Masters Of Modern Architecture:

Masters of Modern Architecture Edwin Hoag, Joy Hoag, 1977 Discusses the founding of modern architecture through the lives and works of four important architects **Masters of modern architecture; Frank Lloyd Wright; public buildings**, 1970 **Age of the Masters** Reyner Banham, 1975 The Age of the Masters was the age of an architectural revolution that lasted over fifty years from Charles Rennie Mackintosh's Glasgow Art School at the beginning of the century to Mies van der Rohe's National Gallery in Berlin at the end of the sixties While they lived the Masters comprised some of the most powerful architectural talents the Western world has yet produced and at least two men of towering genius Frank Lloyd Wright and Le Corbusier Their aspirations for the future of men cities and society may have been thwarted but the prototypes they created still reflect the light of their creative fervor Masters of Modern Architecture, 1971 *The Age of the Masters* Reyner Banham, 1978 *Masters of Modern Architecture* John Peter, 1958 Photographs of selected works of 62 architects from various parts of the world Masters of Modern Architecture. [Photographs, with Introductory and Analytical Notes by John Peter. With Biographies.]. MASTERS., John PETER (Writer on Architecture.), 1958 **Masters of Modern Architecture** Outlet, Outlet Book Company Staff, Rh Value Publishing, 1988-12-12 **Masters of modern architecture; Paul Rudolph**, 1971 *A Concise History of Modern Architecture in India* Jon T. Lang, 2002 In Lucid Language That Speaks To Laymen And Architects Alike This Book Provides A History Of Twentieth Century Architecture In India It Examines In Detail The Early Influences On Indian Architecture Both Of Movements Like The Bauhaus As Well As Prominent Individuals Like Habib Rehman Jawaharlal Nehru Frank Lloyd Wright And Le Corbusier **Japanese Modern Architecture 1920-2015** Ari Seligmann, 2016-11-30 Japanese Modern Architecture 1920 2015 uses a series of thematic lenses to explain the rich history of Japanese architectural developments from the 1920s foundation of modern architecture to contemporary permutations of modern and post modern architecture The book introduces the diversity of Japanese architecture and traces the evolution of Japanese architecture in the context of domestic and international developments It examines the relationship between architecture and nature and explores various approaches to craft and material Finally this new book considers tensions between refinement and ostentation in architectural expression Of interest to students of architecture and anyone with an interest in Japanese post war culture and superbly illustrated with 95 colour images Southern Vietnamese Modernist Architecture Mel Schenck, 2020-04-21 Southern Vietnamese Modernist Architecture features beautiful architectural photography that illustrates the outstanding accomplishment of the people of southern Vietnam in developing a mid century modernist architecture that is extraordinary in the world Especially for Americans Vietnam has been a war instead of a country The world didn't notice that the Vietnamese were simultaneously constructing modern apartment buildings houses large public buildings and public housing as they developed a new nation And the world didn't anticipate that this architecture would be so overtly modernist rather than an adaption of traditional Vietnamese designs to the continuation of

colonial architecture In the mid twentieth century southern Vietnamese architects developed a version of modernist architecture that accommodated the tropical climate and reflected the identity of a newly independent culture It demonstrates the innate sense of design of Vietnamese and it represented the outlook of the people of southern Vietnam as they looked towards the future even in the face of war The vast quantity and quality of Vietnamese modernist buildings constructed throughout southern Vietnam made Vietnam an unrecognized center of modernism in the world Most importantly the southern Vietnamese as a culture embraced modernism and it became the vernacular architecture of the culture for dwellings This architecture features an interplay between masses and voids that provides a much more vibrant version of modernist architecture This style fills the gaps between the functionalism of the International Style and the quest for identity and spirit that has been lacking in modernism worldwide American architect Mel Schenck is a long term immigrant to Vietnam and has been studying this architecture since he was surprised by the extent and quality of modernist architecture in Saigon when he first lived there in 1971 72 He and photographer Alexandre Garel accumulated a database of 400 buildings and 4 000 photographs in southern Vietnam to serve a comprehensive analysis of the history and characteristics of this distinctive architecture Architectural historians aficionados of modernist architecture and anyone interested in Vietnamese culture will find that this book is a positive story about Vietnamese aspirations for independence and the value of modernist architecture in living in the world today

Beyond Modernist Masters Felipe Hernández, 2009-11-20 Latin America has been an important place for

architecture for many decades Masters like Barrag n Dieste Lina Bo Bardi and Niemeyer pointed the way for architectural design all over the world and they continue to do so today Their approach to colors materials and walls had a deep and lasting influence on architectural modernism Since then however and especially in the last fifteen years architecture on the continent has continued to evolve and a lively and extremely creative architecture scene has developed The work of Latin American architects and city planners is often guided by social issues for example the approach to informal settlements on the outskirts of big cities the scarcity of housing and public space the availability of affordable transportation and the important role of cultural infrastructure such as schools libraries and sports facilities as a catalyst for neighborhoods Within this context the book considers numerous projects that have prompted discussion and provided fresh impetus all across Latin America Outstanding projects like the Santo Domingo Library in Medellin Colombia by Giancarlo Mazzanti Alberto Kalach s Liceo Franco Mexicano in Mexico and the works of Alejandro Aravena in Chile show that recent Latin American architecture is more than capable of holding its own beside the works of the founders Felipe Hernandez is an architect and professor of Architectural Design History and Theory at The University of Liverpool He attended an MA in Architecture and Critical Theory graduating with distinction in 1998 and received his PhD from the University of Nottingham in 2003 He has taught at the Bartlett School of Architecture UCL The Universities of Nottingham Sheffield East London and Nottingham Trent in the United Kingdom as well as at Brown University and Roger Williams University in USA Felipe has published numerous essays and articles examining the situation of contemporary Latin American cities and revealing the multiplicity of architectural practices that operate simultaneously in the constant re shaping of the continent s cities *Modern Architecture* Graham Livesey, 2024-11-15 *Modern Architecture The Basics* examines technological stylistic socio political and cultural changes that have transformed the history of architecture since the late 18th century Broad definitions of modernity and postmodernity introduce the book which comprises 24 short thematic chapters looking at the concepts behind the development of modern and postmodern architecture These include major historical movements key figures and evolving building typologies There is also an emphasis on the changing city during the 19th and 20th centuries Approaches to representation and its impacts on architecture are studied along with the changing global role of architecture as cultural expression The book introduces new topics including gender race postcolonialism and indigeneity An undaunting contemporary and inclusive account of modern architectural history this is a must read for all students of architecture as well as those outside the discipline approaching the subject for the first time **Bruno Zevi on Modern Architecture** Andrea Oppenheimer Dean, Bruno Zevi, 1983

American Architects and Texts Juan Pablo Bonta, 1996 In this volume the author analyzes 400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects the text includes a ranked list of the 100 most famous architects **Modern Architecture Since 1900** William J. R. Curtis, 1982 Om Grundtvigskirken s 240 41 ill Ark P V Jensen Klint **A Critical**

History of Contemporary Architecture Dr Elie G Haddad, Asst Prof David Rifkind, Ms Sarah Deyong, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010. The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects.

The Historic Urban Landscape Francesco Bandarin, Ron van Oers, 2012-03-19 Much of the current debate on how we should preserve our cultural heritage revolves around urban sites, historic monuments in urban settings, historic districts or complete historic towns. The growing complexity of urban heritage conservation makes reaching a consensus on how to manage urban heritage difficult. Additionally, the sharp increase in the world's population now living in urban areas combined with a lack of policies to facilitate a sustainable use of heritage assets means the pressure on historic sites is set to rise. Unless new and innovative ways of managing these sites can be agreed on, there is a real danger that historic cities as we know them today will not survive the first decades of the 21st century. The Historic Urban Landscape: Managing Heritage in an Urban Century offers a comprehensive overview of the intellectual developments in urban conservation. The book examines its modern interpretations and critiques and the way in which the classical approach has been challenged by the evolution of the conceptual and operational context of urban management. Analyses are provided of how World Heritage sites are managed with associated debates and decisions to inform the development of local urban conservation policies and practices. The authors offer unique insights from UNESCO's World Heritage Centre and the book is richly illustrated with colour photographs. Examples are drawn from urban heritage sites worldwide from Timbuktu to Liverpool to demonstrate key issues and best practice in urban conservation today. The book offers an invaluable resource for architects, planners, surveyors and engineers worldwide working in heritage conservation as well as for local authority conservation officers and managers of heritage sites.
