*Mastering Your Fears and Phobias* Michelle G. Craske, Martin M. Antony, David H. Barlow, 2006-09-07 Specific Phobia is the most commonly occurring anxiety disorder with approximately 12.5% of the general population reporting at least one specific phobia during their lives. People may fear heights, flying, spiders, blood, water, and any other number of circumscribed objects or situations. Research has shown the most effective treatment for these fears and phobias is an exposure-based cognitive behavioral program. Written by renowned researchers, this Therapist Guide provides you with all the information you need to help your clients ease their anxiety and conquer their fears. Whether they are afraid of dentists, dogs, or driving, you can teach your clients the necessary skills to overcome their phobia in as little as a few weeks. The strategies outlined in this book include exposure exercises and cognitive restructuring techniques. The corresponding Workbook includes blank forms and records for tracking progress and allows the client to extend the therapeutic experience outside of the office. Together, both books form a comprehensive package that has proven to be the most effective and successful treatment available for specific phobia. Treatments That Work™ represents the gold standard of behavioral healthcare interventions. All programs have been rigorously tested in clinical trials and are backed by years of research. A prestigious scientific advisory board led by series Editor in Chief David H. Barlow reviews and evaluates each intervention to ensure that it meets the highest standard of evidence so you can be confident that you are using the most effective treatment available to date. Our books are reliable and effective and make it easy for you to provide your clients with the best care available. Our corresponding workbooks contain psychoeducational information, forms, and worksheets and homework assignments to keep clients engaged and motivated. A companion website [www.oup.com/us/ttw](http://www.oup.com/us/ttw) offers downloadable clinical tools and helpful resources. Antony, Michelle Genevieve Craske, David H. Barlow, 1995     **Mastery of Your Anxiety and Panic** Michelle G. Craske, David H. Barlow, 2000 MAP 3 is a systematic cognitive behavioral program which uses behavioral self-monitoring to increase awareness of circumstances that trigger panic symptoms. Clients learn specific intervention skills including how to slow down physiological reactivity through breathing retraining and muscle relaxation training, how to decatastrophise through actual prediction testing, and how to lessen fearfulness through exposure to feared sensations in safe settings. MAP 3 program revisions result from feedback from skilled clinicians who have used the MAP II program as a clinical tool for treating anxiety, panic, and agoraphobia. Revisions reflect the most cutting edge knowledge and empirical findings. The new MAP 3 program offers a deeper exploration of the origins of anxiety and panic and an explanation of how the physiology of breathing affects symptoms and treatment. MAP 3

includes recent findings on the integration of medication and treatment particularly the enduring effect of the MAP 3 program and has more explanations of the interrelationship of thoughts and feelings The client workbook for treatment of agoraphobia has been significantly expanded with recent findings     Mastering Your Fears and Phobias Michelle Genevieve Craske, Martin M.
