and the science of man Bordogna reveals that James s trespassing of boundaries was an essential

element of a broader intellectual and social project By crisscrossing divides she argues James imagined a new social configuration of knowledge a better society and a new vision of the human self As the academy moves toward an increasingly interdisciplinary future William James at the Boundaries reintroduces readers to a seminal influence on the way knowledge is pursued American Mythos Robert Wuthnow, 2009-02-09 America was built on stories tales of grateful immigrants arriving at Ellis Island Horatio Alger style transformations self made men and the Protestant work ethic In this new book renowned sociologist Robert Wuthnow examines these most American of stories narratives about individualism immigration success religion and ethnicity through the eyes of recent immigrants In doing so he demonstrates how the American mythos has both legitimized American society and prevented it from fully realizing its ideals This magisterial work is a reflection and meditation on the national consciousness It details how Americans have traditionally relied on narratives to address what it means to be strong morally responsible individuals and to explain why some people are more successful than others in short to help us make sense of our lives But it argues that these narratives have done little to help us confront new challenges We pass laws to end racial discrimination yet lack the resolve to create a more equitable society We welcome the idea of pluralism in religion and values yet we are shaken by the difficulties immigration presents We champion prosperity for all but live in a country where families are still homeless American Mythos aptly documents this disconnect between the stories we tell and the reality we face Examining how cultural narratives may not and often do not reflect the reality of today's society it challenges readers to become more reflective about what it means to live up to the American ideal
