Tucker, 2006-01-31 Ogy Sorai 1666 1728 was one of the greatest philosophers of early modern Japan This volume a monumental work of scholarship offers for the first time in any Western language unabridged and fully annotated translations of Sorai's masterpieces The Bend Distinguishing the Way and Benmei Distinguishing Names are works of political philosophy that define the theoretical foundation for a leadership exercising total power the best remedy in Sorai's view for a regime in crisis The translations are based on the 1740 Genbun 5 woodblock edition the first major edition of these seminal texts published during the Tokugawa period In his commentary John Tucker situates the Bend and Benmei in relation to Neo Confucianism via what is known as philosophical lexicography This genre which links Sorai's thinking with Neo Confucianism is traced to the early thirteenth century Song dynasty text the Xingli ziyi The Meanings of Neo Confucian Terms by Chen Beixi 1159 1223 Although Sorai was an unrelenting critic the Neo Confucian formulations of the great Song synthesizer Zhu Xi 1130 1200 his thinking remained due to its genre methodology and conceptual repertory essentially a radical revision of Neo Confucian discourse Tucker's introduction also examines the reception of Sorai's two Ben during the remainder of the Tokugawa calling attention to radical tendencies in later developments of Sorai's thought as well as to the increasingly scathing critiques of his Chinese approach to philosophy language and politics Finally it traces the vicissitudes of the two Ben in modern Japanese intellectual history and their role in the formation of the ideas of Meiji intellectuals such as Nishi Amane 1829 1897 and Kato Hiroyuki 1836 1916 As before however Sorai came under attack this time for his supposed irreverence toward the throne the Japanese people and the imperial nation state Though an unpopular philosophy in early twentieth century Japan in the postwar years Sorai's thought was interpreted by Maruyama Masao and others as an important modernizing force While it critiques such

ideologically grounded attempts to cast Sorai's Bend and Benmei as theoretical contributions to political modernization. Tucker's study nevertheless acknowledges that Sorai's masterworks in their concern for language analysis as the way to solve philosophical problems share significant common ground with the analytic approach to philosophy pioneered by various twentieth century Anglo American philosophers.

Daredevil Masterworks Vol. 4 Marvel Comics, 2016-02-11 Collects Daredevil 1964 33 41 Fantastic Four 1961 73 It's an identity crisis for Daredevil as Matt Murdock juggles a bevy of baddies seeking to sully his good name while he juggles the triple identity of Matt Murdock Mike Murdock and DD. After a dust up with the Beetle the Trapster attempts to trick the Fantastic Four into attacking DD by disguising himself as none other than ol' hornhead himself. Wiser minds prevail but only until none other than Dr. Doom steps up to the plate. In one of Daredevil's most amazing Silver Age adventures he goes toe to toe with Doc Doom in opposite toes. You guessed it the Latverian monarch switches bodies with Daredevil bringing on a battle that drags the Fantastic Four Spider-Man Thor into the mix in one of Marvel's first crossover bonanzas. As if kicking him out of his own body wasn't enough next the Exterminator tries to evict Daredevil from the time stream. With the Unholy Three at his employ to clobber the hornhead back into the Stone Age he's got a good chance of succeeding cause there's at least one cast member that won't be making it out of this adventure alive.

The Four Masterworks of the Ming Novel Andrew H. Plaks, 2025-03-11 A reinterpretation of some of the great works of Chinese fiction of the late Ming dynasty. In this book Andrew Plaks reinterprets the great texts of Chinese fiction known as the Four Masterworks of the Ming Novel: *ssu ta ch i shu*. Arguing that these are far more than collections of popular narratives, Plaks shows that their fullest critical revisions represent a sophisticated new genre of Chinese prose fiction arising in the late Ming dynasty, especially in the sixteenth century. He then analyzes these radical transformations of prior source materials which reflect the values and intellectual concerns of the literati of the period.

Maybe painted furniture hits a chord with you or woodturned bowls, wooden clocks or gilded flowers. From all parts of the earth and from all periods of history these artists find inspiration in sources that excite the imagination and you will too once you see these projects in all their impressive photographic splendor.

Masterworks of Technology E. E. Lewis, 2010-05 In this absorbing exploration of technological creativity throughout the ages, E. E. Lewis, professor of mechanical engineering at Northwestern University, eloquently tells the story of how science and engineering, which had little in common until a few hundred years ago, came together to create the technological world of the 21st century. Today's technology is the product of a fascinating synergy of science's search for comprehension of the material universe and engineering's drive to build things and make them work. In the 20th century this synergy achieved many unprecedented successes, the most spectacular of which is

arguably the first moon landing of the Apollo program Rocket science now symbolic of humanity's most complex technological endeavors is the culmination of centuries of achievements by architects of pyramids and cathedrals medieval craft guilds and pioneering inventors and scientists from the Renaissance through the Industrial Revolution Melding his own personal experiences from visiting Chartres Cathedral to flying aboard a Boeing 777 with vivid historical vignettes the author skillfully demonstrates the importance of craft tradition scientific method production organization economics and more to the creation of modern technology The many topics that Lewis illuminates include the slow evolution of the wheelwright's craft the background and training of the architect engineers who undertook the construction of medieval cathedrals the importance of patronage and venture capitalists in realizing the big ideas of past and present the increasing use of visualization as seen in Leonardo's notebooks Galileo's immense contribution of bringing science and engineering together the increasing importance of basic science as the seedbed of engineering and design innovations the challenge of attempting unprecedented feats while minimizing risk as exemplified by space flight and much more Whether Lewis is discussing the distribution of weight along flying buttresses the challenges faced by Morse in engineering the telegraph or the Apollo program's monumental team effort the author's deep knowledge of and enthusiasm for his subject and his gift for engaging lively prose make for a fascinating exploration of science and engineering through the ages E E Lewis Evanston IL the former chair of the Department of Mechanical Engineering is professor of mechanical engineering at the McCormick School of Engineering and Applied Science at Northwestern University He is the author of three engineering textbooks and numerous journal articles
