Cummins, 2013-11-07 When Homo sapiens met Canis lupus lupus millennia ago the result was Canis lupus familiaris the domestic dog Since that fateful encounter the dog has become arguably humankind s greatest creation The domestic dog is the most widely distributed species other than ourselves in the world being found virtually wherever people live and is also the most diversified of species with literally hundreds of recognized breeds While we have shaped the dog it too has helped shape human history in innumerable ways Our Debt to the Dog is a critical historical and cross cultural examination through the use of case studies of this most improbable 15 000 year relationship and an exploration of how this relationship shaped the history of the world It is also very much an apology to the dog because over the course of the partnership horrific acts were perpetrated against it intentionally and otherwise Our Debt to the Dog enriches our understanding of the dog and extends our appreciation for

the profound complexity of past and present human canine relationships and the dog's contributions to our lives and our world

**Canine Crania** Bryan D. Cummins, Kaelyn Racine, 2025-03-27

With the establishment of national kennel clubs, conformation dog shows and pedigrees that only register purebred dogs, the majority of these breeds have only been developed in the last 165 years. Today's dog comes in a seemingly infinite range of sizes, shapes, coats and colors. This diversity is the product of selective breeding that in turn is primarily in the hands of breeders and judges. Perhaps nowhere is the diversity of the dog more evident than in the skull, which in contrast to wild canids is too often misshapen and deformed. With selective breeding to arbitrary standards of canine beauty comes myriad health concerns including shortened life expectancy in many cases. We have literally shaped and continue to alter the domestic dog, but we must ultimately ask two questions: for what purpose and at what cost to our best friend
