Autonomy is the feeling of being in control and working in a way that feels natural.

Purpose is the knowledge that the work actually matters.

The Fulfilling Workplace Ronald J. Burke,2016-03-09 It is very easy for organizations to ignore or overlook the impact of social and commercial change of increased pressure to deliver profit above all else and of transformation in the ways in which we are now working on the mental health and consequently the performance of their employees And yet there is plenty of evidence that in many workplaces performance is down stress is up and professional employees are struggling to balance their home and work lives This collection while looking at individuals places the spotlight on organizational initiatives to support the development of attitudes values character and behaviors in employees The aim of these initiatives is to increase our resilience to those experiences and events which impact on performance There is a particular focus on managerial and professional jobs where employee discretion and commitment are critical The Fulfilling Workplace extends the themes developed in early titles in the Psychological and Behavioral Aspects of Risk Series deeper into organizations to explore the organization s role in coming to grips both with human frailties and toxic workplaces both destructive to individual and organizational health **Mastery at Work** Nicole Grace,2004-10-01 *Masculinity and Femininity* Janet T. Spence,Robert L. Helmreich,2014-11-06 Many societies assign sharply distinguished roles to men and women Personality differences as well as physical differences between men and women are used to justify these different sex roles and women are seen as more emotionally and interpersonally sensitive than men while men are said to be more competent achievement oriented and assertive than women A widely held view is that not only do men and women differ but that possession of masculine characteristics precludes possession of feminine characteristics This bipolar conception has led to the definition of masculinity and femininity as opposites Acceptance of this idea has caused social scientists and laypersons to consider men and women who possess cross sex personality characteristics as less emotionally healthy and socially adjusted than those with sex appropriate traits Previous research by the authors and others done almost exclusively with college students has shown however that masculinity and femininity do not relate negatively to each other thus supporting a dualistic rather than a bipolar conception of these two psychological dimensions Spence and Helmreich present data showing that the dualistic

conception holds for a large number of groups varying widely in age geographical location socioeconomic status and patterns of interest whose psychological masculinity and femininity were measured with an objective instrument the Personality Attributes Questionnaire devised by the authors Many individuals are shown to be appropriately sex typed that is men tend to be high in masculinity and low in femininity and women the reverse However a substantial number of men and women are androgynous high in both masculine and feminine characteristics while some are not high in either Importantly the authors find that androgynous individuals display more self esteem social competence and achievement orientation than individuals who are strong in either masculinity or femininity or are not strong in either One of the major contributions of the work is the development of a new multifaceted measure of achievement motivation the Work and Family Orientation Questionnaire which can be used successfully to predict behavior in both males and females and is related to masculinity and femininity in both sexes In addition to investigating the correlates of masculinity and femininity the authors attempt to isolate parental factors that contribute to the development of these characteristics and achievement motivation The book includes analyses of data from students on their perception of their parents which enable the authors to examine the influence of parental masculinity and femininity and parental behaviors and child rearing attitudes on the development of masculinity and femininity and achievement motivation characteristics in their children The important implications of these findings for theories of sex roles personality development and achievement motivation are examined

Ethnopsychology Rolando Díaz-Loving, 2019-10-08 This book presents an overview of Mexican ethnopsychology an original theoretical and methodological approach that seeks to complement the mainstream psychological science based on universal principles processes and constructs with scientific methods to study the idiosyncratic features and behaviors typical of specific cultural groups It proposes a historic bio psycho socio cultural theoretical model to describe research findings of social psychological collective and individual phenomena Psychology is at a crossroads of years of research with stress on internal validity and little attention to contextual and cultural variables It becomes fundamental to continue on the internal validity track but at the same time incorporate external validity issues The growth of indigenous movements and data allows for a profound evaluation of the extents to which apparent universal phenomena are truly universal and to what extent they are idiosyncratic manifestations of the cultures where the mainstream research is conducted Mexican ethnopsychologists have been following this path for decades since the pioneer work of Rogelio D az Guerrero but until now little has been published in English about this innovative theoretical approach Ethnopsychology Pieces from the Mexican Research Gallery fills this gap by presenting the international community an overview of Mexican ethnopsychology and thus providing a useful tool to behavioral social and health scientists interested in understanding how culture shapes both collective and individual behaviors

Mastery's End Jeffrey Gray, 2005-01-01 Focusing on lyric poetry *Mastery's End* looks at important yet neglected issues of subjectivity in post World War II travel literature Jeffrey Gray departs from related studies in two regards nearly all recent scholarly books on the literature of travel have dealt with pre twentieth century periods and all are concerned with narrative genres Gray questions whether the postcolonial theoretical model of travel as mastery hegemony and exploitation still applies In its place he suggests a model of vulnerability incoherence and disorientation to reflect the modern destabilizing nature of travel a process that began with the unprecedented movement of people during and after World War II and has not abated since What the contemporary discourse concerning displacement border crossing and identity needs says Gray is a study of that literary genre with the least investment in closure and the least fidelity to ethnic and national continuities His concern is not only with the psychological challenges to identity but also with travel as a mode of understanding and composition Following a summary of American critical perspectives on travel from Emerson to the present Gray discusses how travel by nature defamiliarizes and induces heightened awareness Such phenomena Gray says correspond to the tenets of modern poetics traversing territories immersing the self in new object worlds reconstituting the known as unknown He then devotes a chapter each to four of the past half century's most celebrated English speaking western poets Elizabeth Bishop Robert Lowell John Ashbery and Derek Walcott Finally two multi poet chapters examine the travel poetry of Allen Ginsberg Gary Snyder and Robert Creeley Lyn Hejinian Nathaniel Mackey and others

Moral Emotion, Moral Cognition, and (Im)Moral Behavior in the Workplace Peixu He,Hongdan Zhao,Cuiling Jiang,Chuangang Shen,2023-09-27 Moral behavior is subject to socially accepted moral norms and also has a pervasive influence on organizational performance With the emergence of ethical issues found in organizations practitioners and scholars pay increasing attention to ethics management Therefore workplace moral behavior e g pro social behavior and organizational citizenship behavior OCB and immoral behavior e g interpersonal abusive behavior deviant counterproductive behavior and unethical pro organizational behavior have also received substantial research interests over the past decades To date the most common framework used to study moral behavior has been the cognitive approach with abundant evidence demonstrating that emotion and cognition are the two core elements in generating and influencing workplace im moral behavior However limited studies have been conducted to explore the emotional cognitive processes or integrative moral emotion cognition system relevant to workplace moral behavior Despite our knowledge of the antecedents and consequences of workplace im moral behaviors more research on the generating mechanism influencing mechanism transformation mechanism and governance strategies is needed For example it is unclear how exhibiting im moral behavior in the workplace would impact the actor s and the third party observer s emotions thoughts feelings and subsequent behavior Besides the question of whether ethical unethical leader behavior would trigger a trickle down effect is underdeveloped which refers to the fact that how the behavior or perception of the top leaders affects employees from top to bottom along the formal vertical power chain In addition we have little knowledge on when how and why the ethical employees the so called good soldiers would engage in workplace immoral behavior and vice versa **Automation and Utopia** John Danaher,2019-09-24

Automating technologies threaten to usher in a workless future But this can be a good thing if we play our cards right Human obsolescence is imminent The factories of the future will be dark staffed by armies of tireless robots The hospitals of the future will have fewer doctors depending instead on cloud based AI to diagnose patients and recommend treatments The homes of the future will anticipate our wants and needs and provide all the entertainment food and distraction we could ever desire To many this is a depressing prognosis an image of civilization replaced by its machines But what if an automated future is something to be welcomed rather than feared Work is a source of misery and oppression for most people so shouldn t we do what we can to hasten its demise Automation and Utopia makes the case for a world in which free from need or want we can spend our time inventing and playing games and exploring virtual realities that are more deeply engaging and absorbing than any we have experienced before allowing us to achieve idealized forms of human flourishing The idea that we should give up and retreat to the virtual may seem shocking even distasteful But John Danaher urges us to embrace the possibilities of this new existence The rise of automating technologies presents a utopian moment for humankind providing

both the motive and the means to build a better future **Leaders in Motion** Marta Wilson,2012 Mastery on a personal level is the defining advantage in the virtual world competition Here global competitors and the advance of new technologies require leaders to be constantly in motion transformational motion Personal mastery can launch and sustain a culture of transformation In a culture of transformation everyone has a leadership role testing clarity and commitment against their guiding vision so each person can contribute to achieving goals at unimagined levels through renewed focus direction and energy In a culture of transformation individuals rise to the occasion ready to step forward and seize opportunities in the relay of productivity innovation and services At the center of this team of individuals stands the authentic leader who fearlessly commits to sustaining creative motion by diving deep and achieving new levels of personal mastery Now Dr Marta Wilson offers her proven method for unleashing the full potential of every organization one leader at a time With its collection of wisdom and stories gathered from the author s colorful life and from leaders across the globe **LEADERS IN MOTION** is a guided reflection challenging us to tap our own potential to lead cultures of transformation and achievement
